#### **MB** Correction

The Serial Number information has been changed.

Modified Article: PFB Board				Prepared by: S. Tomoe		
From: Technical Ser	vices Dept., GTS Division					
Reason for	☐ Parts catalog correction	☐ Vendor ch	ange	☐ To meet standards		
Modification:	☐ To facilitate assembly	⊠ To improve	e reliability	( )		
	☐ Part standardization	☐ Other				

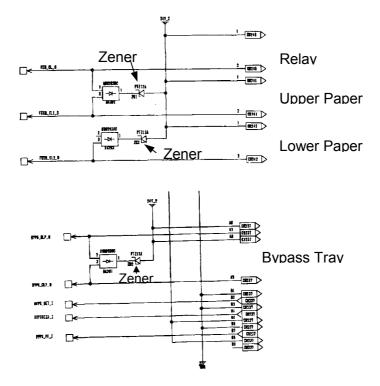

A counter electromotive force flows through the clutch drive circuits and causes the offtiming of the clutch to be delayed. This can result in a paper jam.

A zener diode has been added to the drive circuits of the PFB board for the following clutches, preventing any counter electromotive force from flowing through the circuits:

- 1. Relay Clutch
- 2. Upper Paper Feed Clutch
- 3. Lower Paper Feed Clutch
- 4. By-pass Tray Feed Clutch

The new part number for the PFB board is as follows:

Old part	New part	Description	Q'ty	Int	Page	Index
number	number					
A2325130	A2325135	PFB Board	1-1	X/O	59	20

Modified Article: Development Unit					Prepared by: S. Tomoe		
From: Technical Services Dept., GTS Division							
Reason for	☐ Parts catalog correction	☐ Vend	or ch	ange	☐ To n	neet standards	
Modification:	☐ To facilitate assembly	☐ To improve reliability		e reliability	(	)	
	☐ Part standardization	dization					

The parts listed below have been modified to facilitate assembly at the factory (interchangeability 0/0). However their part numbers remain the same.

Note that the SPC part number for the development unit has been changed, since the suffix for the old part had already reached Z.

- 1. Sponge (AA153053, P45, #28): The material of the double-sided tape has been changed to facilitate attachment, as the previous type tended to stretch and not stick well.
- 2. Decal (A2323066, P45, #31): The decal's thickness has been reduced from 0.1 to 0.065 mm to prevent it from partially peeling off, as it tended to do since it was attached to a curved surface.

#### Symptom:

Bands of low image density appear at approximately 5-mm intervals.

This is especially noticeable in half-tone areas.

#### Cause:

The supporting tension supplied by the ribs of the idler gear was slightly high, causing (minimal) warping in the gear.

#### **Countermeasure:**

The gear ribs will be removed to ensure that the idler gear diameter remains uniform.

### Modification Bulletin

**PAGE: 1/1** 

Model: Adonis-C	1	<b>e</b> : 26-Sep-0	1	No.: MA283019	
Modified Article	: Flexible Board	Prepared	by: S.	Tomoe	
From: Technical S	Services Dept., GTS Division				
Reason for Parts catalog correction Ve		☐ Vendor change		☐ To n	neet standards
Modification: ⊠ To facilitate assembly		☐ To improv	e reliability	(	)
	☐ Part standardization	☐ Other			

During board assembly, slack in the Flexible Board high-voltage lines can cause the lines to get caught between the board and base plate. To ensure this does not occur, the two lines have been bound in 3 additional places and the insulating material has been strengthened.

MB003009 announced the change of the Adonis-C2 Cleaning Pad to a Brush Roller, in order to increase Charge Roller cleaning efficiency. The Adonis-C1 has also adopted this new Brush Roller, along with the other related modified parts listed below.

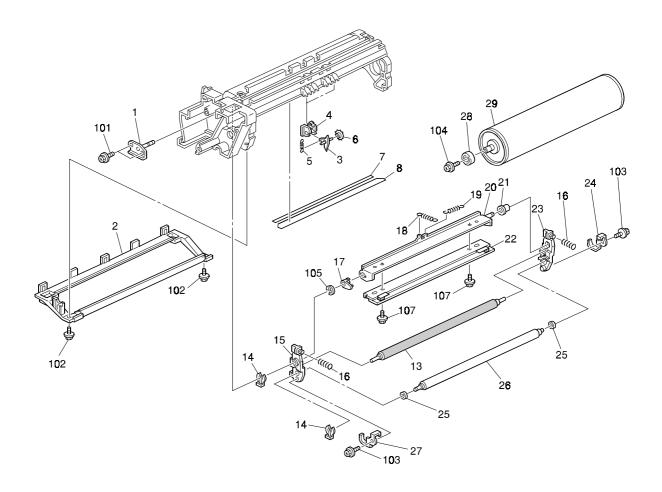

#### Note:

- 1. For the Adonis-C1, this change affects service parts only, as it has already been discontinued from production.
- 2. The PCU assembly can be used in machines from before and after this modification (O/O). However, the Cleaning Pad and new Brush Roller are not interchangeable (X/X).

Modified Article: Feed Shaft and Tightener Bracket				Prepared	by: E.	Fukuyama	
From: Technical S	ervices sec. Service Planning D	ept.					
Reason for	☐ Parts catalog correction	☐ Vendo	r ch	ange	☐ To n	neet standards	
Modification:	☐ To facilitate assembly	⊠ To imp	orove	e reliability	(	)	
	☐ Part standardization	☐ Other					

The following changes have been made to reduce noise.

A. Noise generated by vibration of the Electrical Clutch Feed Shaft and Drive Gear: **See the replacement procedure on the next page.** 

To support the free end of the shaft with a bushing:

- 1. Lengthened the Feed Shaft from 229mm to 249mm.
- 2. Added a Bushing and e-ring.
- 3. Modified the shape of the Tightener Bracket to accommodate the new bushing (hole added).

To hold the clutch firmly in place:

- 1. Added a Roller to be pressed closely against the clutch.
- 2. Added a Pressure Plate to attach the Roller.
- B. Noise from the Bushing of the Driven Roller Shaft: Changed the material of the Bushing.

Old part	New part	Description	Q'ty	Int	Page	Index

**PAGE: 1/4** 

**Note:** Whenever replacing the old Feed Shaft with the new one, the following parts from the above list must all be replaced <u>together as a set:</u>

AA140753, G0656801, G0656802, GA080002, 07200040E

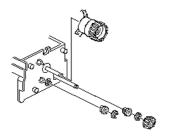

PAGE: 2/4

Model: Adonis-C1 Date: 22-Apr-02 No.: MA283023

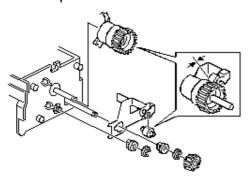

#### Replacement Procedure for parts modified in section A above

#### Prep:

Remove the Tightener Bracket, Retaining Ring, Bushing and Electrical Clutch as shown below.

1. Replace the Feed Shaft with AA140753.

- 2. Attach the Driven Roller [A] to the Pressure Plate [B], then peel off the outer layers of the double-sided tape (2 places) on the Pressure Plate.
- 3. Set the Bushing [C] in the hole in the Pressure Plate, then mount the two together onto the Feed Shaft.

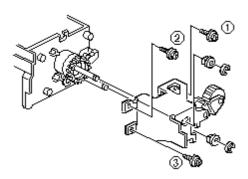

**Note:** Be careful not to let the exposed double-sided tape contact the Side Plate.

- 4. Set Bushing [D] in the cutout on the side of the Pressure Plate, then push in the Pressure Plate along with the two bushings. After it is set in position, attach e-rings [E] and [F].
- 5. Press the Pressure Plate firmly against the Side Plate so that the double-sided tape catches and secures the two together.
- 6. Attach the Gear [G].
- 7. Attach the Electrical Clutch [H].

**PAGE: 3/4** 

Model: Adonis-C1 Date: 22-Apr-02 No.: MA283023

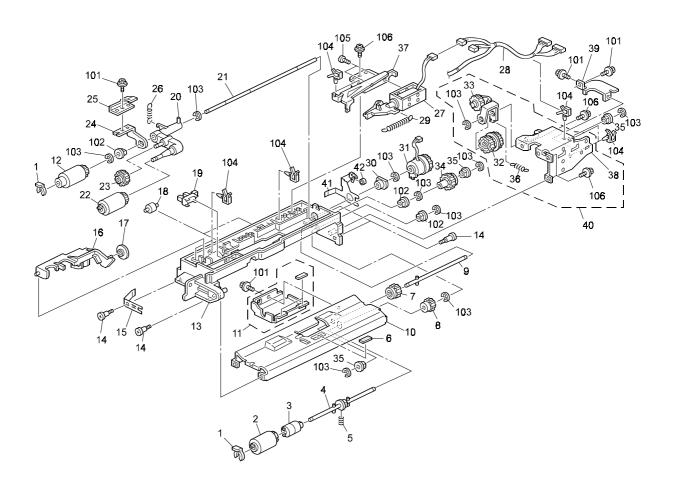

- 8. Remove the Arm Tightener, Gear and Spring attached to the Tightener Bracket removed in the Prep stage above, then attach them to the new Tightener Bracket [I].
- 9. Attach the Tightener Bracket [I] and Bushings [J] and [K]. Then, the tighten screws in the order shown.
- 10. Attach e-rings [L] and [M].
