This machine comes in two models which are referred to in this manual as Basic type and Edit

Some limitations may apply to functions—for details please refer to the Operating Instructions. The copy samples in this guide differ somewhat from actual copies due to printing effects.

type. Check the inside front cover of the Operating Instructions for the model you have before reading this guide.

# How to Make a Copy

#### In this situation...

#### Use this function...

You wish to make a copy in the same color and the same size as your original.

This machine has the following functions:

- Auto Color Select
   Selects a suitable color automatically.
- Auto Original Type Select Selects a suitable original image type automatically.
- Auto Paper Select Selects a suitable paper size automatically.

\*Auto Color Select and Auto Original Type Select cannot be set together.

Set the original.

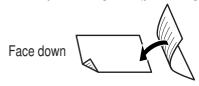

Make sure that following functions are selected:

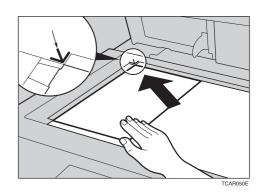

- [Auto Color Select]
- [Text / Photo]
- [Auto Paper Select]
- [Full Size]

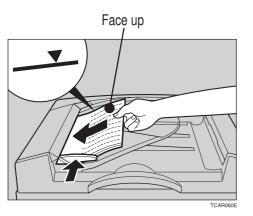

#### Tip

On the exposure glass(platen glass)

In the document feeder

To check the number of copies made so far, press the **[Counter]** key.

#### **Area Editing Example (Only for Edit type)**

# Filling a Background Area with a

#### In this situation...

You wish to fill the specified background of your original with a selected color.

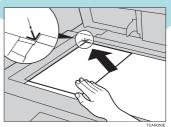

#### Use this function...

The Color Background function in Area Editing makes copies with the designated area filled in a selected color.

\*For information on other Area Editing features, see page 6 and 7.

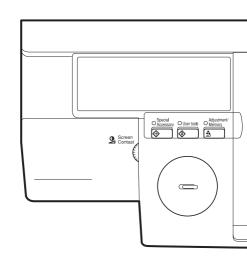

Set the original on the exposure glass (platen glass).

Select the area shape, then designate the area.

Press the [Area Editing] key.

#### Color

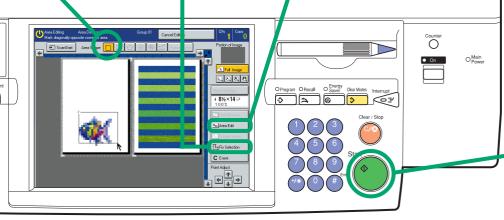

Select [Color Creation], then press the [Color Background] key.

Press the [Confirm Selection] key.

Select the desired color, then press the [OK] key twice.

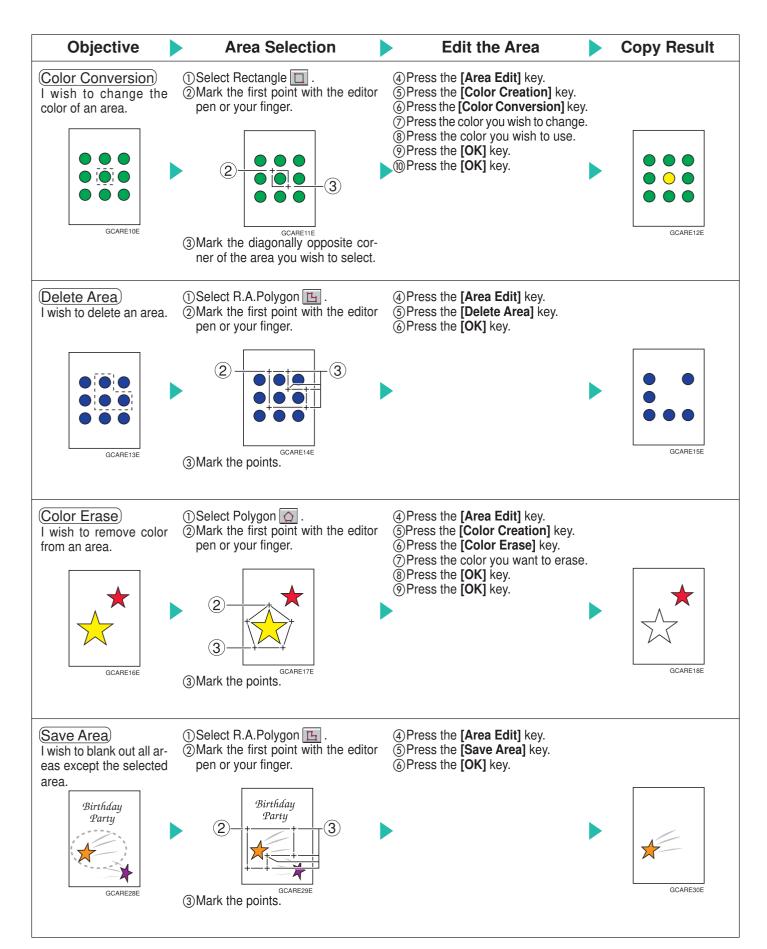

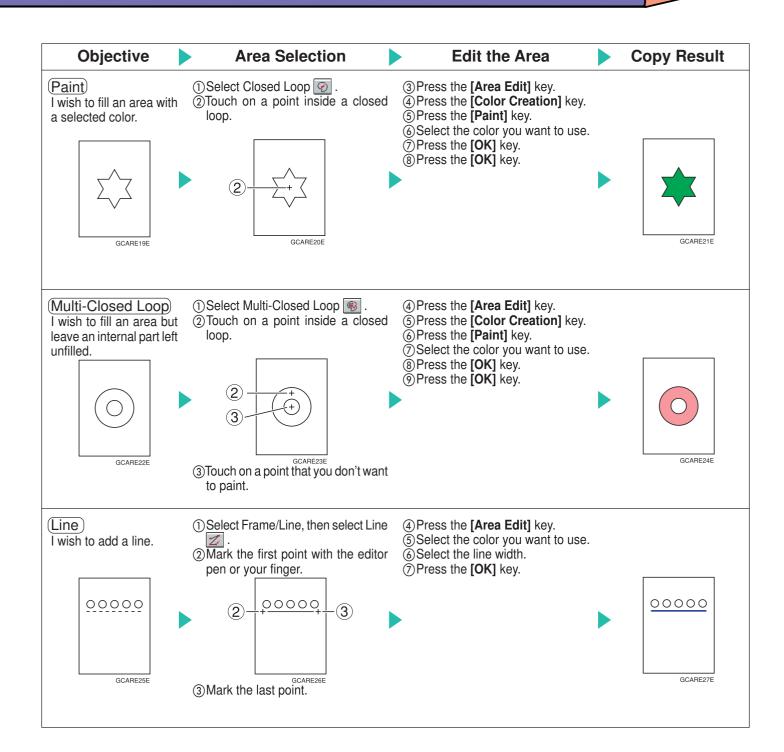

Press the [Start] key.

#### Area Editing Summary (Only for Edit type)

# Other Area Editing Functions

# **Adjusting the Color Balance**

#### In this situation...

#### Use this function...

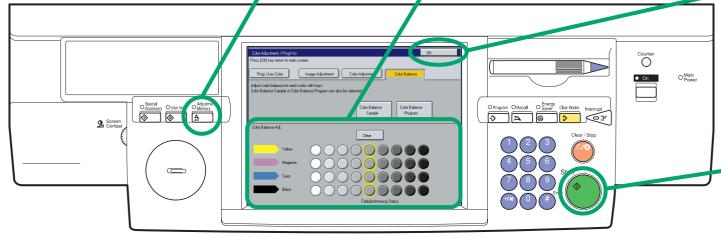

Copies are too yellow.

The Color Balance function allows you to control the overall color tone of copies.

Press the [Adjustment/Memory] key.

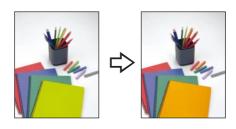

Set the original.

Adjust the color tone.

#### Tip

You can alter up to three single colors by mixing them with adjacent colors in the color circle.

- 1. Press the **[Adjustment/Memory]** key.
- 2. Press the [Color Adjustment] key.
- 3. Select the color that you want to adjust from the color circle.
- 4. Adjust the color with the [ $\leftarrow$ ] or [ $\rightarrow$ ] key.
- 5. Press the [OK] key.

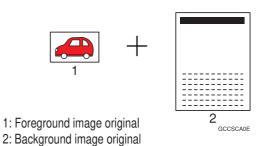

Press the [OK] key.

# Making a Leaflet

#### In this situation...

#### Use this function...

You wish to superimpose one original image over another e.g. to make a leaflet.

The Image Overlay function makes copies with a portion of one original image (the image original) overlayed onto another original image (the background original).

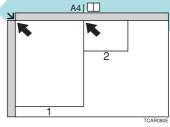

Press the [Image Overlay] key.

Press the Area Image Overlay [Image] key.

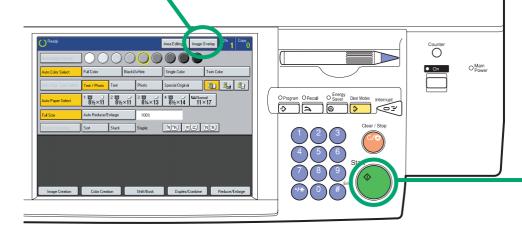

\* Select the [Overlay Opacity Yes] or [Overlay Opacity No] key.

# Set the original on the exposure glass.

- 1: Background original
- 2: Image original

#### Tip

When you mark first point in step 5, a rectangle and leading diagonal appear to show the full size and scale of the image.

#### For Proportional scaling

Mark second point on the leading diagonal.

#### For Squeeze or strech

Mark second point off the leading diagonal.

# Select the area of the foreground image original. Then press the [Confirm Selection] key.

\* To select the area Mark two diagonally opposite corners of a rectangle. Select the area of the background image original. Then press the [Confirm Selection] key.

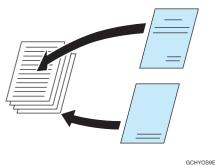

\* You can select the scale of the image. For details, see **Tip**.

## Copying Front and Back Covers

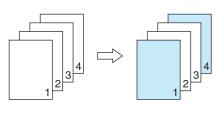

#### In this situation...

You wish to copy the front and back covers onto different type (e.g. different color) paper.

#### Use this function...

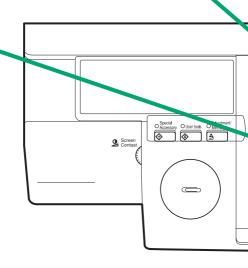

Use the Front & Back Cover function to have the first and last pages copied onto a different kind of paper (e.g. colored) than that used for the remaining pages.

Select the [Front & Back Cover] key.

Press the [Shift/Book] key.

Set the originals in the document feeder.

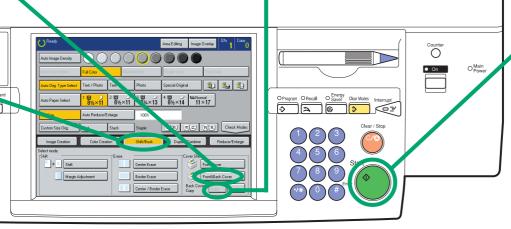

Set cover sheets into the bypass tray.

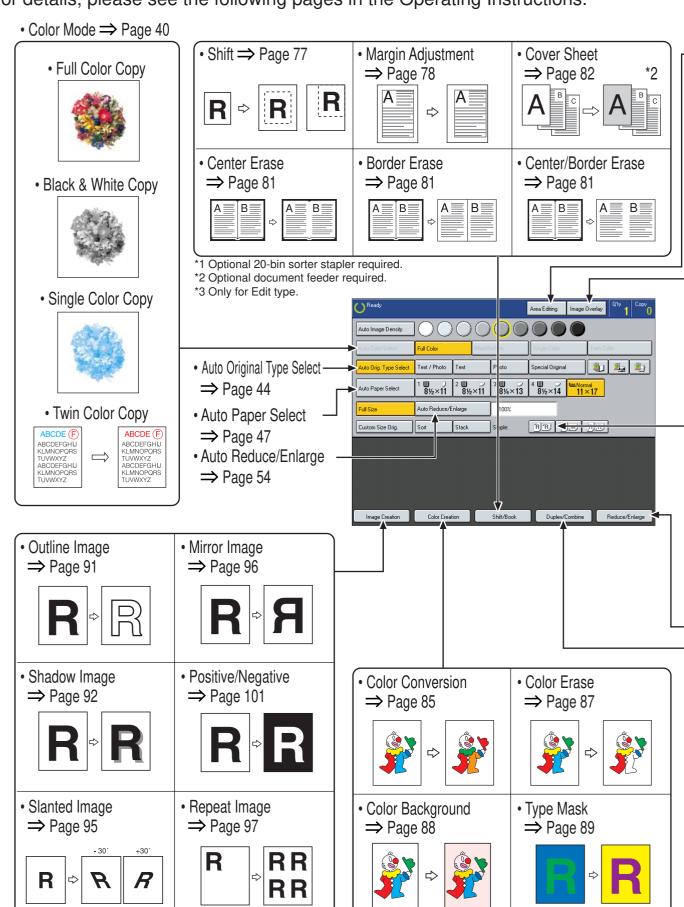

\* The covers are copied in Thick mode.

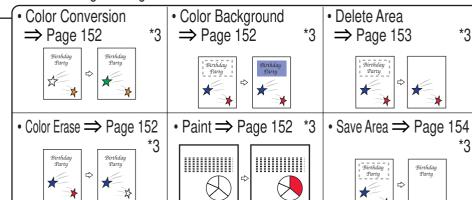

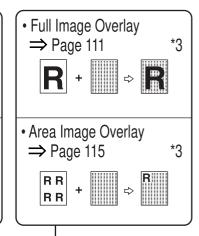

### Features at a Glance
