Laser Safety:

This machine is considered a class 1 laser device, safe for office/EDP use. The machine contains a 5-milliwatt, 760-800 nanometer wavelength, GaAIAs laser diode. Direct (or indirect reflected) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

The following label is attached on the back side of the machine.

Caution:

Use of controls or adjustments or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

Notes:

The model names of the machines do not appear in the following pages. Check the type of your machine before reading this manual. (For details, see p.7 "Machine Types".)

- Type 1: 16 copies/minute (A4 \square , 8 $\frac{1}{2}$ " \times 11" \square)
- Type 2: 20 copies/minute with duplex unit (A4 \square , 8 $\frac{1}{2}$ " \times 11" \square)

Certain types might not be available in some countries. For details, please contact your local dealer.

Two kinds of size notation are employed in this manual. With this machine refer to the metric version.

For good copy quality, the supplier recommends that you use genuine toner from the supplier.

The supplier shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts from the supplier with your office products.

Power Source

220 - 240V, 50/60Hz, 7A or more

Please be sure to connect the power cord to a power source as above. For details about power source, see p.57 "Power Connection".

- Stapled or clipped originals
- Perforated or torn originals
- Curled, folded, or creased originals

 **Note**

- ❑ When you copy custom size originals, make sure you specify the size of the originals. If not, the image may not be copied properly. See p.19 “Placing custom size originals”.

Sizes difficult to detect

It is difficult for the machine to detect the sizes of the following originals, so select the paper size manually.

- Originals with indexes, tags, or other projecting parts
- Transparent originals such as OHP transparencies or translucent paper
- Dark originals with lots of text and drawings
- Originals partially consisting of a solid image
- Originals that have solid images around their edges

Missing Image Area

Even if you place originals in the ADF or ARDF, or on the exposure glass correctly, 4 mm (0.2”) margins on all four sides might not be copied.

Placing Originals

Note

- ❑ Take care to place originals only after any correction fluid and ink has completely dried. Not taking this precaution could cause marks on the exposure glass that will be copied onto paper.

Reference

For original sizes you can set, see p.13 "Originals".

Original Orientation

You can set the original orientation in the following ways.

This function is useful for copying torn or large originals.

Note

- ❑ Originals should normally be aligned to the rear left corner. However, some copy functions may produce different results depending on the orientation of the originals. For details, see the explanations of each function.

		<small>set23EE</small>

Placing Originals on the Exposure Glass

- 1** Lift the exposure glass cover, ADF or ARDF.

Important

- ❑ Do not lift the exposure glass cover, ADF or ARDF forcefully. If you do, the ADF or ARDF cover might open or be damaged.

Note

- ❑ Be sure to lift the exposure glass cover, ADF or ARDF by more than 30°. Otherwise, the size of the original might not be detected correctly.

- 2** Place the original face down on the exposure glass. It should be aligned with the rear left corner.

- 1.** Positioning mark
- 2.** Left scale

Note

- ❑ Start with the first page to be copied.

- 3** Lower the exposure glass cover, ADF or ARDF.

Placing Originals in the ADF or ARDF

Settings should be made in the following situations:

- ❖ **When placing custom size originals:**
p.19 “Placing custom size originals”

 **Note**

- Do not stack originals over the limit mark on the side fence of the ADF or ARDF.
- The last page should be on the bottom.
- Do not cover the sensors with your hands, or place objects on them. Doing so could cause the size to be detected incorrectly, or the paper misfeed error message to appear. Also, do not place anything on the cover, as this too could cause a malfunction.

When using letterhead paper, check its orientation is correct. See p.44 "Orientation-Fixed Paper or Two-Sided Paper".

Do's and Don'ts

CAUTION:

- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*

Important

- Do not turn the power off while the On indicator is lit or blinking. Doing so may damage the memory.
- Before unplugging the power cord or turning off the main power switch, make sure remaining memory space is at 100%, as shown on the display. See p.12 "Turning Off the Power" and "Turning Off the Main Power".
- When you use this machine for a long time in a confined space without good ventilation, you may detect an odd smell. To keep the workplace comfortable, we recommend that you keep it well ventilated.
- Do not touch areas on or around the fusing unit. These areas get hot.
- After making copies continuously, the exposure glass may become warm—this is not a malfunction.
- The area around the ventilation hole might feel warm. This is caused by exhaust air and is not a malfunction.
- When the machine is not in use and in stand-by mode, you may hear a small noise inside. This is caused by the image stabilization process and is not a malfunction.
- Do not turn off the operation switch while copying or printing. Make sure all copying or printing has finished first.
- The machine might not produce good copy images if condensation forms inside as a result of rapid temperature change.
- Do not open the covers of the machine while copying or printing. If you do, misfeeds might occur.
- Do not move the machine during copying or printing.
- If you operate the machine improperly or a machine failure occurs, settings might be lost. Be sure to make a note of your machine settings.
- The manufacturer shall not be liable for any loss or damage resulting from mechanical failure, loss of settings, or use of the machine.

Where to Put Your Machine

Machine Environment

Choose your machine's location carefully. Environmental conditions greatly affect its performance.

Optimum environmental conditions

⚠ CAUTION:

- *Keep the machine away from humidity and dust. Otherwise a fire or an electric shock might occur.*
- *Do not place the machine on an unstable or tilted surface. If it topples over, an injury might occur.*

⚠ CAUTION:

- *If you use the machine in a confined space, make sure there is a continuous air turnover.*
- Temperature: 10-32 °C (50-89.6 °F) (humidity to be 54% at 32 °C, 89.6 °F)
- Humidity: 15-80% (temperature to be 27 °C, 80.6 °F at 80%)
- A strong and level base.
- The machine must be level within 5 mm, 0.2 inches: both front to rear, and left to right.
- To avoid possible buildup of ozone, be sure to locate this machine in a large well ventilated room that has an air turnover of more than 30 m³/hr/person.

Environments to avoid

- Locations exposed to direct sunlight or other sources of strong light (more than 1,500 lux).
- Locations directly exposed to cool air from an air conditioner or heated air from a heater. (Sudden temperature changes can cause condensation to form inside the machine.)
- Locations close to machines generating ammonia, such as a diazo copy machine.
- Places where the machine will be subject to frequent strong vibration.
- Dusty areas.
- Areas with corrosive gases.

Moving

⚠ CAUTION:

- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*

⚠ CAUTION:

- *Before moving the machine, be sure to pull all four handles fully out. If not, an injury might occur. After moving the machine, return the four handles to their original positions.*
- *When the optional paper tray unit is installed, do not push the upper part of the main unit horizontally. An injury might occur if the paper tray unit becomes detached from the main unit.*

⚠ Important

- ❑ Be careful when moving the machine. Take the following precautions:
 - Turn off the main power. See p.12 "Turning Off the Main Power".
 - Unplug the power cord from the wall outlet. When you pull out the plug from the socket, grip the plug to avoid damaging the cord, thereby reducing the risk of fire or electric shock.
 - Close all covers and trays, including the front cover and bypass tray.
- ❑ Do not take off the holding stand.
- ❑ Protect the machine from strong shocks. Impact can damage the memory.

Power Connection

⚠ WARNING:

- **Connect the machine only to the power source described on the inside front cover of this manual. Connect the power cord directly into a wall outlet and do not use an extension cord.**
- **Do not damage, break or make any modifications to the power cord. Do not place heavy objects on it. Do not pull it hard nor bend it more than necessary. These actions could cause an electric shock or fire.**

⚠ CAUTION:

- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*

⚠ CAUTION:

- *When you disconnect the power plug from the wall outlet, always pull the plug (not the cable).*
- When the main power switch is in the stand-by position, the optional anti-condensation heaters are on. In an emergency, unplug the machine's power cord.
- When you unplug the power cord, the anti-condensation heaters turn off.
- Make sure the plug is inserted firmly in the wall outlet.
- Voltage must not fluctuate by more than 10%.
- The wall outlet shall be installed near the machine and shall be easily accessible.

Access to the Machine

Place the machine near the power source, providing the clearance areas shown.

1. Rear: 5 cm (2") or more
2. Right: 25 cm (10") or more
3. Front: 75 cm (29.6") or more
4. Left: 15 cm (6") or more

Note

- For the required space when options are installed, contact your service representative.

Maintaining Your Machine

If the exposure glass, exposure glass cover, ADF belt, or ARDF belt is dirty, copy clarity may be reduced. Clean these parts if they are dirty.

❖ Cleaning the machine

Wipe the machine with a soft, damp cloth. Then wipe it with a dry cloth to remove the water.

⚠ Important

- ❑ Do not use chemical cleaner or organic solvents such as thinner or benzene. If such substances get inside the machine or melt plastic parts, a failure might occur.
- ❑ Do not clean parts other than those explicitly specified in this manual. Other parts should only be cleaned by your service representative.

- You can select one of 7 preset ratios (3 enlargement ratios, 4 reduction ratios).
- You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or margins will appear on copies.
- Copies can be reduced or enlarged as follows:

❖ Metric version

Ratio (%)	Original → Copy paper size
200 (enlarge area by 4)	A5→A3
141 (enlarge area by 2)	A4→A3, A5→A4
122	F→A3, A4→B4 JIS
115	B4 JIS→A3
93	--
82	F→A4, B4 JIS→A4
71 (reduce area by 1/2)	A3→A4, A4→A5
65	A3→F
50 (reduce area by 1/4)	A3→A5, F→A5

❖ **Inch version**

73	11" × 15" → 8 ¹ / ₂ " × 11"
65	11" × 17" → 8 ¹ / ₂ " × 11"
50 (reduce area by 1/4)	11" × 17" → 5 ¹ / ₂ " × 8 ¹ / ₂ "

❖ **Zoom**

- The reproduction ratios you can specify are 50–200%.
- You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or margins will appear on copies.

❖ **Sort, Rotate Sort**

- Paper sizes and orientations that can be used with the Rotate Sort function are A4 , B5 JIS , A5 , 8¹/₂" × 11" , and 5¹/₂" × 8¹/₂" .

❖ **Duplex (Type 2 only)**

- You cannot use the following copy paper with this function:
 - Paper smaller than 5¹/₂" × 8¹/₂" .
 - Paper thicker than 105 g/m², 28 lb.
 - Paper thinner than 64 g/m², 17 lb.
 - Translucent paper
 - OHP transparencies
 - Label paper (adhesive labels)
 - Postcards
- When an odd number of originals is placed in the ADF, the back of the last page of copied paper is blank.
- During copying, the image is shifted to allow for the binding margin.
- The following paper sizes can be duplexed: A3 , B4 JIS , A4 , B5 JIS , A5 , 11" × 17" , 8¹/₂" × 14" , 8¹/₂" × 11" 

❖ Combine

- When using this function, the machine selects the reproduction ratio automatically. This reproduction ratio depends on copy paper sizes and the number of originals.
- The reproduction ratios you can specify are 50–200%.
- If the calculated ratio is under the minimum ratio, it is automatically adjusted to within available range. However, with some ratios, parts of the image might not be copied.
- You cannot use custom size paper.
- If the orientation of originals is different from that of the copy paper, the machine will automatically rotate the image by 90° to make copies properly.
- If the number of originals placed is less than the number specified for combining, the last page segment is left blank as shown.

**❖ Duplex Margin (Type 2 only)**

- If you set a binding margin that is too wide, part of the image may not be copied.
- When making copies using the Combine function, the binding margin is added to the copies when combining is finished.
