

# Notes for Users

Note the following corrections to the manuals.

## □ **About This Machine**

**Topic:** Appendix > Specifications for the Main Unit

Error	Corrections
Warm-up time (23°C, rated voltage): <ul style="list-style-type: none"><li>• Main power switch: <u>12</u> seconds or less</li><li>• Operation switch: 10 seconds or less</li></ul>	Warm-up time (23°C, rated voltage): <ul style="list-style-type: none"><li>• Main power switch: <u>22</u> seconds or less</li><li>• Operation switch: 10 seconds or less (<u>Operation time of process control is excluded</u>)</li></ul>

## □ **Security Reference**

**Topic:** Ensuring Information Security > Deleting Data on the Hard Disk >  
Erase All Memory

Error	Corrections
Other than pausing, no operations are possible during the “Erase All Memory” process. If [Random Numbers] is specified and the number of overwrites set to “3”, the erase process will take about <u>zzzzz</u> hours.
