

Notes for Application Site Users

To Use Application Site, you need to configure an environment to connect to the Internet.

Configuring an environment to connect to the Internet.

- In an environment where a proxy server is used, configure the proxy settings as follows:
 - [Proxy Settings] in [WIRELESS & NETWORKS] in [Screen Features]
 - [RC Gate Proxy Server] in [Configuration] in [Device Management] of Web Image Monitor
- DNS Configuration
 - [Network] in [Interface Settings] in [System Settings] in [Machine Features]

Reference

For details about the machine settings, see the manual provided with the machine.
For details about Web Image Monitor, see Web Image Monitor Help.
