

Notes for Users

Please note the following additional information and corrections to these manuals.

About This Machine

| Page | Additional Information | |
|--|---|--|
| P.61 Dos and Don'ts | <ul style="list-style-type: none"> • If room temperature where the machine is located is higher than 30°C (86°F), do not copy in full color continuously for more than two hours. If you do, white lines may appear on copies. • If you will be making full color copies for two hours or longer and the temperature of the room in which the machine is located exceeds 30°C (86°F), use the Auto Off Timer setting to specify an interval of at least one hour. This interval allows the machine to cool down, preventing white lines from appearing on copies. During the interval, do not turn off the machine's operation switch or main power switch. • When in standby mode, the machine becomes noisy when: <ul style="list-style-type: none"> • room temperature is higher than 32°C (89.6°F) • room temperature is 30°C(86°F), or higher and copying has been continuous. <p>This noise does not indicate malfunction. Do not turn off the machine.</p> | |
| P.108 Paper Thickness | The classification of thick paper may be different depending on the brand of paper. | |
