

Reissued: 14-Sep-07

Model: Neptune-P1	Date: 27-Aug-07	No.: RG180001a
-------------------	-----------------	----------------

Subject: Firmware Release Note: Engine		Prepared by: F.Noguchi	
From: 2nd Tech. Support Sec. Service Support Dept.			
Classification:	<input type="checkbox"/> Troubleshooting <input type="checkbox"/> Mechanical <input type="checkbox"/> Paper path <input checked="" type="checkbox"/> Other ()	<input type="checkbox"/> Part information <input type="checkbox"/> Electrical <input type="checkbox"/> Transmit/receive	<input type="checkbox"/> Action required <input type="checkbox"/> Service manual revision <input type="checkbox"/> Retrofit information

This RTB has been issued to announce the firmware release information for the **Engine**.

Version	Program No.	Effective Date
P1.05:09	G1805300D	September 2007 production
P1.04:09	G1805300C	August 2007 production
P1.03 :09	G1805300B	1st Mass production.

Version	Modified Points or Symptom Corrected
P1.05:09	Other changes: 1. The folder unit can now be switched to Off-line Mode by pressing the Off-line key on the unit's operation panel, even when the N-P1 is in Panel Off or Energy Saver Mode. Note: If the N-P1 is in Auto Off Mode, you must turn the N-P1 main power switch and then press the Off-line key on the folder unit operation panel.
P1.04:09	Other changes: The default values for the Adjustment of Margins in User Tools were changed as follows: NA: 1.0-1.5 inches --> 0.8-1.6 inches EU: 35-40mm --> 20-40mm Important: If the B889 folder unit is installed, to apply the above changes, update the folder unit firmware (B889 folder unit: JABARA 1.07).
P1.03 :09	1st Mass production.

This RTB has been issued to announce the firmware release information for the **GL2&TIFF-Filter**.

The following is the firmware upgrade procedure for the GL2&TIFF-Filter (G1805913x).

Firmware upgrade procedure:

1. Turn OFF the main power switch.
2. Remove the SD card containing the "TIFF/GL Filter" from Slot 2.
3. Delete the folder "sdk" from the SD card.
4. Open the Release Note for the GL2&TIFF-Filter
(firmware filename: G1805913x).
5. Open the file " G1805913x.zip".
6. Extract all files to the SD card.
7. Confirm that the directory in the SD card is as follows:
 sdk/
 67633408
 67633664
8. Insert the SD card into Slot 2.
9. Turn ON the main power switch.

SYMPTOM

"Applet printtool.c2pl applet notinited" (error message) is displayed if WebPrint is used together with Java 6 Update 2, Version 1.6.0_2.

Note: This does not occur if Java 6 Update 2, Version 1.6.0_1 or earlier is installed.

CAUSE

The default setting for "Temporary Internet Files" in the Java Control Panel was changed from Java 6 Update 2, Version 1.6.0_2.

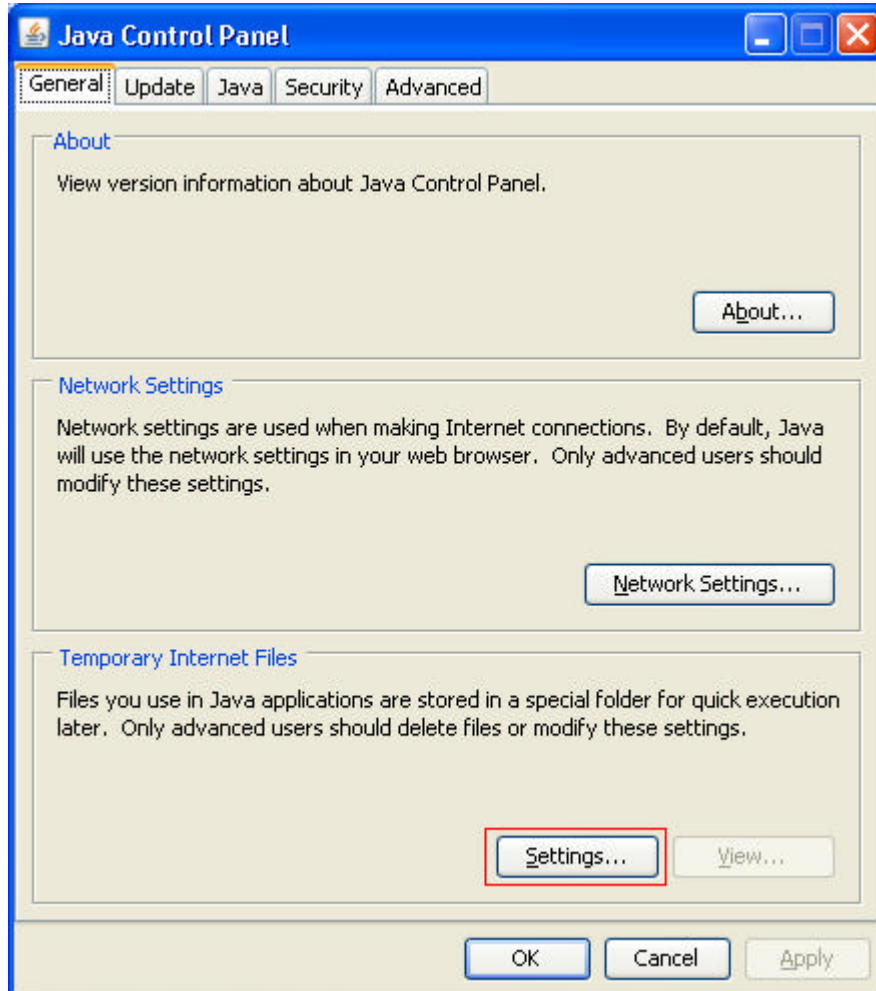

SOLUTION

Change the "Temporary Internet Files" setting in the Java Control Panel.

See the procedure below

Procedure

1. Access the Java Control Panel.
2. From the "General" Tab, click the "Settings" button for Temporary Internet Files.

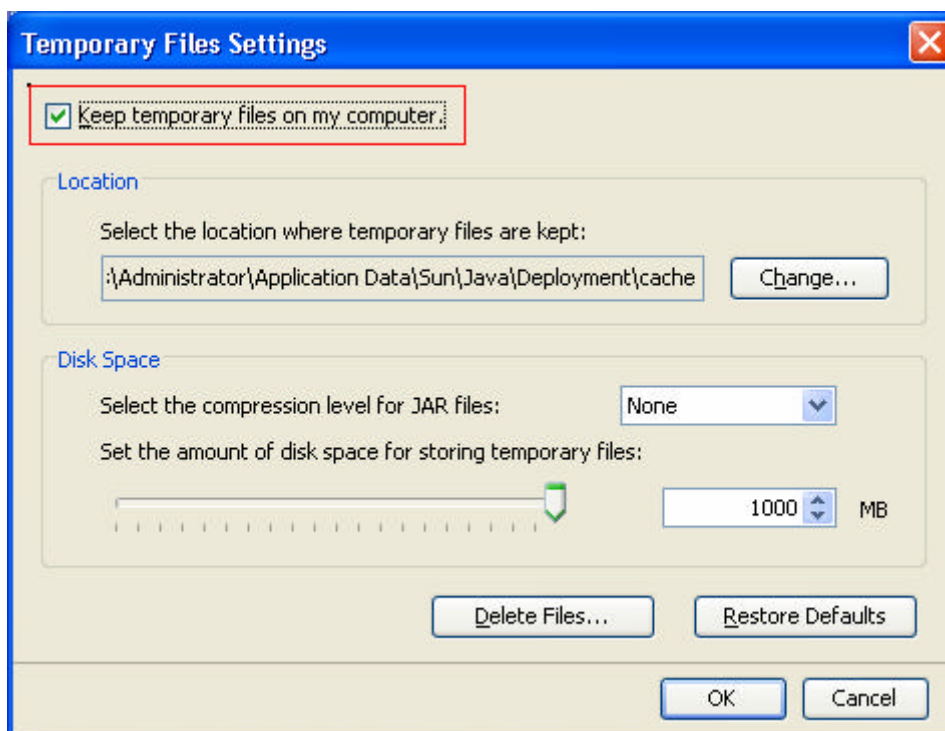

Model: Neptune-C2/P1

Date: 06-Sep-07

No.: RB286015

3. Uncheck the box next to "Keep temporary files on my computer".
4. Click "OK".
5. Go back to the "General" tab and click "Apply".
6. Click "OK".

Important Information on the Release of a New Wireless LAN Option

Overview

1. Production of a new wireless LAN option, the **IEEE 802.11b Interface Unit Type N**, began in March 2008. This will replace the current wireless LAN options listed below, as the vendor discontinued production on a key part contained in these options.
2. Make sure to see below for the target models and action in the field, including the necessary firmware versions.

Details

1. Discontinued wireless LAN options:

for US

Code	EDP	Description	Note
B736-06	412176	IEEE 802.11b Interface Unit Type E	discontinued in 1st 2007
G813-01	402345	802.11b Interface Unit Type F	discontinued in 1st 2007 due to country origin issue
G813-08	403019	802.11b Interface Unit Type F	change from EDP:402345
G813-04	402378	IEEE802.11b Interface Unit Type H	discontinued in 1st 2007 due to country origin issue
G813-07	403018	IEEE802.11b Interface Unit Type H	change from EDP:402378
G874-39	402631	IEEE802.11b Interface Unit Type I	discontinued in 1st 2007 due to country origin issue
G874-48	403017	IEEE802.11b Interface Unit Type I	change from EDP:402631

for EU and Asia

Code	EDP	Description	Note
B736-07	412177	IEEE 802.11b Interface Unit Type E	discontinued in 1st 2007
G813-02	402358	802.11b Interface Unit Type F	discontinued in 1st 2007 due to country origin issue
G813-10	403020	802.11b Interface Unit Type F	change from EDP:402358
G813-05	402379	IEEE802.11b Interface Unit Type H	discontinued in 1st 2006 due to RoHS
G813-45	412996	IEEE802.11b Interface Unit Type H	discontinued in 1st 2007 due to country origin issue
G813-09	414421	IEEE802.11b Interface Unit Type H	change from EDP:412996

2. Specifications of the new wireless LAN option:

Print_B7367059.pc

Specification Sheet:

Model Name: IEEE 802.11b Interface Unit Type N
 Machine code: B736-16
 EDP code: 414525
 Package: All-in-one (PCB, LAN card, and cover are pre-assembled)
 Channel freq. range: 2412 MHz to 2462 MHz (11ch.)
 Transmission speed: 1Mbps, 2Mbps, 5.5 Mbps, 11Mbps

Model: General

Date: 12-Mar-08

No.: RGene027

Previous types:
PCB, LAN card, and cover are
separate

New Type (IEEE802.11b
Interface Unit Type N):
Pre-assembled

Action in the Field

1. MFP Models

Update the firmware on the target MFP models to the necessary versions at the installation.

See “Target Models” below.

2. LP Models

Update the firmware on the target LP models to the necessary versions if the customer requests it. The following notice to customers (from the Operating Instructions) lists the firmware versions necessary to use the new wireless LAN option. If a firmware update is necessary, the customer contacts their sales or service representative.

See “Target Models” below.

Notice to users (excerpt on next page):

print_B7367058.pdf

Model: General

Date: 12-Mar-08

No.: RGene027

Excerpt from the Operating Instructions for LP models

Installing the Optional Wireless LAN Interface Unit

Important:

- Before handling the wireless LAN interface unit, ground yourself by touching something metal to discharge any static electricity. Static electricity can damage the wireless LAN interface unit.
 - Do not subject the wireless LAN interface unit to physical shocks.
1. Turn off the power of the printer, and then unplug the power cable and the interface cable.
 2. Remove the two screws from the interface unit's slot cover, and then remove the slot cover.
The removed cover is not used when installing the wireless LAN interface unit. Keep it for possible future use.

For details about the location of the interface unit slot, see the manual provided with your printer.

3. Attach the wireless LAN interface unit.

Insert the end of the wireless LAN interface unit into the slot.

Slot types vary according to device. For details, see the manual provided with your printer.

4. Fasten the wireless LAN interface unit to the controller board with the two screws.
Check the wireless LAN interface unit is connected firmly to be controller board.

Note

- Use a coin or similar object if the screws do not turn easily.
- After finishing installation, you can check the wireless LAN interface unit is properly installed: Print the configuration page from the [List / Test Print] menu. If it is installed properly, the name of wireless LAN interface unit will appear for "Device Connection" on the configuration page.
- If the wireless LAN interface unit is not installed properly, reinstall it following this procedure. If you cannot install it properly even after attempting reinstallation, contact your sales or service representative.
- You need to make settings with the control panel before using the wireless LAN interface unit. For more information, see the manual provided with your printer.

Model: General

Date: 12-Mar-08

No.: RGene027

Checking the Connection

To check the connection, use the two lights on the optional wireless LAN interface unit.

1. The orange light indicates normal network connectivity.
2. The green light indicates that the optional wireless LAN interface unit is properly powered.

If both lights are lit, the wireless connection is fully operational.

Note:

- The old wireless LAN options can be used with both the old and new firmware.
- The following models only support the old wireless LAN options:
Bellini-C3, Themis-C1, Adonis-C4.5, Russian-C4.5, Jupiter-C2, Martini-C2.5, Martini-C3

LP

	Model	System firmware	NCS firmware	Websys firmware	Applied to the production line
01.	Gaia-P2	1.12	6.05.7	1.07	2008 April
02.	Gaia-P2L	1.01	6.05.7	1.07	2008 April
03.	Apollon-P1d	1.07	6.05.7	1.03	2008 March
04.	Adonis-P4	1.08	6.05.7	1.05	2008 April
05.	Martini-P2	1.10	6.05.7	1.02	2008 April
06.	Sincere-P1	1.08*	6.10	1.03	2008 February
07.	Neptune-P1	1.02	6.10	1.03	2008 May

Note:

- The old wireless LAN options can be used with both the old and new firmware.
- The following models only support the old wireless LAN options:
Kir-P4, Ares-P2, Jupiter-P4
- *: The notice to customers for Sincere -P1 mentions "version 1.07" for the System firmware, but 1.07 was not used for the production. The correct version is 1.08.

Model: Neptune-P1	Date: 27-Aug-07	No.: RG180005c
-------------------	-----------------	----------------

Forced Printing (ver.1.04)

The firmware modified to meet the request for forced printing:

Old specifications (pre-modification):

The machine does not print the image if the original size does not match the paper size (to minimize printing errors).

e.g.,

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image cannot be printed
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel). Please see the attached procedure for how to avoid the size mismatch even with the old firmware.

New specifications (post-modification):

If one of the roll trays is selected (Tray 1 or 2), the image will be printed out even if the original size and paper size do not match.

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image is printed ("forced printing")
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel).

Modification procedure:

The following steps will force the machine to print out the image in cases where the original/paper size do not match, effectively enabling the "forced print" feature of the modified firmware. However before doing so, **please make sure to explain the limitations described below to the customer.**

1. Update the firmware
2. Change the setting of the Printer SP: BitSW No. 6-0 to a value of "1" to enable Forced Print.

Limitations:

1. If you are storing the image to the HDD in addition to printing it out, the page width will be equal to the width of the roll paper in the selected tray.
2. Regardless of the size or final printing orientation of the original image, the paper size logged in the job log and counted up in the machine counters is the actual size of the paper used to print the image.
3. When using forced print together with folding functions, in some cases, the relationship between the folds and the image (number of folds in the paper, orientation of the image, etc.) may not be what the customer intended. This is because the original image is being printed onto paper of a different size, and/or the image is being rotated.
4. With PDF Direct Print, the driver will search for a roll tray first. If a roll tray is found that contains paper of the same size as the original, the paper will be fed from that tray. However if a match is not found, the Priority Tray will be used.
5. The only PS driver supported is the Ricoh original PS driver.

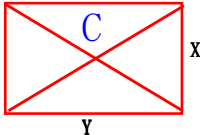

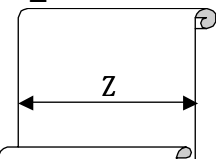

Reissued: 3-Jun-08

Model: Neptune-P1

Date: 27-Aug-07

No.: RG180005c

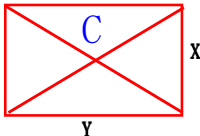

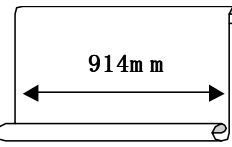

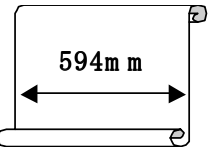

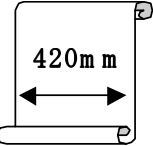

Specific example:

Original	TRAY
$X > Y$ 	Roll paper width $= Z$ 

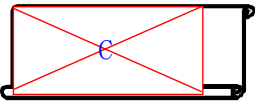

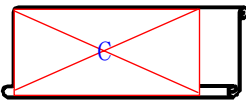

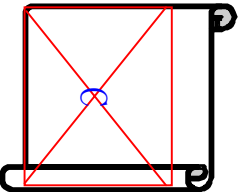

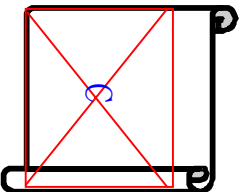

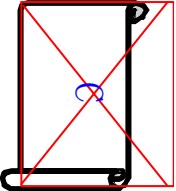

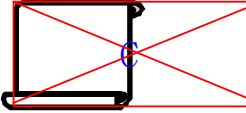

Size Condition	RPCS driver	PS driver
$Z > Y$	No Rotation (Image is not cropped)	\leq
$Y > Z$ $Z > X$	Rotation (Image is not cropped)	\leq
$Y > Z$ $X > Z$	Rotation (Image is cropped)	No Rotation (Image is cropped)

Example

Original	TRAY
$X=600\text{mm}$ $Y=800\text{mm}$ 	TRAY 1  Roll paper width: 914 mm
	TRAY2  Roll paper width: 594 mm
	TRAY 3  Roll paper width: 420 mm

Source TRAY	RPCS driver	PS driver
TRAY 1	No Rotation (Image is not cropped)  Roll paper width: 914 mm	\leq  Roll paper width: 914 mm
TRAY2	No Rotation (Image is not cropped)  Roll paper width: 594 mm	\leq  Roll paper width: 594 mm
	Non Rotate (Image is cropped)  Roll paper width: 420 mm	Non Rotate (Image is cropped)  Roll paper width: 420 mm

Forced Printing (ver.1.04)

The firmware modified to meet the request for forced printing:

Old specifications (pre-modification):

The machine does not print the image if the original size does not match the paper size (to minimize printing errors).

e.g.,

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image cannot be printed
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel). Please see the attached procedure for how to avoid the size mismatch even with the old firmware.

New specifications (post-modification):

If one of the roll trays is selected (Tray 1 or 2), the image will be printed out even if the original size and paper size do not match.

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image is printed ("forced printing")
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel).

Modification procedure:

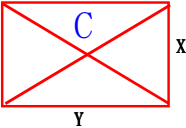

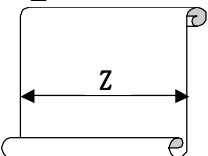

The following steps will force the machine to print out the image in cases where the original/paper size do not match, effectively enabling the "forced print" feature of the modified firmware. However before doing so, **please make sure to explain the limitations described below to the customer.**

1. Update the firmware
2. Change the setting of the Printer SP: BitSW No. 6-0 to a value of "1" to enable Forced Print.

Limitations:

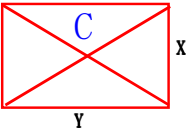

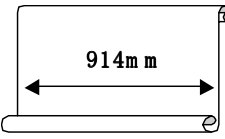

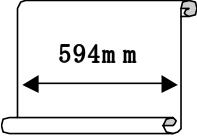

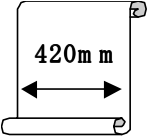

1. If you are storing the image to the HDD in addition to printing it out, the page width will be equal to the width of the roll paper in the selected tray.
2. Regardless of the size or final printing orientation of the original image, the paper size logged in the job log and counted up in the machine counters is the actual size of the paper used to print the image.
3. When using forced print together with folding functions, in some cases, the relationship between the folds and the image (number of folds in the paper, orientation of the image, etc.) may not be what the customer intended. This is because the original image is being printed onto paper of a different size, and/or the image is being rotated.
4. With PDF Direct Print, the driver will search for a roll tray first. If a roll tray is found that contains paper of the same size as the original, the paper will be fed from that tray. However if a match is not found, the Priority Tray will be used.
5. The only PS driver supported is the Ricoh original PS driver.

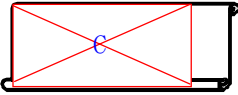

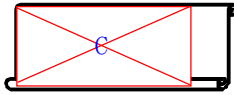

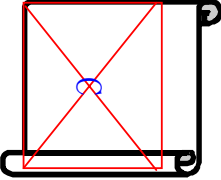

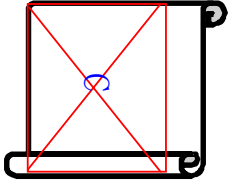

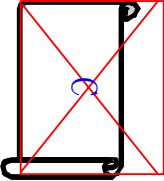

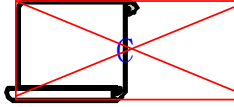

Reissued: 12-May-09

This RTB has been issued to announce the firmware release information for the **GL2&TIFF-Filter**.

The following is the firmware upgrade procedure for the GL2&TIFF-Filter (G1805913x).

Firmware upgrade procedure:

1. Turn OFF the main power switch.
2. Remove the SD card containing the "TIFF/GL Filter" from Slot 2.
3. Delete the folder "sdk" from the SD card.
4. Open the Release Note for the GL2&TIFF-Filter (firmware filename: G1805913x).
5. Open the file "G1805913x.zip".
6. Extract all files to the SD card.
7. Confirm that the directory in the SD card is as follows:
 sdk/
 67633408
 67633664
8. Insert the SD card into Slot 2.
9. Turn ON the main power switch.

Version	Program No.	Effective Date
1.1.4	G1805913D	April 2009 production
1.1.2	G1805913C	June 2008 production
1.1.0	G1805913B	June 2008 production
1.0.7	G1805913A	1st Mass production.

Version	Modified Points or Symptom Corrected
1.1.4	Symptom corrected: WebPrintingTool doesn't work with JRE 1.6.x.x.
1.1.2	Other changes: Supports "Forced print". For details, see RG180005c.
1.1.0	Other changes: Supports the Chinese version machine (G180-21).
1.0.7	Firmware standardization with Model G180.

Reissued: 12-May-09

Model: Neptune-P1	Date: 27-Aug-07	No.: RG180008b
-------------------	-----------------	----------------

Version	Modified Points or Symptom Corrected
1.0.0	First mass production

Reissued: 26-Jun-09

This RTB has been issued to announce the firmware release information for the **Printer**.

Version	Program No.	Effective Date	Availability of RFU
1.09	G1805882G	October 2012 production	Available
1.06	G1805882F	April 2009 production	Available
1.05	G1805882E	October 2008 production	Available
1.04	G1805882D	June 2008 production	Available
1.03	G1805882C	June 2008 production	Available
1.02	G1805882B	April 2008 production	Available
1.01.1	G1805882A	December 2007 production	Available
1.00	G1805882	1st Mass production.	Available

Note: Definition of Availability of RFU via @Remote
“Available”: The firmware can be updated via RFU or SD card.

“Not available”: The firmware can only be updated via SD card.

Version	Modified Points or Symptom Corrected
1.09	Symptom corrected: The use of SDK applications that access the GPS Filter (such as the PDL filter) might result in slow printing.
1.06	Symptom corrected: When printing onto non-standard sized paper with the following dimensions, the counter is SP8441-239 is incremented (the counter in SP8441-240 should be incremented): - Length: 841mm or longer but less than 1189mm - Width: A0 width
1.05	version/ suffix change only
1.04	Other changes: Supports “Forced print”. For details, see attached pages.
1.03	Other changes: Supports the Chinese version machine (G180-21).
1.02	Minor changes

Reissued: 18-Sep-12

Model: Neptune-P1		Date: 27-Aug-07	No.: RG180005f
Version	Modified Points or Symptom Corrected		
1.01.1	Other changes: When "36inch/914mm" is selected as the paper size on the 220V machine, the display will read "914mm".		
1.00	1st Mass production.		

Reissued: 18-Sep-12

Model: Neptune-P1	Date: 27-Aug-07	No.: RG180005f
-------------------	-----------------	----------------

Forced Printing (ver.1.04)

The firmware modified to meet the request for forced printing:

Old specifications (pre-modification):

The machine does not print the image if the original size does not match the paper size (to minimize printing errors).

e.g.,

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image cannot be printed
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel). Please see the attached procedure for how to avoid the size mismatch even with the old firmware.

New specifications (post-modification):

If one of the roll trays is selected (Tray 1 or 2), the image will be printed out even if the original size and paper size do not match.

Setting/conditions:	Original size, paper size:	Result:
Auto-tray	Original size and paper size do not match	Image cannot be printed
Tray 1 or 2	Original size and paper size do not match	Image is printed ("forced printing")
Paper cassette	Original size and paper size do not match	Image cannot be printed

Note: In cases where the image cannot be printed, the job must be reset (from the machine operation panel).

Modification procedure:

The following steps will force the machine to print out the image in cases where the original/paper size do not match, effectively enabling the "forced print" feature of the modified firmware. However before doing so, **please make sure to explain the limitations described below to the customer.**

1. Update the firmware
2. Change the setting of the Printer SP: BitSW No. 6-0 to a value of "1" to enable Forced Print.

Limitations:

1. If you are storing the image to the HDD in addition to printing it out, the page width will be equal to the width of the roll paper in the selected tray.
2. Regardless of the size or final printing orientation of the original image, the paper size logged in the job log and counted up in the machine counters is the actual size of the paper used to print the image.
3. When using forced print together with folding functions, in some cases, the relationship between the folds and the image (number of folds in the paper, orientation of the image, etc.) may not be what the customer intended. This is because the original image is being printed onto paper of a different size, and/or the image is being rotated.
4. With PDF Direct Print, the driver will search for a roll tray first. If a roll tray is found that contains paper of the same size as the original, the paper will be fed from that tray. However if a match is not found, the Priority Tray will be used.
5. The only PS driver supported is the Ricoh original PS driver.

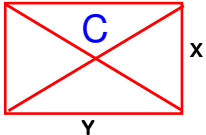

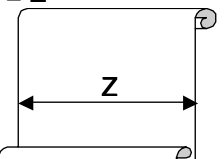

Reissued: 18-Sep-12

Model: Neptune-P1

Date: 27-Aug-07

No.: RG180005f

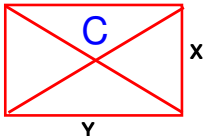

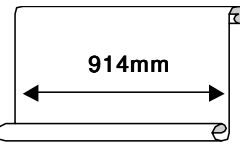

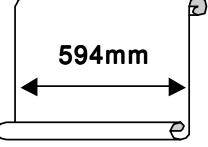

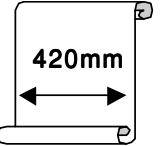

Specific example:

Original	TRAY
$X > Y$ 	Roll paper width $= Z$ 

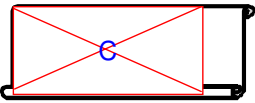

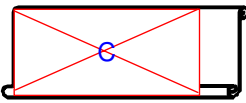

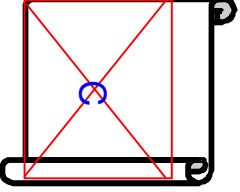

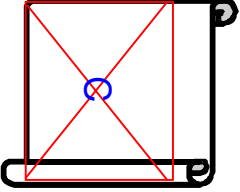

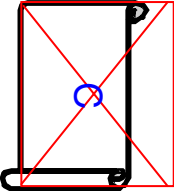

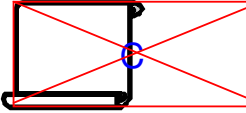

Size Condition	RPCS driver	PS driver
$Z > Y$	No Rotation (Image is not cropped)	\leq
$Y > Z$ $Z > X$	Rotation (Image is not cropped)	\leq
$Y > Z$ $X > Z$	Rotation (Image is cropped)	No Rotation (Image is cropped)

Example

Original	TRAY
$X=600\text{mm}$ $Y=800\text{mm}$ 	TRAY 1  Roll paper width: 914 mm
	TRAY2  Roll paper width: 594 mm
	TRAY 3  Roll paper width: 420 mm

Source TRAY	RPCS driver	PS driver
TRAY 1	No Rotation (Image is not cropped)  Roll paper width: 914 mm	\leq  Roll paper width: 914 mm
TRAY2	No Rotation (Image is not cropped)  Roll paper width: 594 mm	\leq  Roll paper width: 594 mm
	Non Rotate (Image is cropped)  Roll paper width: 420 mm	Non Rotate (Image is cropped)  Roll paper width: 420 mm
