Important Note Regarding Firmware Updates on All GW 2007 Autumn Products

SC672 may occur during a firmware update before the "Update done" message appears, but this has no effect on the update itself.

If this SC appears, wait at least five minutes and then turn the main power OFF/ON. After this,

- If the machine boots up normally, make sure the firmware is **v1.xx** and its part number is **D1545747x**.
UserTools => System Settings => Administrators => Firmware version
- If "**Please Wait**" is displayed but does not clear after a while, turn the main power OFF, reinsert the update SD card, and then turn the main power back ON.

Note: This is because the update itself may have failed. Also, the update will start automatically after the power is turned back ON.

SYMPTOM

Accounting counter SP5045-002 is falsely rewritten as "0: meters" when devices are connected to @Remote center via Embedded @Remote to update the certificate information. This causes a discrepancy between the customer's service contract and the accounting counter setting.

The problem may occur in either of the following conditions:

- When initially setting up the embedded @Remote
- When re-attempting to approve @Remote application after failing to connect to @Remote (* This condition applies only to MPCW2200.)

Example: Click charge contract in “5: square feet”

Correct status (before SP5045-002 is falsely rewritten in meters)

B&W Total counter indicates the total print volume of the month as 1085 square feet.

Incorrect status (after SP5045-002 is falsely rewritten in meters)

The B&W Total counter unit indicates the total print volume of the month as 129 meters.

Click worth 956 square feet (1085-129) is not charged to your customer. This is because data sent from @Remote disregards unit of measure.

| | Correct status (Square feet) | Incorrect status (Meters) |
|----------------------------|---------------------------------|------------------------------|
| On the operation panel | 1085 square feet | 129 meters |
| Click data sent by @Remote | 1085 | 129 |
