For Users of this Printer
<u>\<Concerning Limitations of IEEE802.1X Authentication Function\></u>

Thank you for purchasing this printer.

The operating instructions for this printer contain errors concerning the IEEE802.1X authentication function.

Refer to the following in place of the information presented in the original operating instructions.

■ **Error:**

Manual	Chapter	Topic
Security Reference	Enhanced Network Security	Configuring IEEE 802.1X Authentication for Ethernet > Specifying IEEE 802.1X Authentication for the Printing Network
Network and System Settings Guide	Printer Settings	Interface Settings > IEEE 802.1X
	Connecting the Machine	Using Utilities to Make Network Settings > Interface Settings (Printer)
Printer Reference	Printer Features	Administrator Configuration > Interface Settings
	Enhancing Printer Security	Using IEEE 802.1X Authentication

■ **Correction:** <u>**The IEEE802.1X authentication functions cannot be used on printing networks.**</u>

The functions will appear on the printer's control panel and Web Interface, but cannot be specified when the printer is operating on a printing network.

For this reason, "Disable" is normally shown in the print setting values list .
