Introduction

This manual contains detailed instructions and notes on the operation and use of this machine. For your safety and benefit, read this manual carefully before using the machine. Keep this manual in a handy place for quick reference.

How to Read This Manual

Symbols

This manual uses the following symbols:

Important

Indicates points to pay attention to when using the machine, and explanations of likely causes of paper misfeeds, damage to originals, or loss of data. Be sure to read these explanations.

Note

Indicates supplementary explanations of the machine's functions, and instructions on resolving user errors.

Reference

This symbol is located at the end of sections. It indicates where you can find further relevant information.

[]

Indicates the names of keys on the machine's display or control panels.

Disclaimer

Contents of this manual are subject to change without prior notice.

In no event will the company be liable for direct, indirect, special, incidental, or consequential damages as a result of handling or operating the machine.

Notes

The manufacturer shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts from the manufacturer with your office products.

For good output quality, the manufacturer recommends that you use genuine toner from the manufacturer.

Some illustrations in this manual might be slightly different from the machine.

Certain options might not be available in some countries. For details, please contact your local dealer.

Depending on which country you are in, certain units may be optional. For details, please contact your local dealer.

Manuals for This Machine

The following manuals are for skilled operators only.

Adjustment Item Menu Guide

This manual explains the items in [Adjustment Settings for Operators] and the advanced settings for custom paper adjustment in "Advanced Settings".

Replacement Guide

This manual explains how to replace the machine's components.

Troubleshooting

This manual explains how to troubleshoot problems related to image quality, paper delivery, and other aspects of machine operation.

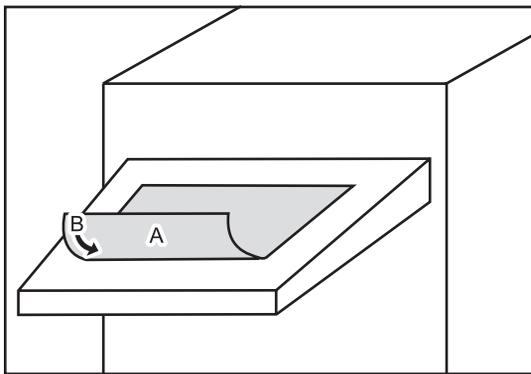

Paper Feed Direction of Printed Copies (Side 1/Side 2)

Depending on the setting, printed copies are fed as follows:

Side 1 is the surface of the paper printed during one-sided printing, or the surface of the first print during duplex printing.

Side 2 is the surface of the paper printed on the back side of Side 1 during duplex printing.

1. Adjustment Settings for Operators

Accessing Adjustment Settings for Operators

1

1. Press "Login/Logout" (👤) on the top right of the screen.

The name that appears lower the "Login/Logout" icon (👤) depends on the type of administrator logging in.

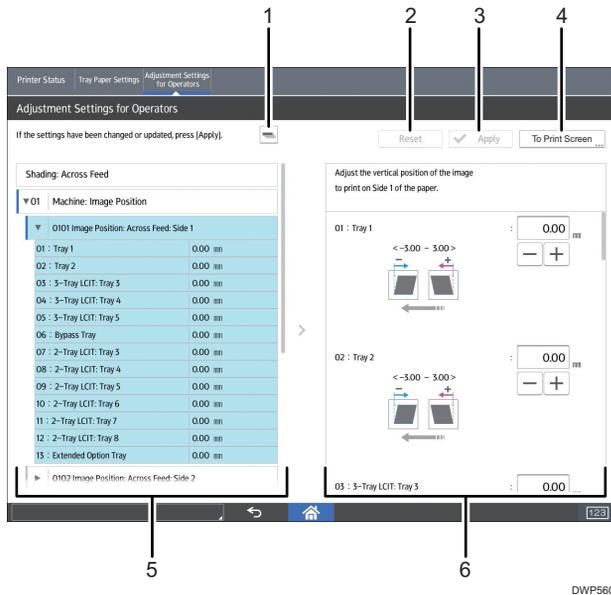

2. Enter your login user name and password, and then press [Login].

If you are logging on as the administrator for the first time, enter "admin" in User Name.

3. Press [Adjustment Settings for Operators] at the upper left of the screen.

Layout of Adjustment Settings for Operators

This section explains how to use Adjustment Settings for Operators.

1. 

Press this key to collapse the hierarchical display of the adjustment items and display the group names of those items.

2. **[Reset]**

Press this key to reset the settings/modifications currently configured. You cannot reset the settings/modifications after pressing **[Apply]**.

3. **[Apply]**

Press this key to apply the settings/modifications.

4. **[To Print Screen]**

Press this key to display the print screen. You can use this screen to view the changes you have made.

5. **Adjustment items**

Adjustment items are displayed in this area. When you select an item, its configuration screen will then open.

6. **Configuration screen**

Configure or modify the settings of the adjustment item you select.

Features of the Displayed Items and Setting Operations

The following operations are available for each adjustment item:

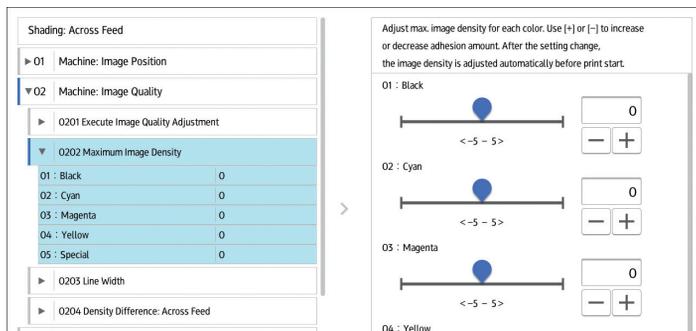

- Value setting
- Item setting
- Executing
- Display only

Value setting

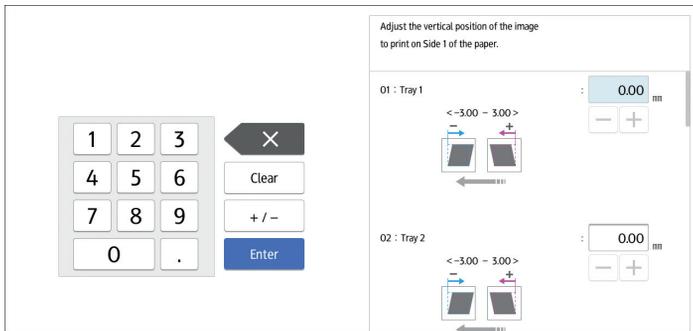

Press **[+]** or **[-]** to increase or decrease the value respectively, or use the numeric keypad to enter the value.

For some settings, move the slider right or left to increase or decrease the setting value.

A numeric keypad appears to the left when you press the input box. Use the keypad to enter a value.

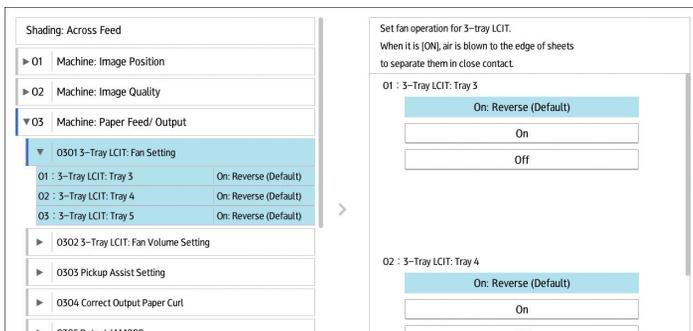

- [X]: Press to delete the entered value character by character.
- [Clear]: Clear the entered value.
- [+/-]: Change the sign of the entered value from + (positive) to - (negative) and vice versa.
- [Enter]: Confirm the entered value.

For some items, you can select a value from the pull-down list that appears when you press the input box. Select a value from the list.

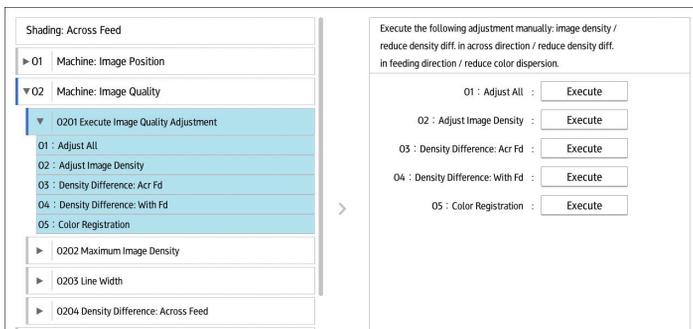

Item setting

Select the item you require.

Executing

Press [Execute] to perform a selected function.

Display only

You can check the setting of the selected item.

Notes on How Adjustment Settings Are Applied to Printed Copies

1

The adjustment settings are applied to printed copies according to the settings specified for each paper tray, paper size, and paper weight.

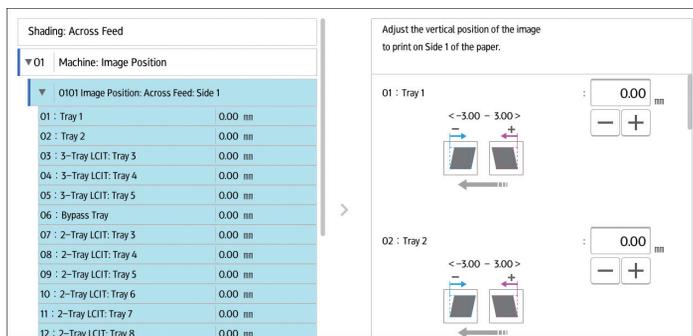

Depending on the adjustment setting, the same settings specified under different categories may be applied to printed copies concurrently.

- Settings for each paper tray
- Settings for each paper weight
- Settings for each paper size

Settings for each paper tray

These adjustment settings can be specified for each paper tray.

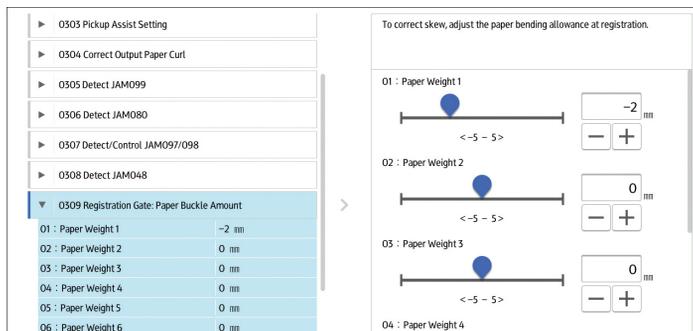

The settings are applied only to printed copies fed from each paper tray.

Settings for each paper weight

These adjustment settings can be specified for each paper weight.

The settings are applied only to printed copies of each paper weight ^{*1}.

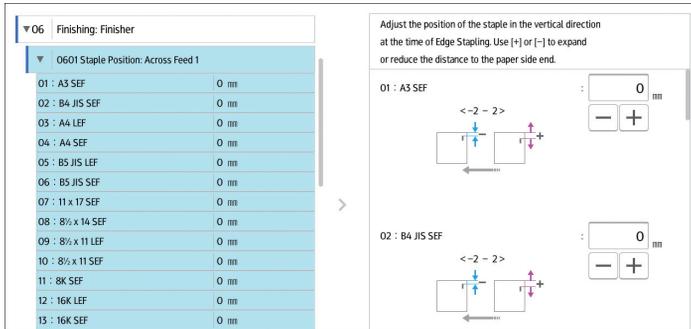

*1 This appears as [Paper Thickness] in "Tray Paper Settings".

Settings for each paper size

These adjustment settings can be specified for each paper size.

The settings are applied only to printed copies of each paper size.

Note

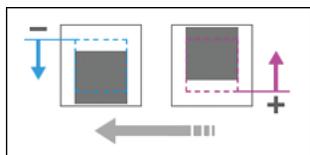

- For information about the paper tray, paper thickness, and tray paper size settings that can be specified for a particular function, see the manual for the relevant function.
- In "Advanced Settings" for custom paper, there are settings identical to those in Adjustment Settings for Operators. When printing is performed from a tray to which the custom paper setting is allocated, the setting in "Advanced Settings" for the custom paper is applied instead of the setting in Adjustment Settings for Operators.

2. Details of Menu Items in Adjustment Settings for Operators

[Machine: Image Position]

0101 [Image Position: Across Feed: Side 1]/0102 [Image Position: Across Feed: Side 2]

Adjust the vertical position of the image to print on Side 1/2 of the paper.

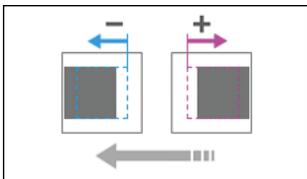

↓ Note

- Depending on the setup, the print side (Side 1/Side 2) with respect to the delivery and paper feed directions may vary. For details, see page 10 "Paper Feed Direction of Printed Copies (Side 1/Side 2)"
- This setting is not effective for paper fed from paper trays with custom paper presets. For such paper, the value specified in [Across Feed] in [Image Position: Side 1]/[Image Position: Side 2] in 1101 [Image Position] in "Advanced Settings" takes precedence.

Setting Items	Default Value	Max. Value	Min. Value	Step	Unit

[Extended Option Tray]					

0103 [Image Position: With Feed: Side 1]/0104 [Image Position: With Feed: Side 2]

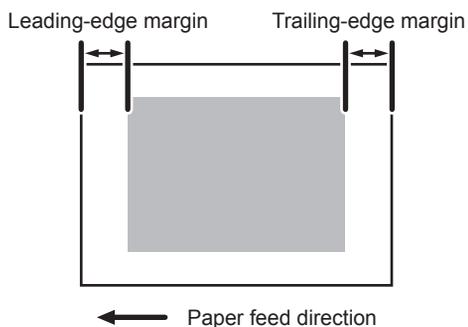

Adjust the horizontal position of the image to print on Side 1/2 of the paper.

Note

- Depending on the setup, the print side (Side 1/Side 2) with respect to the delivery and paper feed directions may vary. For details, see page 10 "Paper Feed Direction of Printed Copies (Side 1/ Side 2)"
- If the leading-edge margin on Side 1 of the paper is too narrow, paper jams may occur.

- If the trailing-edge margin on Side 1 of the paper is too narrow, paper jams may occur when printing on the back side of paper during duplex printing.

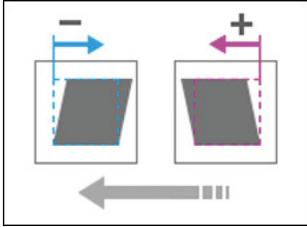

CEZ586

- This setting is not effective for paper fed from paper trays with custom paper presets. For such paper, the value specified in [With Feed] in [Image Position: Side 1]/[Image Position: Side 2] in 1101 [Image Position] in "Advanced Settings" takes precedence.

Correct the perpendicularity of image.

2

Setting Item	Default Value	Max. Value	Min. Value	Step	Unit
[Perpendicularity Adjustment]	0	20	-20	1	None

0106 [Switch Paper Edge Detection Sensor]

Select accuracy of paper edge detection sensor to correct image position in feeding direction. [High Accuracy] makes max. accuracy. Select [Normal] if paper jam occurs due to registration gap.

Setting Items	Values	Default Vaule
[Tray 1]	[Normal]	[Normal]

[Machine: Image Quality]

0201 [Execute Image Quality Adjustment]

2

Execute the following adjustment manually: image density / reduce density diff. in across direction / reduce density diff. in feeding direction / reduce color dispersion.

Setting Items	Remarks
[Adjust Image Density]	Press [Execute].
[Density Difference: With Fd]	
[Color Registration]	

0202 [Maximum Image Density]

Adjust max. image density for each color. Use [+] or [-] to increase or decrease adhesion amount. After the setting change, the image density is adjusted automatically before print start.

Setting Items	Default Value	Max. Value	Min. Value	Step	Unit
[Black]	0	5	-5	1	None
[Cyan]					
[Magenta]					
[Yellow]					
[Special] ^{*1}					

*1 This function is available for Pro C7200X, Pro C7210X, Pro C7200SX, and Pro C7210SX.

0203 [Line Width]

Adjust laser beam for image data writing. Halftone dot and fine line becomes thicker when laser beam increases. After setting change, image density is adjusted automatically before print start.

Setting Items	Default Value	Max. Value	Min. Value	Step	Unit
[Black]	0	5	-5	1	None
[Cyan]					
[Magenta]					
[Yellow]					
[Special] ^{*1}					

*1 This function is available for Pro C7200X, Pro C7210X, Pro C7200SX, and Pro C7210SX.

0204 [Density Difference: Across Feed]

Adjust the image density difference in the vertical direction. Use [+] or [-] to increase or decrease the density of lower part of image.

↓ Note

- Depending on the machine's other settings, this setting may have no effect.

Setting Items	Default Value	Max. Value	Min. Value	Step	Unit
[Black]	0	10	-10	1	None
[Cyan]					
[Magenta]					
[Yellow]					
[Special] ^{*1}

[Machine: Paper Feed/ Output]

0301 [3-Tray LCIT: Fan Setting]

Set fan operation for 3-tray LCIT. When it is [ON], air is blown to the edge of sheets to separate them in close contact.

2

Setting Items	Values	Default Value
[3-Tray LCIT: Tray 3]	[Auto Select]	[Auto Select]
[3-Tray LCIT: Tray 4]	[On]	
[3-Tray LCIT: Tray 5]	[Off]	

0302 [3-Tray LCIT: Fan Volume Setting]

Adjust the fan volume for 3-tray LCIT to separate sheets in close contact. Use [+] or [-] to increase or decrease the fan volume.

↓ Note

- This setting is not effective for paper fed from paper trays with custom paper presets. For such paper, the value specified in [Fan Level] in 1311 [3-Tray LCIT] in "Advanced Settings" takes precedence.

Setting Items	Default Value	Max. Value	Min. Value	Step	Unit

[3-Tray LCIT: Tray 4]					
[3-Tray LCIT: Tray 5]					

0303 [Pickup Assist Setting]

Set the operation of the Paper Feed Roller. By setting it [ON], the contact time of Paper Feed Roller becomes longer and it makes paper feeding easier.

Note

- This setting is not effective for paper fed from paper trays with custom paper presets. For such paper, the value specified in [Pickup Assist] in 1 3 1 2 [Main/3-Tray LCIT/Bypass] in "Advanced Settings" takes precedence.

[Setting]	[Paper Weight 1] [Paper Weight 2] [Paper Weight 3-8]	[Paper Weight 1]

0614 [Exit Guide Close Timing]

Set the timing to close the Paper Exit Guide. The proper timing for the paper in use prevents the deflection of the staple bundle at the time of ejection.

Setting Item	Selection	Default Value
[Setting]	[Default] [Thin Paper]	[Default]

0615 [Output Trail Edge Press Setting]

Set whether or not to hold the trailing edge of sheets when ejected on the Shift Tray. Setting it [ON] reduces the diversion of sheets due to the paper type and paper condition.

Setting Item	Selection	Default Value
[Setting]	[Auto] [On] [Off]	[Auto]

0616 [Output Fan Setting]

Set the fan operation to the sheets on the shift tray. Air blowing peels off the sheets in close contact.

Setting Item	Selection	Default Value
[Setting]	[Auto] [On] [Off]	[Auto]

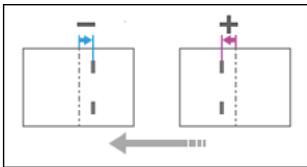

0617 [Output Fan Level]

0718 [Folding Unit Tray Full Detection]

Set whether to detect if Folder Tray is full of output sheets. By setting to [On], it continues printing up to [Number of Sheets Folded after Full Detection], then shows a message.

Setting Item	Values	Default Value
[Setting]	[On] [Off]	[On]

0719 [Number of Sheets Folded after Full Detection]

Set number of sheets which activates message Folding Tray is full. Setting a large number delays message and raises productivity, but may cause disarrayed stack of output sheets and paper jam.

↓ Note

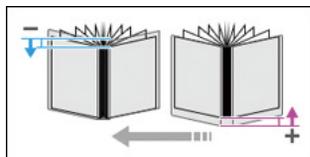

- If the display of the warning message is delayed, the paper delivered to the folding unit tray may not be stacked properly or the delivered paper may block the paper exit and cause subsequent paper to be misfed.

[Density Difference Printing: Across Feed]

To reduce vertical image density differences, load 18 sheets of paper with a minimum of 279 mm/420 mm long in the tray.

Perform this adjustment only if the image density difference across the feed direction are noticeable when:

- Replacing the photoconductor unit or charger unit
- Changing 0520 [Special Toner Position] from [Print Special Toner First] to [Print Special Toner Last]

1. Make sure you have at least 18 sheets of A3 or larger paper.

Paper of the following attributes is supported:

- Size: regular-size paper of 279.4-330.2 mm wide and 420-487.68 mm long (banner sheets are not supported.)
- Paper type:

	Basis weight	Smoothness	Whiteness
Coated: Glossy	73.3-250 g/m ²	8,000 sec or less	82-95%
Coated: Matte			
Plain Paper	100-209.3 g/m ²	50 sec or more	

2. Load paper into all paper trays except Tray 1.

3. Press [Density Difference Printing: Across Feed].

The machine prints 16 image-adjustment sheets.

At the same time, the TIM-Mag unit scans the adjustment images and calculates the laser intensity adjustment value.

4. After two image-adjustment sheets are printed, press [Apply].

If you do not apply the adjustment value, press [Stop].

↓ Note

- It is not required to perform this adjustment every time you change paper.
- Performing this adjustment repeatedly will not remove image density differences. Perform this only once when image density differences are noticeable.
- If black streaks appear after this adjustment is performed, clean the surface of the TIM-Mag unit exposure glass and the shading correction plate of the revolver. For details, see "Cleaning the TIM-Mag Unit", Maintenance and Management.
- This function is unavailable when 0520 [Special Toner Position] is set to [Print Special Toner First].
- This function does not support special colors.

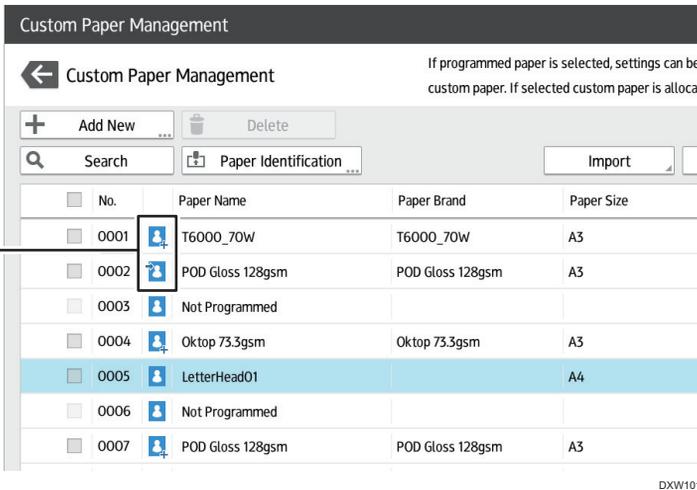

3. Custom Paper Settings for Administrators

Accessing Advanced Settings

1. Press "Login/Logout" () on the top right of the screen.
The name that appears lower the "Login/Logout" icon depends on the type of administrator logging in.
2. Enter your login user name and password, and then press [Login].
If you are logging on as the administrator for the first time, enter "admin".
3. Press [Tray Paper Settings] at the upper left of the screen.
4. Press [CustomPaper Management].
5. Select the program number of the custom paper profile you wish to adjust.
6. Press edit  icon.
7. Press [Advanced Settings].
The advanced settings for custom paper adjustment appear.

Description of Paper Icons

You can check the custom paper status by checking the paper icon in the [CustomPaper Management] screen. If you change the custom paper profile in the advanced settings, the paper icon changes as follows:

1. Paper icon

	Adjusted	Custom paper profile changed from the default setting in the advanced settings
	Not adjusted	Custom paper profile set to the default setting in the advanced settings

↓ Note

- If you specify a custom paper profile in the [CustomPaper Management] screen without registering it from the paper library, the paper icon will not appear for that custom paper profile.
- If you change the custom paper profile from the default setting in the advanced settings, and then change the setting back to the default again, the paper icon will remain as "Adjusted".

Deleting Saved Custom Paper Profiles

Only the machine administrator can delete the custom paper profile saved in the paper library.

1. Press "Login/Logout" () on the top right of the screen.

The name that appears lower the "Login/Logout" icon depends on the type of administrator logging in.

2. Enter your login user name and password, and then press [Login].

If you are logging on as the administrator for the first time, enter "admin".

3. Press [Tray Paper Settings] at the upper left of the screen.

4. Press [CustomPaper Management].

5. Select the program number of the custom paper profile you wish to delete.

If the custom paper you want to select is not displayed, scroll through the screen until the desired item is displayed.

6. Press [Delete].

7. Press [OK].

The custom paper profile is deleted.

8. Press [].

9. Press the [Home] () icon at the center bottom of the screen.

Backing up and Restoring Custom Paper Profiles

Backing up Custom Paper Profiles Registered Under the [CustomPaper Management] Setting

3

The machine administrator can save all types of registered custom paper to the paper library in an SD card at one time.

Backing up the Data

1. Press [Tray Paper Settings] in the upper left corner of the screen.
2. Press [CustomPaper Management].
3. Insert an SD card into the media slot.
For details about using an SD card, see "Inserting an SD Card", Preparation.
4. Press [Export].
5. Press [OK].
6. Press [Exit].
7. Press [].
8. Press the [Home] () icon at the center bottom of the screen.

Restoring the Data

1. Press [Tray Paper Settings] in the upper left corner of the screen.
2. Press [CustomPaper Management].
3. Insert the SD card containing the backup custom paper profiles into the SD card slot on the side of the control panel.
4. Press [Import] and select [From SD Card] from the dropdown menu.
5. Select the name of the paper that you want to register.

Select an item by selecting its check box.

If the paper you want to select is not displayed, use [Jump to Row], or scroll through the screen until the desired item is displayed.

You can select two or more types of paper.

6. Press [Import].
7. Press [OK].
8. Press [Exit].

9. Press [.

10. Press the [Home] () icon at the center bottom of the screen.

 **Note**

- Up to 1,000 custom papers can be saved in the library.
- Each saved custom paper is assigned a sequential number from 0001. New data overwrites existing data if both the paper names and paper size settings are the same.

Backing up and Restoring Custom Paper Profiles Using the External Controller's Control Panel

3

Using the external controller's control panel, you can back up and restore custom paper profiles associated with the external controller's paper catalog data. For details, see the external controller's instruction manual.

Paper Presets in "Advanced Settings"

In "Advanced Settings", there are paper presets for various types of commercially-available paper. Even if you select a paper preset corresponding to a commercially-available paper from the Paper Library and register it in the [CustomPaper Management] screen, the preset, depending on the custom paper profile version, may not be an exact match for the actual paper.

Displaying the Paper Profile Version

3

This section explains how to display the version of the custom paper profiles registered in the [CustomPaper Management] screen. For details about updating paper profiles, contact your service representative.

1. Press "Login/Logout" (👤) on the top right of the screen.
The name that appears lower the "Login/Logout" icon depends on the type of administrator logging in.
2. Enter your login user name and password, and then press [Login].
If you are logging on as the administrator for the first time, enter "admin".
3. Press [Tray Paper Settings] at the upper left of the screen.
4. Press [CustomPaper Management].
5. Select the program number of a custom paper profile to display the product name of the supported paper type and the paper profile version.
6. Press edit (✎) icon.
7. Press [Paper Brand].

The screenshot shows the 'Custom Paper Management' interface. At the top, there is a title bar with 'Custom Paper Management' and a subtitle 'If the settings have been changed or updated, press [Save Paper]'. Below this, there are two buttons: 'Check / Change Settings' and 'Save Paper'. The main area is divided into two sections. On the left, there is a table with the following data:

Paper Brand	Oktop 73.3gsm
Manufacturer	Oji Seishi
Paper Name	Oktop 73.3gsm
Paper Size	A3
Paper Weight	63.1 - 80.0 gsm
Paper Thickness	-
Paper Type	Plain Paper

On the right, there is an 'Advanced Settings' section with a 'Check the paper brand.' label and a text area displaying 'Oktop 73.3gsm Ver. 0'.

The product name of the supported paper type and the paper profile version appear.

01: Correction Mode	[1: U Curl Correction Level: Off] [2: U Curl Correction Level: Small] [3: U Curl Correction Level: Large] [4: Π Curl Correction Level: Off] [5: Π Curl Correction Level: Small] [6: Π Curl Correction Level: Large]

[Speed Adjustment]

Adjust the decurler speed according to the selected correction mode in Correct Paper Curl.

Setting Item	Max. Value	Min. Value	Step	Unit
02: Decurler: Correction Off/03: Decurler: Correction Weak/04: Decurler: Correction Strong	7.5	-1.0	0.5	%

1331 [Jam Detection]

4

[JAM080/097/098/099]

Turn on/off detect function for the following jam. J080(gap: feed)/J097(gap: across)/J098(skew)/J099(double feed) Correction for image position gap with across & skew are also turned on/off.

Setting Item	Values
01: Detect JAM080/02: Detect/Ctrl JAM097/098/03: Detect JAM099	[Off] [On]

[JAM097/098 Detect Threshold]

Set the threshold value which will determine whether a jam has occurred for JAM097 (image position gap with across feed) and JAM098 (skew).

Setting Item	Max. Value	Min. Value	Step	Unit
04: JAM097	10.0	0.0	0.1	mm
05: JAM098	7.5	1.6	0.1	mm

[Paper Edge Detection]

Set the illumination level of the image sensor for Image Position Feedback Correction: Gap with Across Feed and Skew Correction.

Setting Item	Max. Value	Min. Value	Step	Unit
06: Setting	5	1	1	None

[Registration Gate Home Position]

Adjust optimum value to increase the accuracy of Skew Correction depending on paper weight. If the image is highly skewed, adjust the value to [+] direction for thin paper, [-] direction for thick paper.

Setting Item	Max. Value	Min. Value	Step	Unit
07: Setting	8	8	1	None

1341 [Motor Speed]

[Speed Adjustment]

Adjust the speed of each motor.

Setting Item	Max. Value	Min. Value	Step	Unit
01: Transfer Timing Roller	3.00	-3.00	0.01	%
02: Paper Transfer Roller	1.50	-1.50	0.01	%
03: Trans-Fusing Transfer Belt	5.0	-5.0	0.1	%
04: Fusing Belt	10.0	-10.0	0.1	%
05: Cooling Roller After Fusing/06: Paper Output: Diversion Roller/07: Paper Output: Diversion Roller	5.0	-5.0	0.1	%
08: Switchback: Entrance Roller/09: Switchback: Exit Roller	3.0	-3.0	0.1	%
