Please read additional information for DataOverwriteSecurity Unit

◆ *Security Reference*

Before using any of the functions of the DataOverwriteSecurity Unit, read the following "Conditions for Use" together with "Deleting Data on the Hard Disk" in Security Reference.

Conditions for Use

Operating Environment

• The machine is used in its normal state (i.e. it is neither damaged, modified nor are there missing components).
• The machine is managed by an administrator who has carefully read and understood this manual, and can ensure the safe and effective use of this machine by general users.

⬇ Note

• Customer engineers dispatched from the manufacturer and its affiliated companies are trained in the maintenance of this machine.

Instructions for Use

• Before turning off the main power of the machine, always make sure that the Data Overwrite icon has turned to "Clear".
• If the machine enters Energy Saver mode when overwriting is in progress, press the [Energy Saver] key to revive the display in order to check the icon.
• The machine will not enter Low Power mode or Off mode (Sleep mode) until overwriting has beencompleted.
• Should the Data Overwrite icon continue to be "Dirty" even after you have made sure that there is no data to be overwritten, turn off the main power of your machine. Turn it on again and see if the icon changes to "Clear". If it does not, contact your sales or service representative.
