

PostScript 3 Installation Guide

This manual describes how to install the PostScript 3 driver to use this machine.

Installing the PostScript 3 Printer Driver

Installing the printer driver when using the USB connection

Follow the procedure below to install the printer driver when using the USB connection.

Important

- ☐ The PostScript 3 printer driver is supported by the following operating systems: Windows 2000/XP/Vista and Windows Server 2003/2003 R2/2008, and Mac OS X
- ☐ Before installing the PostScript 3 printer driver, you must first install both the PCL6 driver and TWAIN driver using **[USB Quick Install]**.
- ☐ The procedure in this section is an example based on Windows XP. The actual procedure might vary depending on the operating system you are using.

1 Close all applications except this manual.

2 Click **[Browse This CD-ROM]** to specify where the printer driver installer is stored.

If the CD-ROM drive letter is D, the source files of the PostScript 3 printer driver will be stored in the following location:

D:\DRIVERS\PS\XP_VISTA\ (Language) \DISK1

3 Double-click **SETUP.EXE**.

The Add Printer Wizard starts.

4 Click **[Next]**.

5 Click **[Local printer attached to this computer]**, and then click **[Next]**.

6 Select **[Use the following port]** and **[USB 001 (Virtual Printer Port for USB)]**, and then click **[Next]**.

The number after “USB” varies depending on the number of printers connected.

7 Check that the machine model you want to install appears in the list and is selected, and then click **[Next]**.

8 Change the name if you want, select the **[Yes]** check box to use this machine as the default printer, and then click **[Next]**.

9 Specify whether or not to share the machine, and then click **[Next]**.

10 Specify whether or not to print a test page, and then click **[Next]**.

11 When the message informing you that the installation was successfully completed appears, click **[Finish]**.

Installing the printer driver when using the network connection

Follow the procedure below to install the printer driver when using the network connection.

Important

- ☐ Before beginning this procedure, you must assign the IP address on the machine. For details about setting the machine's IP address, see User Guide.
- ☐ The procedure in this section is based on Windows XP as an example. The actual procedure might vary depending on the operating system you are using.

1 Close all applications except this manual.

2 Click **[Browse This CD-ROM]** to specify the location where the installer of the printer driver is stored.

If the CD-ROM drive letter is D, the source files of the PostScript printer driver are stored in the following location:

D:\DRIVERS\PS\XP_VISTA\ (Language) \DISK1

3 Double-click **SETUP.EXE**.

The Add Printer Wizard starts.

4 Click **[Next]**.

5 Click **[Local printer attached to this computer]**, and then click **[Next]**.

6 Click **[Create a new port]**.

7 Click **[Standard TCP/IP Port]**, and then click **[Next]**.

8 Click **[Next]**.

9 Enter the machine's IP address in the **[Printer Name or IP Address]** box, and then click **[Next]**.

10 Click **[Finish]**.

11 Check that the name of the machine whose driver you want to install is selected, and then click **[Next]**.

12 Change the name if you want, select the **[Yes]** check box to use this machine as the default printer, and then click **[Next]**.

13 Specify whether or not to share this machine, and then click **[Next]**.

14 Specify whether or not to print a test page, and then click **[Next]**.

15 Click **[Finish]**.
