

# Using Smart Organizing Monitor Lt

---

Thank you for purchasing this product.

Below is an overview of Smart Organizing Monitor Lt, which can be used with this product.

## Notes:

- In this manual, we explain how to install, launch, and uninstall Smart Organizing Monitor Lt.
- This manual uses procedures based on Windows 7, and Mac OS X 10.6 as an example, unless otherwise specified. Procedures might vary depending on the operating system you are using.

## Smart Organizing Monitor Lt

Smart Organizing Monitor Lt is a useful tool that allows users to check the machine's status from a computer.

### ★ Important

- Before using Smart Organizing Monitor Lt, check the firmware version of the machine. This software can work with version 2.0.0 or later. If the version of the firmware you are using is earlier, you need to update the firmware first. You can download the firmware update package from our Web site.  
You can check the firmware version of this machine using the system setting list or Web Image Monitor. To print the system setting list, see “*Hardware Guide*” on the CD-ROM provided with this machine. To use Web Image Monitor, see “*Software Guide*” on the CD-ROM provided with this machine.
- Before using Smart Organizing Monitor Lt, install its printer driver. To install the printer driver, see “*Software Guide*” on the CD-ROM provided with this machine.
- If you specify a USB port to install the printer driver, you need to enable bi-directional communication between this machine and the driver. For details about bi-directional communication, see “*Software Guide*” on the CD-ROM provided with this machine.

---

## What you can do with Smart Organizing Monitor Lt

---

### ◆ Check the machine's status.

You can check the machine's status, such as the amount of remaining toner, setting details of each paper tray, etc.

### ◆ Send error or warning messages when an error occurs on the machine.

If an error or malfunction occurs on the machine while Smart Organizing Monitor Lt is running, a pop-up window appears on the screen of your computer. This pop-up window contains a message about an error or malfunction. This message appears on the screen a few seconds after an error or malfunction occurs.

---
