Correct

• EnergySaverMode 2

The machine enters Energy Saver mode 2 after the period of time specified for this setting is passed. The machine consumes less power in Energy Saver mode 2 than in Energy Saver mode 1, but it takes longer to recover from Energy Saver mode 2 than from Energy Saver mode 1. Default: [On] **(10.1 minutes) Operation panel LCD will display 10minutes**

Saving Energy

This machine is equipped with the following Energy Saver modes: Energy Saver mode 1 and Energy Saver mode 2. In Energy Saver mode, the machine's power consumption is reduced from its normal state.

By default, this machine is set to enter Energy Saver mode 1 if it has been idle for 30 seconds. If another **10.1** minutes pass, the machine will then enter Energy Saver mode 2. The machine takes about 10 seconds to recover from Energy Saver mode 1, and about 30 seconds to recover from Energy Saver mode 2.

According to your convenience, you can change how long the machine waits before entering Energy Saver mode 2 by configuring [Energy Saver Mode] under [Admin. Tools].
