[Modifications made:] Rank C

Symptom corrected:

- When the paper size is set to DL envelope or Custom paper on the device, it is not correctly reflected in the MIB value.
- The HTTP server responds with the wrong code, and the request from the Smart Device Connector, such as writing to the NFC card, might fail.
- Fail to add IPP printer in Server 2016.

[Modification history]		
Varian 1 00		

Version 1.09

Fixed:

- A Smart Device might fail to read a QR code.
- The device might not be detected by the MacOS ICA driver.

Other Changes:

- AirPrint function supported
- Support for Google Cloud Print.

[Modifications made:] Rank C Symptom corrected: - The machine might not be able to wake up from energy-saving mode. - If the machine loses power multiple times while receiving and printing a fax, the first page of the fax cannot be printed. [Modification history] _____ Version 1.13 Rank C Symptom corrected: - When the paper size is set to DL envelope or Custom paper on the device, it is not correctly reflected in the MIB value. - The HTTP server responds with the wrong code, and the request from the Smart Device Connector, such as writing to the NFC card, might fail. - Fail to add IPP printer in Server 2016. - The body of the e-mail might be garbled, and PDF files might fail to be attached when sending through some mailers. The AL-Mail32 mailer is currently the only reported affected mailer. Version 1.11 Rank C Symptom corrected: - The "Flash Diagnostic Failed" message is displayed and the machine freezes. Other changes: - The Scan to Folder function is available on Mac OS X 10.13 by supporting SMB signing. Version 1.10 Rank C Symptom corrected: The machine might not fax the correct document if all of the conditions below are met: - The setting to forward received faxes to a PC folder is ON. - The Auto-Print setting for received faxes is OFF. - In a very busy network environment, the customer unplugs the

Version 1.09

Fixed:

- A Smart Device might fail to read a QR code.

machine immediately after receiving a fax.

- The device might not be detected by the MacOS ICA driver.

Other Changes:

- AirPrint function supported
- SP4-100-001(Pickup roller rotation time) has been added. Change the setting from "0" to "1" to reduce the time that the ADF pickup roller rotates and makes noise.
- Support for Google Cloud Print.

[Modifications made:] Rank C
Symptom corrected:The machine might not be able to wake up from energy-saving mode.If the machine loses power multiple times while receiving and printing a fax, the first page of the fax cannot be printed.
[Modification history]
Version 1.15 Rank C
 Symptom corrected: When the paper size is set to DL envelope or Custom paper on the device, it is not correctly reflected in the MIB value. The HTTP server responds with the wrong code, and the request from the Smart Device Connector, such as writing to the NFC card, might fail. The device might stall during printing if TrueType Font is used. The body of the e-mail might be garbled, and PDF files might fail to be attached when sending through some mailers. The AL-Mail32 mailer is currently the only reported affected mailer. The watermark might not print as shown in the image preview when using the PCL6 V4 Universal Driver. The center part of an image might be missing when printing with the Raster setting from the PCL6 V4 Universal Driver. When printing a job with a front cover, only the front cover might be printed. The following symptom was corrected to support MacOS 10.14: If the interpolation function (image smoothing) was used in the PS data, images might be missing when printing.
Version 1.13 Rank C
Other changes: - The Scan to Folder function is available on Mac OS X 10.13 by supporting SMB signing.
Version 1.12 Rank C
Symptom corrected: - The machine might freeze after turning the main switch off and on quickly.
Version 1.11 Rank C
Symptom corrected:

The machine might not fax the correct document if all of the conditions below are met: - The setting to forward received faxes to a PC folder is ON. - The Auto-Print setting for received faxes is OFF. - In a very busy network environment, the customer unplugs the machine immediately after receiving a fax. Version 1.10 Fixed: Fail to add IPP printer in Server 2016. Version 1.09 Fixed: - A Smart Device might fail to read a QR code. - The device might not be detected by the MacOS ICA driver. Other Changes: - AirPrint function supported - SP4-100-001(Pickup roller rotation time) has been added. Change the setting from "0" to "1" to reduce the time that the ADF pickup roller rotates and makes noise. - Support for Google Cloud Print.

Version 1.08

Other changes:

- Meet for the certificate standards for PTT in Malaysia.

- New Model Supported.

Version 1.07 1st Mass production
