-Vai	rious Confirmat	ion ———	DO Time Orthin		
			Quit		

Click the "License Check" button and that select "tfpp.lic". If the dialog below show up, the license has been installed properly.

	DongleChecker
<u>^</u>	This is the regular license.Thank you.
	ОК

MEMO

Please ask your contact window if you are not sure the location where the "tfpp.lic" is.

WARNING

To modify or edit the files on the folder which "tfpp.lic" is make license error and also make you possible illegal action.

MEMO

Please contact your sales representative if an error occurs during installation of the license file.

MEMC

If there are multiple connected dongles, select the dongle number to check with the "Cascade" list, and then click the "Dongle Check" button (the dongles are assigned numbers in the order in which they are found). If a dongle for a TotalFlow Simply Prepress Series product was found in any of the numbers, the dongle will be properly recognized.

Major dongle errors

- The dongle could not be found.
 - → Check if the dongle is connected to the computer. The dongle may be damaged when this error is detected, even if the dongle was correctly connected to the computer.
- The dongle driver is not installed.
 - ightarrow The driver for recognizing the dongle has not been installed. The driver must be correctly reinstalled.
- \bigcirc Other errors
 - → First restart the computer. After the computer restarts, start only the "Dongle Checker" application. If the error still occurs, the TotalFlow Simply Prepress system may not have been correctly installed.
 Use the "License Check" button to check compatibility between the installed license file and the dongle. The license file may be corrupt if a problem occurs when the "License Check" button is clicked, even though the dongle was properly recognized.
