Symptoms Corrected	USA
When sending an original wider than the maximum paper width of the receiving machine (Auto-Reduction OFF / JBIG compression), the machine cuts the image to the smaller size but sends the left-most area of the image instead of the central area.	*B*
Even though the following bit switch settings should disable the File Retention function, the machine retains files for 24 hours: *User Parameter switch 24 (swusr_18):* *(bit1, bit0) = (1, 0)*	*B*
When bit 4 of Communication switch 07 is 1 (Fallback from G4 to G3 when G4 communication fails on the ISDN B-channel is enabled) and a G4 communication error occurs on the ISDN B-channel (ADF mode), the machine falls back to G3 and resumes transmission from the second page. This is because the first page has already fed out from the ADF.	*B*
