	<input type="checkbox"/> Other (      )		

DJF modifications and history are as follows.

### Main ROM(A6105820) modification history

Suffix	Description	Cut-in Serial Number
C	This ROM was used from the first production run.	A610-15: A16060001 A610-17: A7146060001 A610-22: AB86060001 A610-26: J90660001
D	To prevent original jams: In the limitless mode, if a new original is fed while the paper trays are being switched, a jam will occur.	Not implemented
E	This version is the same as that of "C". Notes A software change will not prevent original jams in the limitless mode if a new original is fed while the paper trays are being switched. Since the occurrence rate of this problem is extremely low, this is being treated as a product limitation.	A610-15: 6A16120001 A610-17: A7146110001 A610-22: AB87010001 A610-26: 3J90170001
F	Standardization with the Penguin series	A610-15: 6A18030001 A610-17: A714803000 A610-22: AB88030001 A610-26: 3J90680001
G	To prevent the following problems when the 2 in 1 mode is used: ● The machine stops (but the print key remains red) after the job if the number of originals and the number input on the main unit differ. ● After an odd number of originals is used, the image in the next copy job is elongated or a paper jam occurs.	<b>A610-15: 6A18060001</b> <b>A610-17: A7148060001</b> <b>A610-22: AB88060001</b> <b>A610-26: 3J90680001</b>
H	To prevent original non-feed out in European version main frame machines: Due to the difference in the feed-in and feed-out timing for the B6Y size paper, three originals will be set on the exposure glass at the same time as opposed to two.	A610-15: 6A18100001 A610-17: A7148100001 A610-22: AB88100001 A610-26: 3J91080001
