*G9255511 contains the system CD for German/French/Italian/Spanish.

Software Interchangability (User/System)

System Ver.1.01 should be used with User CD Ver.1.01.

Added Features

- Calibration Sets: Up to 9 sets can be stored.
- The PrintByColorSelection feature is added.

Major Corrections

- Color shift, wrong page order and repeated printing occur when printing many pages
- When printing 30 copies of PDF, ColorPrint-shift will occur
- Last page is counted for duplex odd pages
- Command WorkStation configuration shows LCT off when printing with LCT
- Free Form master color will change.
- A5 printed out separately when print as Duplex Alignment.
- Win2000 PPD shows Speed: 60PPM
- Canceling large bitmap files
- PowerPoint printing issues (When printing from a power point file, colors in a graph were sometimes not constant within a page - this has been fixed.)
- Sorter jam issues (Sometimes the sorter jam fails to recover after removing the misfed paper; "BUSY" is displayed in the LCD.)
- The controller does not display an alert when the DF cover is open.
- The first setting of Color Mode at PPD option is CMYK (Changed to "Printers Default".)
- When toner reduction was set to off, it still was indicated as off SEFA5 and/or 12 x 18 is not supported for duplex copying, however, it could be selected for Duplex Alignment. When selecting those paper sizes and print modes, "Load xxx in any tray" appears on the LCD and the user used to cancel the job manually. (This was changed so that the job will be cancelled automatically, in the same way as when selected other non-duplex-supported paper sizes.)
- When canceling a job, the controller may freeze or the LCD display will be strange occasionally.
