User's Manual for MFP

Safety Information

When using this equipment, the following safety precautions should always be followed.

Safety During Operation

In this manual, the following important symbols are used:

MARNING:

Indicates potentially hazardous situations, which if instructions are not followed, could result in death or serious injury.

A CAUTION:

Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.

Important:

Indicates operational requirements and restrictions. Please read and follow these instructions to ensure a proper operation and to avoid damage to the machine.

Note:

Indicates further explanation or clarification. Reading this is highly recommended.

MARNING:

To avoid hazardous electric shock or fire, do not remove any covers or screws other than those specified in this manual.

▲ CAUTION:

- ✓ To reduce the risk of fire, use only no.26AWG or larger telecommunication line cord.
- \checkmark Disconnect the power plug by pulling the plug, not the cable.
- ✓ Do not touch the metal fingers of the ADF pad module. The edges are sharp and touching them may result in injury.

Precautions

- Do not install the equipment near heating or air conditioning units.
- Do not install the equipment in a humid or dusty place.
- Use only the AC adapters (HEG42-240200-7L by Hitron) included with the machine. Using other AC adapters may damage the machine and void the warranty.
- Place the equipment securely on an even, flat surface. Tilted or uneven surfaces may cause mechanical or paper-feeding problems.
- Retain the box and packing materials for shipping purposes.

Notice

Important

- Do not make copies of any item for which copying is prohibited by law.
- Copying the following items are normally prohibited by the local law:
- Bank bills, revenue stamps, bonds, stock certificates, bank drafts, checks, passports, driver's licenses.
- This machine is equipped with a function that prevents making counterfeit bank bills. Due to this, images similar to bank bills may not be copied properly.

Copyrights and Trademarks

Ethernet is a registered trademark of Xerox Corporation.

Microsoft, Windows, Windows NT, Windows XP, and Windows Vista are registered trademarks of Microsoft Corporation in the United States and/or other countries.

Other product names used herein are for identification purposes only and may be trademarks of their respective companies. We disclaim any and all rights to those marks.

The proper names of the Windows operating systems are as follows:

Warranty

The information contained in this document(s) is subject to change without notice.

The manufacturer makes no warranty of any kind with regard to this material, including, but not limited to, the implied warranties of fitness for a particular purpose.

The manufacturer shall not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance, or use of this material.

FCC Radio Frequency Interference Statement

This product has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. The FCC Class B limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult your point of purchase or service representative for additional suggestions.

CE Warning

This product satisfies the Class B limits of EN55022, EN55024 and safety requirements of EN 60950.

1 Getting Started

Introduction

Thank you for purchasing the product, a 4-in-1 MFP. The product offers an unprecedented document delivery technology, transmitting paper documents electronically over the internet. With the product, you can instantly scan paper-based document and deliver the electronic image to various destinations including e-mail addresses, printer, fax machine, ftp servers, web site, or someone else's computer on the network. The new way to distribute documents is faster, more cost effective, and safer than any traditional methods such as mail, or courier.

Features

Digital Copying:

Since the product includes a laser printer, it is able to perform digital copies with outstanding copy quality. With an intuitive control panel and a quality LCD-display, making digital copy becomes fast and easy.

E-mailing:

Connected to an ethernet network and a SMTP server, the product allows you to transmit document(s) to your e-mail as attachment. With a touch of the e-mail key and the selection of your recipients' e-mail addresses, the document(s) is/are first scanned and converted into an image file, and then transmitted to remote recipients within minutes.

Filing (Scan to Folder):

The product allows you to send the scanned documents to a server or a personal computer's file folder over intranet with FTP (File Transfer Protocol), HTTP (Hypertext Transfer Protocol), HTTPS (a secure way of using HTTP), CIFS (Common Internet File System). The scan-to-folder feature off-loads the mail server from handling large attachments.

Faxing:

With the built-in fax modem and an additional telephone line, the product is able to transmit your scanned document to a remote fax machine just like regular fax machine.

Sending Multi-Page Document:

With the Auto Document Feeder, the product allows a stack of 50-page document(s) to be continuously scanned at one time in reliable quality to increase your efficiency.

Managing the Product Remotely:

The product provides a convenient way to manage your e-mail address book, filing destinations (folders), and telephone book remotely. By simply typing the machine's IP address in the URL field of your browser, the product web page will be prompted. This web page allows the administrator to create up to 2000 e-mail addresses, 40 filing destinations, and 200 fax numbers to conveniently deliver the scanned documents to multiple recipients.

External View

The Front View

- 1. Input Paper Tray and Paper Support
- 2. Paper Stopper
- 3. Document Cover
- 4. Handle

- 5. Control Panel
- 6. LCD-display
- 7. ADF Unit

The Connection Ports

1. Line Jack: To connect the product to a "RJ-11" telephone jack provided by the telephone company with a telephone line.

Note: If you wish to use the product as a regular fax machine, you must plug one end of the telephone line to the "Line" jack (the external one) and plug the other end to the "RJ-11" telephone jack with a telephone line.

- 2. Telephone Jack: This telephone jack should be ignored since no handset is provided with the product.
- 3. LAN Port: To connect network with a network cable..
- 4. Printer Port: To connect the printer with a USB cable.
- 5. USB Port: To connect a computer as a USB scanner.
- 6. ADF Port: To connect the ADF unit with an ADF cable.
- 7. 24VDC/2.0A: To connect power with a power cable.
- 8. Power Switch: To turn on and off the machine.

The Control Panel

Part A: LCD Display

Used to display current operation.

Part B: Function Keys:

Used to select a working mode.

Function Keys:

Copy	Press to make copy.
E-mail	Press to send your scanned document to e-mail.
Folder	Press to send your scanned document to a designated server.
Facsimile	Press to send your scanned document to a fax machine.

Part C: The Numeric Keypad:

Used to enter copy quantity, or the fax number.

Part D: Start & Other Keys:

Used to select special requirements or the start key to start sending or copying your document(s).

User Tools	Select to access the user tools to set up the system.
Clear Modes	Select to clear current settings and return to the default settings. Press the button for over 5 seconds to return to the factory default settings.
Energy Saver	Select to enter power saving mode.
●	 The Power LED – Used to indicate power on and ready status. The Alert LED – Used to indicate error. The Sleep LED – Used to indicate power-saving status.
Stop	Select to stop processing.
B&W Start	Select to start copying, e-mailing, filing or faxing in black and white mode.
Color Start	Select to start copying, e-mailing, or filing in color mode.

The product has to be setup properly on your network to perform e-mail and filing functions. Before using the product, please setup the product properly on your network for e-mail and filing function. The following network parameters have to be set.

Important !

Make a copy of the following table and ask your Network Administrator to complete the information.

1.	DHCP Enable:		
2.	IP Address:	•	-
3.	Subnet Mask:		
4.	Gateway IP:	•	-
5.	DNS Server:	•	-
6.	SMTP Server:		
7.	SMTP Port:	25	
8.	POP3 Server:		
9.	POP3 Port:		
10.	LDAP Server:		-
11.	LDAP Port:		

Explanation of contents:

1. * DHCP Enable:	Choose Yes to obtain IP/subnet/gateway addresses automatically from DHCP server.
2. * I P Address:	The Internet Protocol (IP) address assigned to your machine by your network administrator or by DHCP server.
3. Subnet Mask:	The net mask address assigned by your network administrator or by DHCP server.
4. Gateway I P:	The gateway IP address assigned by your network administrator or by DHCP server or by DHCP server.
5. * DNS server:	The IP address of DNS server assigned by your network administrator.
6. * SMTP Server:	The IP address of your SMTP mail server assigned by your network administrator.
7. SMTP Port:	The port number of your SMTP Mail Server.
8. * POP3 Server:	The IP address of your POP3 server.
9. * POP3 Port	The port number of your POP3 server.
10. * LDAP Server:	The IP address of your LDAP server.
11. LDAP Port:	The port number of your LDAP server.

Note:

- DHCP server: With DHCP (Dynamic Host Configuration Protocol), a host can automatically be given a unique IP address each time it connects to a network--making IP address management an easier task for network administrators. If the DHCP server is available from your network, you do not need to enter TCP/IP, subnet mask, gateway, and DNS information. Instead, this information will be automatically given for the product.
- IP Address: An IP (Internet Protocol) address uniquely identifies a host connection to an IP network. System administrator or network designer assigns the IP address. The IP address consists of two parts, one identifying the network and the one identifying your node.

The IP address is usually written as four numbers separated by periods. Each number can be zero to 255. For example, 10.1.30.186 could be an IP address.

- **3.** SMTP: Stands for Simple Mail Transfer Protocol. It is the main communication protocol used to send and receive e-mail on the internet.
- 4. DNS: Stands for Domain Name System. The DNS server identifies hosts via names instead of IP addresses. If the DNS server is available on your network, you can enter the domain name instead of digits for the IP address.
- POP3: POP3 is the latest Post Office Protocol 3, this is a service that stores and serves e-mails for various client machines that are not connected to the Internet 24 hours a day. E-mails are held in POP3 until you log on.
- **6.** LDAP: Stands for Lightweight Directory Access Protocol. LDAP enables users to access directories and address books directly from external networked devices to simplify document distribution.

Internet Communication Features

Scan to E-mail

The product allows you to deliver your scanned document to e-mail addresses on the network. The document is first scanned and converted to a standard PDF, JPEG, TIFF, or MTIF (Multi-page TIFF) file format and then transmitted to remote recipients simultaneously as an e-mail attachment.

When you send an e-mail to someone via the product, the product uses Simple Mail Transfer Protocol (SMTP) to transfer your outgoing e-mails to your SMTP mail server, and then send these e-mails to your recipients through internet.

Through the intranet with FTP (File Transfer Protocol), HTTP (Hypertext Transfer Protocol), HTTPS (a secure way of using HTTP), or CIFS (Common Internet File System), the product allows you to save scanned document directly to a designated server or a personal computer on the network in a standard PDF, JPEG, JPEG_EXIF, TIFF, or MTIFF file format.

CIFS is the sharing system of Microsoft Windows. What's unique about this filing function is to let entire corporate users share one machine to send documents to each desired file folder on a designated server or individual computer.

2 Installing Your Machine

This chapter is specifically targeted to the persons who are responsible for the administration of the product. It is recommended that the administrator read this chapter before installing the machine.

Minimum Configuration Requirements

To make the best use of the product, the following configuration is required:

To send e-mails from the product:

- TCP/IP network
- A SMTP and a optional POP3 server

To file document(s) via intranet

- FTP, HTTP, HTTPS, or CIFS protocol environment
- Windows 98SE, Windows NT, Windows 2000, Windows Me, Windows XP, Windows Vista, HTTP or FTP server

Unlocking the Scan Unit

The scan unit is locked during transport to protect the scanning mechanism from being damaged. *Be sure to unlock the scan unit before using the machine.*

Note:

If you need to move the product for repair or any other reason, be sure to lock the product before moving. To lock the product, please do the following,

- **1.** Turn off the product.
- **2.** If the scan unit is not located at the front of the glass, turn on the product. After the scan unit returns to the front end, turn off the product.
- 3. Move the lock switch to the "Locked Position".

Installing the Input Paper Tray

1. Attach the Paper Support to the Input Paper Tray.

2. Then, attach the Input Paper Tray to the machine.

Installing the Paper Stopper

Attach the Paper Stopper to the slot of the document cover as illustrated below.

- If you are using A4 or letter size paper, pull the lever up to avoid document falling from the MFP to the floor.
- If you are using legal size paper, press down the lever.

Connecting the ADF Cable

Connect the ADF (Auto Document Feeder) cable (attached to the document cover) to the **ADF** port at the back of the product.

Connecting the Ethernet Cable

1. Connect one end of your Ethernet LAN cable to an available port of your Ethernet Hub.

2. Connect the other end to the **LAN** port at the back of the product.

LAN Port

Connecting the Printer Cable

- 1. Connect one end of the printer cable to the printer.
- 2. Connect the other end to the **PRI NTER** port at the rear of the product.

Connecting the Telephone Line

1. Plug one end of the telephone line to the **LINE** jack at the left end of the rear panel.

 Plug the other end of telephone line to the "RJ-11" telephone jack provided by the telephone company.

Connecting the Power and Turning on the Machine

- 1. Press the power switch to the "0" position to turn off the product.
- 2. Connect the small end of the power cable to the power (**24Vdc**/ **2.0A**) jack of the product.

24Vdc/2.0A Jack

- 3. Connect the other end to an appropriate power outlet.
- 4. Press the power switch to the "I" position to turn on the product. After showing the booting up message, the LCD display prompts the preset ready status.

Note:

You can press the **Energy Saver** button on the control panel to switch to the power saving mode. If the product is idle for 15 minutes (default setting), it automatically shuts off the scanning lamp. Press any key except the Power Saving button to return to the ready status.

3 Installing the Printer Driver

Before beginning this chapter, be sure to set up the machine by following the procedures shown in the *Quick Installation Guide*.

Before Installing the Printer Driver

Selecting the Panel Display Language

The default language setting for the printer display panel is English. Omit the following procedure if you want to use English on the panel display.

- 1. Turn on the printer power.
- 2. Press the **Menu** key.

- 3. Press the ▼ or ▲ key to display Language, and then press the # Enter key.
- 4. Press the \checkmark or \blacktriangle key to select the language, and then press the **# Enter** key.
- 5. Press the **Menu** key to return to the initial screen.

Printing the Test Page

You can confirm that the printer works properly by printing a test page (configuration page). However, you cannot check the connection between the printer and your computer by printing the test page.

1. Press the **Menu** key.

- 2. Press the ▼ or ▲ key to display List/ Test Print, and then press the # Enter key.
- 3. Press the ▼ or ▲ key to display **Config.Page**, and then press the **# Enter** key.
- 4. Press the **# Enter** key to return to the initial screen.

Installing the Printer Driver Using Network

- 1. Insert the provided CD-ROM into the CD-ROM drive. If Auto Run starts, click **Cancel**, and then **Exit**.
- 2. Open the **Printers and Faxes** window or **Printers** window.
- 3. Click Add a printer. This will start the Add Printer Wizard, and then click Next.

4. Click Local printer attached to this computer or Local printer, clear the Automatically detect and install my Plug and Play printer check box, and then click Next.

5. Click **Create a new port**, and then select **Standard TCP**/**IP Port** in "Type of port".

d Printer Wizard Select a Printer Port Computers communicate w	ith printers through ports.
Select the port you want yo new port.	ur printer to use. If the port is not listed, you can create a
OUse the following port:	LPT1: (Recommended Printer Port)

8. Click Have Disk....

Add Printer Wizard				
Install Printer Software The manufacturer and model determine which printer software to use.				
Select the manufacturer and model of your printer. If your printer came with an installation disk, click Have Disk. If your printer is not listed, consult your printer documentation for compatible printer software.				
Manufacturer	Printers			
Tell me why driver signing is important < Back				

9. Click **Browse**..., and then specify a location for the printer driver.

If the CD-ROM drive is D, the source files of the printer driver are stored in the following location:

```
RPCS printer driver
D:\DRIVERS\RPCS\WIN2K_XP\(Language)\DISK1
D:\DRIVERS\RPCS\WIN9X_ME\(Language)\DISK1
PCL5E printer driver
D:\DRIVERS\PCL5E\WIN2K_XP\(Language)\DISK1
D:\DRIVERS\PCL6\WIN9X_ME\(Language)\DISK1
D:\DRIVERS\PCL6\WIN2K_XP\(Language)\DISK1
D:\DRIVERS\PCL6\WIN9X_ME\(Language)\DISK1
D:\DRIVERS\PS3\WIN2K_XP\(Language)\DISK1
D:\DRIVERS\PS3\WIN9X_ME\(Language)\DISK1
```

10. Select the Setup Information file for the printer driver you want to install, and then click **Open**.

11. Click **OK**.

12. Follow the on-screen instructions to complete the driver installation.

Note:

When you use the printer under Windows Vista, you have to download the printer driver from the following supplier's web site. Select this printer and the operating system you are using, and then download it.

4 Configuring the Machine

The following settings or destinations must be defined by the system administrator before the product is used to distribute the scanned document on the network.

- Network and E-mail parameters: Defines the parameters for TCP/IP, SMTP, and POP3 protocols to send your scanned document to e-mail addresses.
- Filing Destinations: Defines the protocols and destinations to send your scanned document to FTP servers, web, or any personal computers on the network.

To specify these settings or destinations, the administrator can enter relevant value from the options of **User Tools** on the control panel. In addition to using the control panel, the product allows the administrator to remotely configure the machine by either launching the product's embedded web page (Web Image Monitor) or starting the Network Management Tool provided in the supplied Scanner Driver CD-ROM.

The product's embedded web page (Web Image Monitor) allows the administrator to configure each machine remotely with a web browser while the Network Management Tool allows the administrator to update the product and manage several MFPs on the network. For more information on how to use the product's Network Management Tool, please refer to the online help of the Network Management Tool.

Note:

- ✓ If the system administrator has chosen DHCP, then the IP address of TCP/IP, gateway, subnet mask, and DNS server will be automatically given.
- ✓ When installing the product for the first time, it is recommended that the Administrator retain the default system settings. The settings can be customized at a later date once you are familiar with the operation and functionality.

Specifying the Product's Network Settings

 Turn on the machine. After warming up for a few seconds, the default working mode is prompted on the touch panel. For example, the following Copy mode.

Сору				Copies
Basic	Imag	je Edit Adva	nced Copy	1
Reduce/Enlarg	ge	Paper Tray	Image Density	
<u> </u>	100%	Auto		
<u> </u>	◯ Fit to Page	Paper Size	Copy Mode	
<u> </u>	Variable	A4	Speed	
○ 78%(Lgl->l	Ltr) >Lgl)		Text	
○ 200%	$\mathbf{\nabla}$		Photo	
	Switch			

- User Tools
- 2. Press the **User Tools** button on the control panel. This prompts the following **User Tools** screen.

User Tools		Exit
Information	Network Settings	Copier Default
General	Mail Server	E-Mail Default
Management	Fax Settings	Folder Template
Account Management	Phone Book	Fax Default

3. Touch **Network Settings** to prompt the following **Network Settings** screen.

, in the second s	C	ancel	Ok	
P Address	DHCP Enable			
192.168.1.1	 ON	OFF		
Subnet Mask				
255.255.255.0				
Gateway IP				
192.168.1.254				
DNS Ser∨er				
0.0.0.0				

 Since the default TCP/IP information is incorrect, please enter your own network information via the soft keyboard. Touch anywhere on the IP Address/Subnet Mask/Gateway IP/DNS Server field to bring up the soft keyboard and then enter the relevant value. For example,

- 5. Touch **Return** after completing entering your information to return to the **Network Settings** screen.
- 6. In the **Network Settings** screen, press **OK** to return to the **User Tools** screen.

ser Tools >> Network Settings	Cancel OK	User Tools		
IP Address	DHCP Enable			
10.1.30.222	 ON OFF	Information	Network Settings	Copier Default
Subnet Mask				
255.255.255.0		General	Mail Server	E-Mail Default
Sateway IP				
10.1.30.254		Management	Fax Settings	Folder Template
DNS Server				
10.1.90.1		Account Management	Phone Book	Fax Default

- 1. Specify the network settings on the control panel via the soft keyboard. (Please refer to the preceding section, *Specifying the Product's Network Settings*.
- 2. The product is designed with an embedded web page to allow the system administrator to remotely manage the product. Simply type the IP address of the product in the URL field of your browser and then press **Enter**. The product's web page appears.

3. Click each item on the menu to enter relevant value. For details on each setting, please refer to the subsequent section, *Summary of the User Tools*.

Note:

- ✓ The "Management" item and the "Administrative Settings" menu are blocked by password. Click Login to enter the detailed settings since the machine is shipped with no specific password. You can create a password later and write it in your notes in case you may forget it.
- ✓ For effective management, it is recommended to create administrator's login password later.
- If you wish to return to factory default settings, simply press the Clear Modes button for over 5 seconds. In a second, all the values in the Management and Administrative Settings will be changed to factory default.
- ✓ Please note that some of the settings in the "User Tools" can also be set by users while they are making copies, sending individual mails, sending individual files to folder, or sending individual files to fax machine when they press the "Copy", "E-mail", "Folder", or "Facsimile" button on the control panel. However, if the users fail to set these settings, then the default settings will be automatically applied to the copier, e-mails, folder, or the fax sent by the users. That is to say, the administrator assigns default settings for common functions. Yet, an individual user also has a chance to set his or her own settings when he or she is performing one of the function modes.
- Alternatively, you may specify more administrator settings on the control panel via the soft keyboard. Refer to the preceding section, *Specifying the Product's Network Settings*, to specify the administrator settings via the soft keyboard.

Specifying More Administrator Settings by the Network Management Tool

- 1. Place the Scanner Driver CD-ROM into your CD-ROM drive. In a second, the installation graphic appears.
- 2. Choose **Network Management Tool** and follow the on-screen instruction to complete the installation.
- 3. Start **Network Management Tool** by choosing Start>All Programs>Network Management Tool>Network Management Tool.
- 4. In a second, the **Network Management Tool** main screen appears as follows.

5. Choose **New Device** from the **File** menu to prompt the following New Device dialog box.

Or you may click the new device tool from the toolbar.

Or double click the large new device icon (New Device).

6. Enter the IP address of your device as illustrated.

7. In a second, the MFPs on the network will be displayed in the main screen as follows.

- Double click the device's icon or you may try either of the following ways to prompt the product's embedded web page to specify your desired settings.
 Select the device's icon and choose the Menu Settings tool in the toolbar.
 Select the device's icon and click your right mouse button and choose Menu.
- 9. Click each item on the menu to enter relevant value. For details on each setting, please refer to the subsequent section, *Summary of the User Tools*.

Note:

For more information on how to use the Network Management Tool, please refer to the online help of the Network Management Tool.

Information: Used to displays the product's basic information.

General [.]	Used to specif	v the r	product's	general	information
General.	Used to specif	y une p	JI OUUCE S	yenerar	mormation.

ltem	Description		
Machine Name	Sets product's machine name. (The name that you		
	wish to show in recipient's e-mail.)		
Country Code	Select the country which you are located. This		
	setting is required to perform the facsimile function.		
Time Zone	Sets local time zone based on Greenwich Mean Time		
	(GMT). With the time zone setting, your overseas		
	e-mail will display your local time instead of sender's		
	local time.		
Date/ Time	Sets the device's clock including date and time.		

Network Setting: Used to specify the product's network settings.

ltem	Description
DHCP Enable	If you have a DHCP server available on your network and the DHCP has been enabled, the above IP, subnet mask, gateway, and DNS server will be automatically given. Choice: ON, * OFF
IP Address	The Internet Protocol (IP) address assigned to your machine by your network administrator.
Subnet Mask	The net mask address assigned by your network administrator.
Gateway I P	The gateway IP address assigned by your network administrator.
DNS Server	The Domain Name Server assigned by your network administrator.
* Factory Default	

Mail Server: Used to specify the product's mail server information.

ltem	Description	
Device E-mail Address Account		
Device E-mail	Enter the email address of the device. This is	
Address	also the default "From" address when you are	
	sending email from the device.	
OutBox Server	Enter the SMTP IP or SMTP URL address.	
(SMTP) IP or		
URL		
Port #	Enter the port number of the SMTP server.	
	* 25	
Authentication	Enter the email authentication method.	
Method	Choice: * None, SMTP, POP3	
Login Name	Enter the login name for SMTP or POP3	
	authentication.	
Password	Enter the password for SMTP or POP3	
	authentication.	
POP3 Server IP	Enter the POP3 server IP or POP3 URL address.	
or URL		
Port #	Enter the port number of the POP3 server.	
	* 110	
External Address	Book	
LDAP Server I P	Enter your LDAP server IP or URL address here.	
or URL		
Port #	Enter the port number of the LDAP server.	
	* 389	
Login Name	Enter the login name of the LDAP server.	
Password	Enter the password of the LDAP server.	
* Factory Default		

Note

The login name and password are case-sensitive and are up to 28 characters.

Copier Default: Used to specify the product's default copy settings. Note when system auto reset time is over or the device is turned on and off again, the copy settings will be reset to these values.

ltem	Description
Basic	
Image Density	Adjust the image density in seven steps using the control panel. And you can specify the default value of image density in the range of 1 to 7 using the product's Web Page. Increasing the value makes the printouts darker and decreasing the value makes the printouts lighter. Choice: 1, 2, 3, * 4, 5, 6, 7
Copy Mode	Choose the focus of your copy result. For example, if your document contains many pictures, choose Photo. If your document contains text only, choose Text. Speed mode is a standard mode for all documents. Choice: * Speed, Text, Photo.
Image Edit	
Erase Border	Sets the length of border you wish to cut. Choice: * 0/ 0.25/ 0.5/ 0.75/ 1.0 inch or * 0/ 6/ 13/ 19/ 25 mm.
Margin Adjustment Unit	The "Margin Adjustment" option will move the copy image to the right or/and to the bottom; depending on "Right" and "Bottom" parameters. Choice for Right or Bottom: * 0/ 0.25/ 0.5/ 0.75/ 1.0 inch or * 0/ 6/ 13/ 19/ 25 mm. Choose the unit you wish to use.
* Fastan Dafault	Choice: * I nch, mm
ractory perault	

Advanced Copy			
Collate	Choose your copies to be placed in "* Sort " (e.g. pages 1,2,3/1,2,3/1,2,3) or " Stack " (e.g. pages 1,1,1/2,2,2/3,3,3) orders.		
Duplex	Choose one of the three types for your duplex printing.		
	Choice: * OFF, Short Edge, Long Edge (Check if your		
	printer includes a duplex option.)		
	Short Edge means the short edge of the paper will be printed first.		
	first.		
	$ \boxed{\begin{array}{c} 1 \\ 1 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 1 \\ 2 \end{array}} \qquad \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \\ 2 \\ 2 \end{array}} \rightarrow \boxed{\begin{array}{c} 1 \end{array}} \rightarrow \end{array} \rightarrow \begin{array}{c} 1 \end{array} \rightarrow $		
	OFF Short Edge Long Edge		
N-Up (Paper	Use the setting to print multiple pages of document to a		
Saving)	single sheet of paper and set the sequence of the page		
	images on each sheet of paper		
	Choice: *1-in-1, 2-in-1, 4-in-1 (landscape), 4-in-1		
	(portrait).		
	1-in-1 means one page will be printed in a single sheet of paper.		
	2-in-1 means two pages will be printed in a single sheet of paper as illustrated.		
	4-in-1 (landscape) means four pages will be printed in a single sheet of paper in rows from left to right, top to bottom as illustrated.		
	4-in-1 (portrait) means four pages will be printed in a single sheet of paper in column from top to bottom, left to right as illustrated.		
	2-in 1 4-in 1(landscape) 4-in-1(portrait)		
Stamp	If you wish to contain specific wordings as your stamp,		
	please enter text in this option for your scanned document.		
	(Note: In the Stamp field, there is a small "Soft Keyboard"		
	icon shown at the upper-right corner. Touch anywhere on		
	the Stamp field to bring up the soft keyboard to enter your		
	stamp characters.)		
* Factory Default			

E-Mail Default: Used to specify the default settings set by the administrator when sending an e-mail from the product. The default settings mean the e-mail settings will be reset to these values when the system auto reset time is over or when the product turn off and on again.

Default E-ma	il Options
ltem	Description
Default	Enter text for the default email subject for all outgoing mails
Subject	sending from the product. Up to 64 characters are allowed.
	Touch anywhere in "Subject" field to bring up the soft keyboard
	to enter your subject.
Default File	Choose default maximum image size for attachment sent by the
Separation	product. The purpose to set file separation is to avoid the file
	size limitation of SMTP servers. Use the combo box to select
	from the list.
	Choice: 1MB/ 3MB/ 5MB/ 10M/ 30MB/ * Unlimited
Default Scan	Options
ltem	Description
Original	Choose your default document size.
Size	Choice: * A4/ Letter/ A5/ B5/ Legal. Note: The Legal option
	is only for ADF scan.
Resolution	Choose your default resolution for the scanned document. The
	higher the resolution, the greater details for the scanned image
	yet it requires more disk space.
	Choice: 75, 100, 150, * 200, 300, 400, 600 dpi.
lmage	Adjust the image density in seven steps using the control panel.
Density	And you can specify the default value of image density in the
	range of 1 to 7 using the product's Web Page. Increasing the
	value makes your scanned image darker and decreasing the
	value makes your scanned image lighter.
	Choice: 1, 2, 3, * 4, 5, 6, 7
Color	File format for documents to be sent in colors via E-mail from
	the product.
	Choice:
	1. File Format: * PDF, JPEG, TIFF, JPEG_EXIF, MTIF
	(Multi-page TI FF)
	Note: Choose MTIFF or PDF when you need to scan
	multi-page document and convert it to a single image file.
	2. Compression Level: * Low, Medium, High
	(If TIF or MTIFF is selected as a file format, the compression
	Level is defined as Raw only.)

Black/White	B&W Multi-Level (Gray): Choose "ON" if you wish to make
	gray copies or OFF to make a B&W (single-bit) copies.
	Choice:
	1. Multi-level B&W/ Gray: ON, * OFF
	2. File format: * PDF, MTI FF(Multi-page TI FF), TI FF
	3. Compression Level: * Low, Medium, High
	(If you choose ON from Multi-level B&W/Gray, the file formats
	include PDF, JPEG, TIF, MTIF, and JPEG_EXIF. If TIF or MTIFF
	is selected as your file format, the compression Level is limited
	to Raw only.
	If you choose OFF from Multi-level B&W/Gray, the file formats
	include PDF, TIF, and MTIF. The compression Level of MTIF or
	TIF includes G3, G4, and Raw.)
* Factory Defau	lt

Explanation of file format:

PDF	PDF(Portable Document Format) is a very popular file format used by Adobe. You can view PDF files using Adobe Acrobat or Adobe Reader.
TIFF/MTIFF	TIFF (The Tagged-Image File Format) is a flexible bitmap image format supported by virtually all paint, image-editing, and page-layout applications. Also, virtually all desktop scanners can produce TIFF images.
JPEG	JPEG (Joint Photographic Experts Group) compression provides the best results with continuous-tone color and the smallest file size.
JPEG_EXI F	Exchangeable image file format for digital cameras.

The following table gives you an idea of file size v.s. file format

File Format	TIFF	PDF	JPEG
File Size (A4, Color, @200 dpi)	10M	53KB	212KB

Folder Template: Used to specify the parameters for a Folder Template. The Folder Template contains similar information as the new folder screens. The Folder Template will display on the folder screen when users want to add a new folder to save the time to retype these data again.

Server Settings			
ltem	Description		
Target URL	Please choose the type of protocol of your filing server in the first field. Choice includes * FTP, HTTP, CLFS, HTTPS.		
	Please enter the target URL in the second field. You can enter either the domain name or the IP address with the directory path. Note that the directory will be varied due to different protocol. The route starts from the root directory in FTP, HTTP, HTTPS, and CIFS. For example, ftp://, http://, and file:\ https://.		
	Important note:		
	You must use this CIFS filing format, file:\\IP\computer		
	name\folder name, to set CIFS URL.		
Port #	Enter the port number for the server which you want to store your scanned document. Default value: * ftp:21, http:80, CIFS:139, https:443 If the default value is different from the real case, input the		
	correct port number in this field. Touch anywhere on the "Port" field to bring up the soft keyboard to enter the text. Default: 21		
File Name	The file name for your scanned document without extension. If you have not entered a value in the box, the system will bring you a default file name, image. Using #Y#M#D#h#m#s#n makes file name change as time goes. (Y), M, D, h, m, s, and n represent year, month, date, hour, minute, second and series number respectively.) For example, type file name: test#D#n will bring your filing file name as test0500001		
Report to e-mail	Enter an e-mail address if you wish to send the filing report to the e-mail.		
Create a	Choose ON to enable the server to create a subfolder when		
Subfolder	sending the scanned image to the destination server. (Check if		
	you are authorized to write under the destination server.) Choice: ON, * OFF		
*Factory Default	t

Fax Default: Used to specify the fax default settings.

ltem	Description
Quality	Set default quality type.
	Choice: Standard, * Fine, Extra Fine, Photo
	Standard (200 x 100 dpi): Suitable for most typed
	originals.
	Fine (200 x 200 dpi): Good for small print.
	Extra Fine (200 x 400 dpi): Good for small print or artwork
	and transmits slower than Fine resolution.
	Photo (200 x 200 dpi): Use when the original has varying
	shades of gray.
	Note: Faxes are sent in the specified resolution if that
	resolution is supported by the receiving fax machine.
Document	Set default document size.
Size	Choice: * A4, Letter, A5, B5, Legal.
	Note: The Legal option is only for ADF scan.
lmage	Adjust the image density in seven steps using the control
Density	panel. And you can specify the default value of image
	density in the range of 1 to 7 using Web Page. Increasing
	the value makes your scanned image darker and
	decreasing the value makes your scanned image lighter.
	Set default image density level.
	Choice: 1, 2, 3, *4, 5, 6, 7
Polling	Set default status of polling reception. Choose ON to use
Reception	the product to poll other machines. Polling is the process
	of retrieving faxes from another fax machine.
	Choice: ON, * OFF
Overseas	Set default overseas mode. Choose ON to avoid
Mode	transmission problems when faxing overseas.
	Choice: ON, * OFF
*Factory Defau	lt

Fax Settings: Used to specify more fax Settings.

Settings	
ltem	Description
ID Number	Enter the ID number of the product. Up to 20 characters can be entered. Normally, you can enter your company name or the fax number of your company in this field. Touch anywhere on the "ID number" field to bring up the soft keyboard to type your text. The text in this field as well as the station number (telephone number of the product), the product's clock including date and time, the receiving fax number, and page index will be printed at the top of all outgoing faxes as header information.
Station	Enter the telephone number of the product. The Station
Number	Number is the phone number of the line connected to the built-in modem and the Station Number should be a value not more than 20 characters. Some characters such as "-", "#", "*", "P" (pause) are supported. The value of the station number will be printed as part of the fax header information of all outgoing faxes. Touch anywhere on the "Station Number" field to bring up the soft keyboard to type your number
Select Line	Select to use the device's fax telephone line as a direct outside
Select Line	line (PSTN line) or as an extension (PABX line). Choice: * Outside, Extension
PSTN Access	Enter the number to access the PSTN (Pubic Switched Telephone
No.	Network) line if your device's fax telephone line is used as an extension. For example, enter 0 or 9 in the field via the soft keyboard.
Redial	Sets the number of redial attempts if the number dialed is busy.
	Choice: 0, 1, * 2, 3, 4, 5, 6, 7, 8, 9, 10 (The Redial value 0 indicates no redial.)
Redial	The redial interval setting selects the number of minutes
Interval	between each redial if the number dialed is busy.
	Choice: 1, 2, * 3, 4, 5, 6 minutes.
Ring	Lets you set the number of times the phone ring before the fax
Response	answer.
	Choice: * 1 ring, 5, 10, 15, 20 seconds.
Sound	Use the arrow keys to adjust the sound volume during fax
voiume	
*Factory Defaul	t

Options	
ltem	Description
Add Phone #	Choose ON then the new fax number will be automatically included in the Phone Book after finishing sending the fax. Choice: ON, * OFF
Transmission Report	Choose if you wish to print the fax transmission report. This report lists the time and date of transmission and whether the transmission was successful (OK). If you select Yes, the report will be print after each transmission. If you select Error, the report will only be printed when a fax fails to transmit. Choice: * Yes, No, Error only
Fit to Page	Choose Enable to scale the entire contents of your receiving fax to fit into the paper of the printer. If this setting is disabled, an incoming image larger than the page splits across pages. Choice: * Enable, Disable
Detect Dial Tone	Choose Enable to allow this product to wait for and detect dial tone before proceeding with dialing. If you are using the product on the same line as your phone, turn on the detect dial tone setting. This will prevent the product from sending a fax while someone is on the phone. Choice: Enable, * Disable
Detect Busy Tone	Choose Enable to allow this product to detect busy tone when sending a fax. Choice: * Enable, Disable (The default setting varies based on country code.)
Manual Receive	Choose Enable to perform manual receive fax function or Disable to perform auto receive fax function. Manual receive means when there is a fax being sent to the product, it will ring until you press Start button, and then receive and print the fax automatically. Choice: Enable, * Disable
ECM Mode	Choose Enable to perform the "ECM Mode". The Error Correction Mode function helps this product to improve communication in areas where telephone line conditions are poor. Choice: * Enable, Disable t

Report Print	Choose to print the following reports.
	Activity Report: Choose to print a report showing the latest
	record of up to 50 communications between the sending and
	receiving fax machines. (The default setting is to print a
	record of every 50 communications between sending and
	receiving fax machines.) The report may contain the
	information and result which is useful to troubleshoot a
	particular problem.
	Broadcast Report: Choose to print the group transmission
	report.
	Transmission Report: Choose to print the latest
	transmission report to check if the transmission result is
	successful disregarding which selection you have chosen in
	the Transmission Report option.
Cancel Fax Job	DS
ltem	Description
Delete	If you wish to cancel pending fax jobs, you can choose the
	item in the delayed send fax job list and then press the
	"Delete" button to cancel it.

Phone Book: Used to create and edit the fax phone book which includes 200 individual phone numbers and 20 groups.

Single Dial	
ltem	Description
Program	Enter a new name and phone number. Up to 200 phone
Change	Change a current phone number. Select a phone number
	you wish to change and then touch the Change button.
Delete	Delete a current phone number. Select a phone number
	you wish to delete and then touch the Delete button. The
	selected phone number will be deleted
One un Diel	
Group Diai	
ltem	Description
Program	Enter a new group. Up to 20 phone groups can be created.
Change	Change a current phone group. Select a group you wish to
	change and then touch the Change button.
Delete	Delete a current phone group. Select a group you wish to
	delete and then touch the Delete button. The selected
	group will be deleted.

Management: Used to specify administration's authentication and other management settings such as energy saver (timer), display language, the default operation mode and so on.

Administrato	r Profile
ltem	Description
Login Name	Enter the login name to access the User Tools.
	Up to 32 characters or digits are allowed and is case-sensitive.
Password	Enter the password to access the User Tools.
	Up to 8 characters or digits are allowed and is case-sensitive.
E-mail	Enter the e-mail address of the administrator of the product so
Address	that system can send the error or warning message. Up to 64
	characters or digits are allowed and is case-sensitive.
Management	Settings
ltem	Description
Add "To"	Choose Enable to include the "To" address to current address
Addr. After	book after finishing sending the e-mail from the product.
Sending	Choice: * Enable, Disable
Add a New	Choose Enable to include the new folder to current folder list
Folder After	after finishing sending the scanned document to the new server
Sending	from the product.
	Choice: * Enable, Disable
Energy	Set to enable or disable the energy saver. The energy saver lets
Saver	you reduce power usage while the machine is idle.
	Choice: * Enable, Disable
Energy	If Energy Saver has been enabled, choose how long the machine
Saver	will be idle before it automatically enter the energy saving mode
(Timer)	after the last action. The factory default setting is 15 minutes.
	Choice: 5, * 15, 30, 60, 240 minutes
System	Specify the system's auto reset time. If users have not
Auto Reset	performed any action during the limited reset time, the LCD
(Timer)	display will automatically return to the default operation mode,
	for example, copy, or e-mail working mode.
	Choice: 20, 40, * 60, 120,180 seconds
Language	Choose the language you wish to show in the LCD-display.
	Choice: * English, German, French, Italian, Spanish,
	Portuguese, Dutch, Sweden, Norwegian, Finnish, Danish,
	Hungarian, Czech, Polish, and Russian.
Default	Specify a default operation mode. The default mode will show
Mode	after system auto reset time is over or when system is turned off
	and on again.
	Choice: * Copy, E-Mail, Folder, Facsimile
* Factory Defau	ult

Account Management: Used to set user's privileges including using the copy, e-mail, folder, or facsimile function of the product by assigning an account authentication method.

Important!

For effective management, the product allows the administrator to specify users' privileges only through the product's embedded web page. Simply type the product's IP address in the URL field of your browser and choose Account Management to set users' privileges in the product's web page. (For more details, please see Appendix.)

Account Manage	ment
ltem	Description
Authentication	Choose to select the authentication type for account
Туре	management.
	Choice:
	None, Local, HTTP, LDAP, SMTP
	Note:
	"None" means no account management will be applied.
	"Local" means using the product as the authentication type,
	and the name and password entered in the Account
	management are saved in the product memory.
	"HTTP, LDAP, or SMTP" means using a HTTP, LDAP, or SMTP
	server as the authentication type.
Server	Assign the server IP or the URL address of the authenticating
Information IP	SMTP, HTTP or LDAP server. Touch anywhere on the URL
or URL	field to bring up the soft keyboard to enter the text.
Port #	Enter the port number if you choose HTTP, LDAP, or SMTP as
	your authenticating server.

Before you begin to send your scanned document to your destination server, there are a few things you need to be aware of. The following will introduce you several server systems used with the product.

Settings the Servers to Store Your I mage

FTP

FTP Stands for "File Transfer Protocol." It is a common method of transferring files via the Internet from one computer to another. FTP use RFC 959[FTP] as their protocol, and the default Port is usually 21. Therefore, please make sure you have legal FTP account with the privilege of writing under the directory to save the files and the password before using FTP to save the files. To add a sub-directory from the product, you need to have the privilege of adding a new directory.

HTTP

HTTP uses RFC 2616[HTTP 1.1] as the protocol, and the default port is usually 80. If you are not using the HTTP port to save the files, you must change the HTTP Port of the product to the port for the Web Server.

Generally speaking, Web Server, such as IIS or the other HTTP server, will use anonymous account for authentication, so that the user can link directly to the web page without entering the user name and password first. Hence, if the HTTP Server allows anonymous account for authentication when you use the product to keep the files, there is no need for setting any text in the field of Login name and Password of the product.

On the other hand, if IIS or HTTP server does not allow anonymous account for authentication connecting to the web page, the user will be prompted to enter the user name and password first while connecting to the web site. In this mode, the file saving feature is available only when entering the user name and password permitted by the server in the field of Login name and Password for the product respectively. Therefore, please make sure the mode that your Web Server allows before using HTTP for files saving. If anonymous access mode is not allowed, you must have legal HTTP account and password.

Since the product will check whether the directory for file saving really exists before proceeding file saving and then writing the file after scanning to the specified directory, you have to set the directory for files saving as "browse" and allow for writing in Web Server; otherwise, the product will not be able to write the file into the directory.

If you wish to use the product to save files, in addition to making some settings in Web Server, you will have to confirm the account with the privilege of writing for connecting Web Server; otherwise, the product will not be able to "write" the scanned file in the file system.

The following uses the IIS setting for anonymous access to Microsoft Windows 2000 as an example, and assumes the HTP application is installed in the root directory of IIS, C:\Inetpub\wwwroot\Xcabinet, and the directory for files saving is in C:\Inetpub\wwwroot\Xcabinet. For non-anonymous access, refer to IIS for more detail information.

The settings for IIS anonymous access is as below:

 Start "Internet service manager" in "Control Panel", select "Default Web site" and right click C:\Inetpub\wwwroot\ Xcabinet, and select "Properties ".

	Name	Path

Jejog Delete J			
mages Properties DemoCo Help			

 In the Xcabinet dialog box, select "Directory security" tab, and click "Edit" for "Anonymous Access and Authentication Control". Please make sure " Anonymous Access" is selected in "Authentication Methods" dialog box.

3. Click on "Edit" to Open "Account for anonymous access".

ionymous Us	er	
Select the W anonymous u	indows User Account used to access this c iser connects to this site.	omputer when an
Username:	IUSR_DOMINO-SERVER	Browse
assword:	******	-
	Allow IIS to control password	

Please make sure that the account, stored in your computer system, in the "username" filed is with sufficient privilege to access the file system.

The settings for IIS privilege is as below:

- 1. Like the setting in anonymous access, start "Internet service manager" and select "Default Web site", and right click C:\Inetpub\wwwroot\Xcabinet, and select "Properties".
- 2. Select "Directory" tab in the Properties page. Please ensure the privileges for "Read", "Write" and "Directory Browsing" are selected.

The settings for directory is as below:

If the <u>file management system in your server is NTFS</u>, in order to allow IIS to use an anonymous account to access the files in the directory of C:\Inetpub\wwwroot\Xcabinet, you have to make sure the anonymous account is with sufficient privilege. You may make the following settings:

- 1. Select C:\Inetpub\wwwroot\Xcabinet directory in Windows Explorer, and right click to select "Properties".
- Select "Security" tab in the File dialog box, and select "Everyone". Select the privileges for "Read and Execute", "Folder Properties List", "Read" and "Write".

After that "every user" has the privilege to manage all files in the directory of files saving.

Note: For the actual security concern of the scanned files, we should not allow the group of "Everyone" to have full privileges of the file directory. Therefore, when setting the access privilege for your file system, it is recommended to set the privilege of the directory for file saving to IIS anonymous account or the other users and groups that can use the directory only. Note:

- 1. Please note that HTTP cannot add server sub-directory from the product.
- 2. When using Apache as HTTP server, you need to have a HTTP/1.1 put add-in module since the product uses chunked Transfer-encoding. In addition, the Apache will have to be set to accept HTTP PUT command in order to accept the product for files saving. For more information, refer to the related document of Apache.
- 3. For IIS 6.0 on Windows 2003, you need to enable WebDAV in Server Extension folder.

HTTPS

HTTPS is a secure way of using HTTP. HTTP provides almost no security feature. It contains only basic authentication mechanisms, and supports little privacy. HTTPS solves this problem by adding SSL, a secure transport layer over insecure TCP.

To send scanned document to servers using HTTPS, you must install SSL on the destination servers. How to install SSL properly on the server, please refer to the server's manual. After SSL has been installed well, please check if the SSL port is editable and the directory security has been selected. The following illustrations show how to check the SSL port and directory security in Windows 2000 Server system.

To check if SSL port and directory security have been selected,

1. Click Start>Program>Administrator Tools>Internet Service Manager in succession.

 Click Default Web Site and click the right mouse button and choose Properties. The Default Web Site Properties dialog box appears. Click the Web Site tab and check if SSL port is editable.

domino-server Site			Directory Security HTTP Headers Custom Enors Server Extension Web Sile Operators Performance ISAPI Filters Home Directory Docum

4. Check if "**Require secure channel (SSL)**" and "**I gnore client** certificates" have been selected.

Or

You may simply type "netstat" in a MS-DOS command. If the https has been established as below, then the server is ready to receive scanned document from the product via HTTPS.

CI FS

CIFS (Windows Network Share) is a file saving protocol generally used for "recourse sharing" of network in Microsoft Windows systems. Please set up the "shared directory" per the network settings for sharing in MS Windows. Generally, on the shared directory Properties dialog box under the Windows XP, select "Sharing" tab, and select "Share this folder". Click "Permissions" button to open "Permissions for the shared directory" dialog box.

Specifying a Folder Template by the Product's Embedded Web Page

For management purpose, the product allows the administrator to specify the Folder Template remotely only through the product's embedded web page. Please note it is not available to specify these settings on the Touch panel.

To specify the Folder Template by the product's web page,

1. Type the IP address of the product in the URL field of your browser and then press **Enter** to launch the product web page.

	Web Image Monitor IS800C
Menu	Model: IS800C

	Resolution:	75 dp	i	~
Image Density:				×
Subfolder:		ON		~
	Report to e-mail:			
	Document Size:	A4		~

Enter or select an input parameter respectively, and then finally click
 Update to save your settings. Refer to the following table for the detail of each setting:

ltem	Description				
Protocol	Choose the protocol you desire to store your scanned				
	image.				
	Choice: * FTP, HTTP, CI FS, HTTPS				
Target	Specify the filing server address and path. Note that the				
URL	directory will be varied due to different protocol. The				
	route starts from the root directory in FTP, HTTP, HTTPS,				
	and CIFS. For example, ftp://, http://, and file:\				
	https://.				
	Important note:				
	You must use this CIFS filing format, file:\\IP\computer				
	name\folder name, to set CIFS URL.				
Port #	The port number for your filing server.				
	Default value: FTP:21, HTTP:80, CIFS:139,				
	HTTPS:443				
	If the default value is different from the real case, input				
	the correct port number in this field.				
File Name	The file name for your scanned document without				
	extension. Using #Y#M#D#h#m#s#n makes file name				
	change as time goes. (Y), M, D, h, m, s, and h represent				
	year, month, date, nour, minute, second and series				
	test#D#n will bring your filing file name as test 0.0001				
	File format for the scanned documents to be sent in				
Color File	colors via filing from the product.				
Tormat	Choice:				
	1. File Format: * PDF, JPEG, TI FF, JPEG_EXI F,				
	MTI F(Multi-page TI FF)				
	Note: Choose MTIFF or PDF when you need to scan				
	multi-page document and convert it to a single				
	image file.				
	2. Compression Level: * Low, Medium, High				
	(If TIFF or MTIFF is selected as a file format, the				
	compression Level is defined as Raw only.)				

Black/White	File format for documents to be sent in black and white					
File Format	via filing from the product.					
	Choice:					
	1. Multi-level B&W/ Gray: ON, * OFF					
	2. File Format: * PDF, MTI FF(Multi-page					
	TI FF), TI FF					
	3. Compression Level: * Low, Medium, High					
	(If you choose ON from Multi-level B&W/Gray, the file					
	formats include PDF, JPEG, TIF, MTIF, and JPEG_EXIF.					
	If TIF or MTIFF is selected as your file format, the					
	compression Level is limited to RAW only.					
	If you choose OFF from Multi-level B&W/Gray, the file					
	formats include PDF, TIF, and MTIF. The compression					
	Level of MTIF or TIF includes G3, G4, and Raw.)					
Resolution	The scanning resolution for your scanned document.					
	The higher resolution makes a clearer image, but					
	occupies more space.					
	Choice: 75, 100, 150, * 200, 300, 400, 600 (dpi)					
Image Density	Adjust the image density in seven steps using the					
·	control panel. Also you can specify the default value					
	of image density in the range of 1 to 7 using Web					
	Page. Increasing the value makes your scanned					
	image darker and decreasing the value makes your					
	scanned image lighter.					
	Choice: 1, 2, 3, * 4, 5, 6, 7					
Subfolder	Input the name of the subfolder. (Make sure you have					
	the privilege to create a subfolder under the server.)					
	Choice: * ON, OFF					
Report to	Enter an e-mail address if you wish to send the filing					
e-mail	report to the e-mail.					
Document Size	Choose your document size					
• • • • • • • • • • • •	choose your document size.					
	Choice: * A4, A5, B5, Letter, Legal Note the legal					
	size is available from the ADF only.					

Editing a Folder by the Product's Web Page

You can edit a folder by creating a new folder, modifying a current folder, or deleting a current folder.

To add a new folder,

- 1. Type the IP address of the product in the URL field of your browser and then press **Enter** to launch the product web page.
- Choose Administrator Settings. The Login dialog box is prompted. Click Login since the machine is shipped with no specific login name and password, and then click Folder Manager to prompt the Folder Manager screen.

Folder Manager						
New	<u>Delete</u>	<u>Modify</u>	Update Exit

- 5. Click Fax Settings from Menu to prompt the Fax Settings screen.
- 6. Enter your text in the **ID #** field. For example, your company name or your fax number. Up to 20 characters or digits can be entered.
- 7. Enter the product's fax number in the Station Number field on the Fax Settings screen. Up to 20 digits can be entered and some characters such as "+", "-", " "(space), "#", "*", "P" (pause) are supported.

The following is an example of the fax header.

ID#: AAA Company Station #: 5231111 To:1234567 2007/07/31 15:31 Page:1

With an intuitive control panel and a large LCD display, the product is designed to be easy-to-use. After the administrator has completed the configuration of the machine, basically, operating the product takes only a few steps as follows.

1. Place your paper either in the ADF or on the glass.

filing server, or a remote fax machine.

2.	Press Copy Facsimile F-mail on the control panel.
3.	If you are pressing enter an e-mail address or select one address
	from the address book. If you are pressing , choose your desired folder to save your image.
	If you are pressing CP, enter a fax number or select one number from the phone book.
4.	Press ("Black & White") or ("Color Start ("Color") button to start
	scanning and send the scanned document to your printer, e-mail address,

The following sections describe the advanced steps on how to make copy of your scanned document, how to fax your scanned document, and how to distribute your document over the internet.
The product can scan and send document(s) either in the ADF (Automatic Document Feeder) or on the glass. If you need to send multiple pages, please load your papers in the ADF. The ADF can hold up to 50 pages at one time. If you need to send pages from books, newspaper clippings, or paper with wrinkles or curls, please place your paper on the glass.

Notice on Using the ADF

Before using the ADF, please make sure that your paper meets the following specifications:

- Document(s) can range in size from 4.5 by 5.5 inches to 8.5 by 14 inches (Legal).
- Document(s) can range in weight from 16 to 28 lbs (0.002" to 0.006").
- Document(s) should be square or rectangular and in good condition (not fragile or worn).
- Document(s) should be free of curl, wrinkle, tears, wet ink, or punch holes.
- Document(s) should be free of staples, paper clips, paper sticky notes.
- Keep the glass clean without document placed on it.

Note:

To transmit irregular types of document(s), place the document(s) on the glass or make a copy first and then transmit the copy instead.

Placing Document(s) in the ADF

- 1. Make sure your document is free of staples, paper clips and is not tore out.
- 2. If you have multiple pages, fan your document(s) to avoid occasional paper jam. The ADF holds up to 50 pages at one time.

3. Place your document(s) with the text **FACE UP** in the ADF and make sure that the top of each page feeds in first.

4. Adjust the Paper Guides to center the document(s) in the ADF.

Placing Document(s) on the Glass

- 1. Open the document(s) cover to reveal the glass.
- 2. Place your document with the text **FACE DOWN** on the glass and align the document in the upper-left corner.

3. Close the document cover.

Making Copies

Basic Operation

Important!

Before making copies through your printer, please make sure your printer has been properly connected to the product and that the power of the printer has been turned on **FIRST**. Otherwise, the copy function may not work properly.

Using the Default Settings

1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.

2. Press the **Copy** button on the control panel to prompt the **Copy** main screen.

3. Press the **B&W Start** or **Color Start** button on the control panel to copy your document(s) in black and white.

Copy

Using Special Settings

1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.

Copy

2. Press the **Copy** button on the control panel to prompt the **Copy** main screen.

N-Up (Paper	Use the setting to print multiple pages of document to a					
Saving)	 single sheet of paper and set the sequence of the page images on each sheet of paper Choice: * 1-in-1, 2-in-1, 4-in-1 (landscape), 4-in-1 (portrait). 1-in-1 means one page will be printed in a single sheet of paper. 2-in-1 means two pages will be printed in a single sheet of paper as illustrated. 4-in-1 (landscape) means four pages will be printed in a single sheet of paper in rows from left to right, top to bottom as illustrated. 4-in-1 (portrait) means four pages will be printed in a single sheet of paper in rows from left to right, top to bottom as illustrated. 					
	2-in 1 4-in 1(landscape) 4-in-1(portrait)					
Stamp	If you wish to contain specific wordings as your stamp, please enter text in this option for your scanned document.					
	(Note: In the Stamp field, there is a small "Soft Keyboard" icon shown at the upper-right corner. Touch anywhere on the Stamp field to bring up the soft keyboard to enter your stamp characters.)					
* Factory Default						

Basic Operation

Using the Default Setting

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- 2. Press the **E-mail** button on the control panel. The following **E-mail** main screen appears.

	E-Mail Basic	E-mail Options	Scan Options	Bind Recipient	
The "To"/"CC"/ "BCC" Field	To Cc Bcc				The Address Book button
	Subject				
	Resolution 200dpi	Paper Size A4	Image Density		

3. Enter the e-mail address.

- Touch any place on the "To" field (the empty box in the center) to bring up the "soft keyboard" to type your email address. Press **Enter** to type the 2^{nd} e-mail address and then click **Return** to return to the **E-mail** main screen.

- You may also touch the **Address Book** button to bring up the address book and then select from the list. You can also select multiple addresses at one time.

 Press the B&W Start button to send your document(s) in black and white, or the Color Start button to send your document(s) in color.

Using Special Settings

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- 2. Press the **E-mail** button on the control panel. The following **E-mail** main screen appears.

	E-Mail			Recipient	
	Basic	E-mail Options	Scan Options	Bind O	
The "To"/"CC"/ "BCC" Field	To Cc Bcc				The Address Book button
	Subject				
	Resolution 200dpi 🗸	Paper Size	Image Density		

3. Enter the e-mail address.

- Touch any place on the "To" field (the empty box in the center) to bring up the "Soft Keyboard" to type your email address. Press **Enter** to type the 2nd e-mail address and then click **Return** to return to the **E-mail** main screen.

- You may also touch the **Address Book** button to bring up the address book and then select from the list. You can also select multiple addresses at one time.

- Enter or select CC and BCC address as well, if necessary. Enter the subject of your e-mail via the soft keyboard. If not, the "Default Subject" will be displayed in recipients' e-mail message.
- 5. On the **Basic** screen, check if the paper size, scanning resolution, or image density meets your requirement. If not, change the settings to suit your needs.
- Press the E-mail Options tab to prompt the E-mail Options screen. Enter the file name of the scanned document, the "From" address, and type your e-mail message if necessary in the Text field via the soft keyboard. (For more information about the settings, see the settings description below.)

E-mail

- 7. Press the **Scan Options** tab to prompt the **Scan Options** screen. Change the file format and compression level of the scanned image if the default settings are not satisfactory.
- 8. Press the **B&W Start** button to send your document(s) in black and white, or the **Color Start** button to send your document(s) in color.

9				
e				
et it requires more disk space.				
ulti-batch document scanning from the ADF or Multi-page				
scanning from the flatbed can be enabled. Press the Bind				
button when loading more than 50 pages on the ADF or more				
than one page on the flatbed. After scanning the 1 st batch or				
1 st page, a dialog box will pop up enquiring if you wish to				
Bind or End . Choose Bind to scan next batch or page of				
locument or End to stop scanning.				

Settings Descriptions

From	Enter the "From" address of your outgoing mails from the				
	product. If an e-mail can not be sent, notification is				
	returned to this address. If the administrator has not set the				
	device's email account in the Mail Server settings, you can				
	enter the email address here. This is the "From" address in				
	your e-mail when you receive an email from the product.				
Reply To	Enter a "Reply to" address if you wish to specify a reply				
	address which is different from the "From" address. Up to				
	60 characters can be entered in the field. To enter the				
	address, you may press anywhere on the "Reply To" field to				
	bring up the soft keyboard to type the address.				
Text	Type your email message here. To enter the text, you may				
	press anywhere on the "Text" field to bring up the soft				
	keyboard to type the text.				
File	Limit the file size of the attachment of each outgoing email to				
Separation	avoid the size limitation from SMTP servers. Use the combo				
	box to select from the list.				
	Choice: 1MB/3MB/5MB/10M/30MB/*Unlimited				
Scan Options					
Color	File Format: Choose the file format for your scanned image.				
	Choice includes * PDF, TIF, JPEG, MTIF, JPEG EXIF				
	Note: Choose MTIFF or PDF when you need to scan				
	multi-page document and convert it to a single image file.				
	Compression Level: Choose the compression level for your				
	scanned image.				
	Choice: * Low, Medium, High				
	If TIFF or MTIFF is selected as a file format, the compression				
	Level is defined as Raw only.				
Black/White	B&W Multi-Level (Gray): Choose "ON" if you wish to make				
	gray copies or * OFF to make a B&W (single-bit) copies.				
	File Format: Choose the file format for your scanned image.				
	Choice includes * PDF, TIF, JPEG, MTIF, JPEG_EXIF for Gray				
	image or * PDF, TIFF, MTIF for B&W image.				
	Compression Level: * Low, Medium, High				
	(If you choose ON from Multi-level B&W/Gray, the file				
	formats include PDF, JPEG, TIF, MTIF, and JPEG_EXIF. If TIF				
	or MTIFF is selected as your file format, the compression				
	Level is limited to Raw only.				
	If you choose OFF from Multi-level B&W/Gray, the file				
	formate include DDE DCV TIE and MTIE The compression				
	Tormats include PDF, PCA, TIF, and MTIF. The compression				
	Level of MTIF or TIF includes G3, G4, and Raw.)				
* Factory	Level of MTIF or TIF includes G3, G4, and Raw.)				

Note:

- ✓ If you make a mistake during the process, press the Stop button on the control panel to cancel the operation.
- The machine allows you to send the scanned document(s) to multiple
 e-mail addresses. After finishing entering your first e-mail address, simply
 press Enter to type your next address in the next line.
- ✓ Up to 64 characters can be entered in the File Name of Attachment, "To", "From", "Reply to", "Subject", and the "Text" fields.
- ✓ If you wish to scan a multi-page document and convert it to a single image file, choose your output file format to be MTIFF or PDF.
- ✓ If you wish to send multiple pages from the flatbed or more than one load (50 pages) from the ADF, press the Bind button first. The button will be highlighted and after finishing scanning your first page or first load, you will be prompted to enquire if you wish to bind next page or next load. Place your next page on the flatbed or next load on the ADF and choose **Bind** to continue. After finishing scanning all your pages, choose **End** to close the dialog box.

Using the Soft Keyboard

In the **E-mail** main screen, the soft keyboard is used to enter your e-mail address, or message in the text field.

To use the soft keyboard,

 Whenever there is a soft keyboard icon shown in the blank field, for example, the following **Subject** field on the **E-mail** screen, touch anywhere on the blank field to bring up the soft keyboard.

Subject	
The blank field	Soft keyboard
QWERTYUIOP	icon
$\begin{array}{c} A \\ S \\ D \\ F \\ G \\ H \\ J \\ K \\ L \\ + \\ Z \\ X \\ C \\ V \\ B \\ N \\ M \\ - \\ - \\ 0 \\ - \\ - \\ - \\ - \\ - \\ - \\ -$	
KB Switch a A 17	

Keyboard Switch button

2. To enter small letters or other characters, press the **KB Switch** button to bring up the small-letter keyboard as shown below.

Return

asdfghjkl+
z x c v b n m 🔺 🕶
KB Switch a 17

3. To return to the **E-mail** main screen, press the **Return** button.

To select e-mail addresses,

- Touch the Address Book icon on the E-mail main screen. The following Address Book screen appears.
- Touch an e-mail address to select it. The selected one will be highlighted. (You may touch another address for multiple selections.)
- 3. Touch **OK** to return to the **E-mail** main screen.

Address Book	E-mail	Group		Recipient
Name	Address	T		
aaa	aaa@abc.com			Search
bbb	bbb@abc.com			
betsy	betsy@abc.cor	n	1,	
ccc	ccc@abc.com		/	
				Cancel
				ОК

To select a group address,

- 1. On the Address Book screen, touch the Group tab to prompt the following Group screen.
- 2. Touch a group to select it and touch **OK** to return to the **E-mail** main screen. (You may touch another group to select multiple groups)

Ad	dress Book				Recipient
		E-mail	Group		1
	Name	Address			
	marketing	(group)			Search
	customer	(group)			
				1,	
				/	
					Cancel
					ОК

To search an e-mail address or a group,

- On the Address Book main screen, touch Search to prompt the following E-mail Search screen.
- Choose your search type. (All means to search the addresses from current Address Book of the product. LDAP means to search the addresses from an external address book on a LDAP server.)
- 3. Enter your search string via the soft keyboard.
- 4. Touch the **Search** button to start searching.

Address	Book Search	
	Search Type	
	AII LDAP	
	Search String	
	Cancel Search	

Before sending your document to destination servers, you should set up a few folders first to speed up the process. A folder contains a list of parameters such as your filing protocol, directory, file name and other scanning parameters. On how to set up a new folder, please refer to the preceding section, "Adding a New Folder By the Product's Web page" in the previous chapter.

Basic Operation

olde

Using the Default Settings

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- 2. Press the **Folder** button on the control panel. The LCD-display prompts the following **Folder** main screen.

Folder			
Basic	Server Options	Scan Options	Bind
Name	URL		
[marketing]	FTP://ftp.abc.co	om/marketing	Frequent
[betsy-cifs]	CIFS:\\10.1.30.	42\pcname\share	
[test]	HTTP://10.1.44	.67/test	
Resolution	Paper Size	Image Density	
200000	× /\4		

3. Choose a folder to place your scanned image.

- Or you may use the **Up-arrow** or **Down-arrow** button to scroll from the list.

- Or you may switch to most frequently used folder list by touching the **Show All** button.

 Press the B&W Start button to send your document(s) in black and white, or the Color Start button to send your document(s) in color.

81

Using Special Settings

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- 2. Press the **Folder** button on the control panel. The LCD-display prompts the following **Folder** main screen.

Fo	older				
	Basic	Server Options	Scan Options	Bind	
	Name	URL			
	[marketing]	FTP://ftp.abc.co	om/marketing		Frequent
	[betsy-cifs]	CIFS:\\10.1.30	42\pcname\share	01	HAN
	[test]	HTTP://10.1.44.67/test			
	Resolution	Paper Size	Image Density		_
	200dpi	▼ A4			

3. Choose a folder to place your scanned image.

- Or you may use the **Up-arrow** or **Down-arrow** button to scroll from the list.

- Or you may switch to most frequently used folder list by touching the **Show All** button.

- 4. On the **Basic** screen, check if the paper size, scanning resolution, or image density meets your requirement. If not, change the settings to suit your needs.
- 5. Touch the Server Options tab to prompt the Server Options screen. If you are a registered user with a different login name displayed on the Server Options screen, please enter your own login name and password, your desired file name for the scanned image, the e-mail address to send the filing report, and check if you wish to create a subfolder on the screen.
- 6. Touch the **Scan** tab to prompt the **Scan Settings** screen. Change the file format and the compression if they are not your ideal choice. (For information about the setting, please see the setting descriptions below.)
- Press the B&W Start button to send your document(s) in black and white, or the Color Start button to send your document(s) in color.

Folder

Setting Descriptions

Basic					
ltem	Description				
Resolution	Choose scanning resolution for your scanned document.				
	The higher the resolution, the greater details for the				
	scanned image yet it requires more disk space.				
	Choice: 75, 100,150, * 200, 300, 400, 600 dpi.				
Original	Choose your original paper size.				
Size	Choice: * A4, Letter, A5, B5, Legal. Note: The Legal				
	option is only for ADF scan.				
lmage	If your original document is too light or too dark, you can				
Density	use this option to adjust the density level.				
	Choice: 1, 2, 3, * 4, 5, 6, 7				
Bind	Multi-batch document scanning from the ADF or Multi-page				
	scanning from the flatbed can be enabled. Press the Bind				
	button when loading more than 50 pages on the ADF or				
	more than one page on the flatbed. After scanning the 1^{st}				
	batch or 1^{st} page, a dialog box will pop up enquiring if you				
	wish to perform continue scan. Choose Bind to scan next				
	batch or page of document or End to stop scanning.				
Server Option	15				
Login Name	If you are a registered user with a different login name				
	displayed on the Server Options screen, please enter your				
	own login name here.				
Password	Enter your own password of the destination server if you				
	are a registered user yet with a different login name				
	displayed on the screen.				
File Name	Enter your desired file name if you wish to create a different				
	file name that is previous set in the folder. Using				
	#Y#M#D#h#m#s#n makes file name change as time goes.				
	(Y), M, D, h, m, s, and n represent year, month, date, hour,				
	minute, second and series number respectively.) For				
	example, type file name: test#D#n will bring your filing file				
	name as test0500001				

Report to	Enter an e-mail address if you wish to send the filing report			
E-mail	to the e-mail.			
Create a	Choose ON to enable the server to create a subfolder when			
Subfolder	sending the scanned image to the destination server.			
	(Check if you are authorized to write under the destination			
	server.)			
	Choice: ON, * OFF			
* Factory Defa	ult			

Scan Options				
ltem	Description			
Color	File format for documents to be sent in colors via filing			
	from the product.			
	Choice:			
	1. File Format: * PDF, JPEG, TI FF, JPEG_EXI F,			
	MTIF(Multi-page TIFF)			
	Note: Choose MTIFF or PDF when you need to scan			
	multi-page document and convert it to a single image			
	file.			
	2. Compression Level: * Low, Medium, High			
	(If TIF or MTIFF is selected as a file format, the			
	compression Level is defined as Raw only.)

Adding A New Folder

If your location to save current scanned document is not in current Folder list, add a new one by touching the **Add New Folder** button. This prompts the following **New Folder** screen. The **New Folder** screen contains server and scanning parameters that are almost the same with the parameters of Folder Template except the Folder Name. Refer to the following table to enter the relevant value and then finally touch the **B&W Start** or **Color Start** button to start sending your document.

New Folder	If setup is finished, p	press "Start" to go.	
Server	Server Options	Scan Options	Cancel
Folder Name			
Target URL			
FTP://			
Port #			
21			

Note:

After sending the scanned document to your target server, the new folder will be automatically added to the folder list in the **Folder** main screen.

Server Information				
ltem	Description			
Folder Name	Enter name of your folder.			
Target URL	Please choose the type of protocol of your filing server in the first field. Choice includes * FTP, HTTP, CLFS, HTTPS. Please enter the target URL in the second field. You can enter either the domain name or the IP address with the directory path. Note that the directory will be varied due			
	to different protocol. The route starts from the root directory in FTP, HTTP, HTTPS, and CIFS. For example, ftp://, http://, and file:\ https://. Important note: You must use this CIFS filing format, file:\\IP\computer			
	name\folder name, to set CIFS URL.			

Port #	Enter the port number for the server which you want				
	to store your scanned document.				
	Default value: FTP:21, HTTP:80, CIFS:139,				
	HTTPS:443				
	If the default value is different from the real case,				
	input the correct port number in this field. Touch				
	anywhere on the "Port" field to bring up the soft				
	keyboard to enter the text.				
Server Options					
Login Name	Enter the login name of the destination server.				
Password	Enter the password of the destination server.				
File Name	Enter the file name for your scanned document without				
	extension. Using #Y#M#D#h#m#s#n makes file				
	name change as time goes. (Y). M. D. h. m. s. and n				
	represent year, month, date, hour, minute, second and				
	series number respectively) For example, type file				
	name: test#D#n will bring your filing file name as				
	test0500001				
Benort to	Entor an a mail addross if you wish to cond the filing				
F-mail	report to the e-mail.				
Create a	Choose ON to enable the server to create a subfolder				
Subfolder	when conding the scanned image to the destination				
Subioluei	conver (Check if you are authorized to write under				
	the destination conver)				
	Chainer ON + OFF				
Occur Ontions	Choice: ON, ^ OFF				
Item	Description				
Paner Size					
	Choose your document size.				
	Choice: * A4, A5, B5, Letter, Legal Note the legal				
	size is available from the ADF only.				
Resolution	The scanning resolution for your scanned document.				
	The higher resolution makes a clearer image, but				
	occupies more space.				
	Choice: 75, 100, 150, * 200, 300, 400, 600 (dpi)				
Image Density	Choose the density level.				
	Choice: 1, 2, 3,* 4, 5, 6, 7. (1 means the weakest				
	density while 7 means the strongest density.)				

Color File	File format for the scanned documents to be sent in colors via filing from the product.			
Format	Choice:			
	1. File Format: * PDF, JPEG, TIFF, JPEG, EXIF.			
	MTI F(Multi-page TI FF)			
	Note: Choose MTIFF or PDF when you need			
	to scan multi-page document and convert it			
	to a single image file.			
	2. Compression Level: * Low, Medium, High			
	(If TIFF or MTIFF is selected as a file format, the			
	compression Level is defined as Raw only.)			
B&W File	File format for documents to be sent in black and white			
Format	via filing from the product.			
	Choice:			
	1. Multi-level B&W/ Gray: ON,* OFF			
	2. File Format: * PDF, MTIFF(Multi-page TIFF),			
	TIFF			
	3. Compression Level: * Low, Medium, High			
	(If you choose ON from Multi-level B&W/Gray, the file			
	formats include PDF, JPEG, TIF, MTIF, and JPEG_EXIF.			
	If TIF or MTIFF is selected as your file format, the			
	compression Level is limited to Raw only.			
	If you choose OFF from Multi-level B&W/Gray, the file			
	formats include PDF, IIF, and MIIF. The compression			
	Level of MILE or ILE includes G3, G4, and Raw.)			
* Factory Default				

Faxing Your Scanned Document

Important!

Before faxing your document through the MFP, make sure that you have installed a telephone line on the MFP. Refer to Chapter 2 on how to connect a telephone line.

Basic Operation

Using the default settings

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- 2. Press the **Facsimile** button on the control panel to prompt the **Fax** main screen.

Fax			Destination	
	Basic	More Setting	Bind O	
[i][18:56]				The Phone Book button
		- Pause	←	 The Backspace button
Quality Fine	Paper Size ▼ A4	Image Density		

- **3.** Enter the fax number with the numeric keypad on the control panel.
 - Or you may touch the Phone Book button to bring up the telephone book and then select the number from the list.
 - You can also select multiple fax numbers at one time. To enter next fax number, press the Down-arrow key at the right of the Phone
 Number field after finishing entering the first fax number.
- 4. Press the **B&W Start** button to send your document(s) in black and white.

Facsimile

Note:

- ✓ If you make a mistake during the process, press the Stop button on the control panel to cancel the operation.
- ✓ Up to 20 characters can be entered in the Fax Number field and some characters such as "-", "#", "*", "P" (a 2-second pause) are supported.
- When entering a phone number from the numeric keypad, include any PSTN access number (number to access the public telephone line, usually a 9 or 0), area codes, and the telephone number.
- ✓ The machine allows broadcast faxing. This means it allows you to send the scanned document(s) to multiple fax numbers. After finishing entering your first fax number, press the **Down Arrow** button on the LCD-display to enter your next fax number in the next line. Up to 200 fax numbers can be entered and broadcasted at one time.
- ✓ If you wish to send multiple pages from the flatbed or more than one load (50 pages) from the ADF, press the Bind button first. The button will be highlighted and after finishing scanning your first page or first load, you will be prompted to enquire if you wish to bind next page or next load. Place your next page on the flatbed or next load on the ADF and choose **Bind** to continue. After finishing scanning all your pages, choose **End** to close the dialog box.

Advanced Operation

Using Special Settings

- 1. Place your document(s) with text **FACE UP** in the ADF or **FACE DOWN** on the glass.
- Facsimile
- 2. Press the **Facsimile** button on the control panel to prompt the **Fax** main screen.

Fax	Basic	More Setting	Bind Destination	
[[18:56]				The Phone Book button
	[- Pause -	←	The Backspace button
Quality Fine ▼	Paper Size A4	Image Density		

3. Enter the fax number with the numeric keypad on the control panel.

- Or you may touch the Phone Book button to bring up the preset telephone book and then select it from the list.
- You can also select multiple fax numbers at one time. To enter next fax number, press the Down-arrow key at the right of the Phone
 Number field after finishing entering the first fax number.

Note the **Destination** button on the upper right corner will display the number of recipients you have chosen.

4. Check if the quality, paper size, or image density meets your requirement. If not, change the setting to suit your needs. (For more information about the settings, refer to the setting descriptions below.)

- Click the More Setting tab to prompt the More Setting screen. Check if you wish to use Delay Send, Polling Reception or the Overseas Mode. (For more information about the settings, please see the setting descriptions below.)
- 6. Press the **B&W Start** or the **Color Start** button to send your document(s) in black and white.

	07/12 12:00	1453456789		01
				01

Using the Phone Book

To select a fax phone number or a fax group,

Ś

1. In the Fax main screen, press the Phone Book icon to prompt the Phone Book screen.

Fax			Destination
	Basic	More Setting	Bind O
<pre>[18:56]</pre>			
		- Pause -	-
Frequent abc def	ghi jkl mr	no pqrs tuv wxy	z Misc. Recent
#1 Andy Smith 452344467	#3 Customer 2 (group)	#4 Candy (group)	001/004

2. To choose a phone number or a group, you may use

-Touch the name of an individual phone number or a group shown in the screen that you wish to fax your scanned document. Touch another phone number or group for multiple selections.

-If your receiving name of the phone number of group does not appear in the screen, you may find the name by touching the **Characters** button for a quick search.

-Or you may touch the **Frequent** or the **Recent** button to show the 10 frequently used or 10 recently used names of phone numbers or groups.

Scanning Your Documents

System Requirements

- IBM compatible PC (Pentium or later);
- Microsoft Windows 2000, Windows XP, Windows Vista
- A USB (universal serial bus) port
- At least 100M bytes of free hard disk space
- At least 128M bytes of system memory
- A VGA monitor
- A CD-ROM drive

Installation procedure

Important:

To ensure the scan function work properly, please install the scanner driver **FI RST** before connecting the USB cable to the computer.

Installation procedures are as follows:

- 1. Connect the power cable and turn on your product.
- 2. Start Microsoft Windows.
- 3. Insert the supplied CD-ROM into your CD ROM drive.
- The CD-ROM will auto launch on most systems. However, if your system does not support auto launching CD-ROMs, press the Start button, choose RUN, type d:\driver\setup.exe (d: the CD-ROM drive in use), and then click OK.
- 5. Follow the on-screen instructions to complete the driver installation.
- 6. Connect the **square end** of the USB cable to the USB port of your product. Connect the **rectangle end** to the USB port of your computer as illustrated below.

- 7. The computer should detect a new USB device and prompt a "**New Hardware Found**" message.
- 8. In Windows 98SE or Windows ME, confirm that the "Search for a better driver." is selected and click the "Next" button.

In Windows XP, click the **Next** button to continue. When the XP certification screen appears, click **Continue Anyway** to complete the installation.

9. Follow the on-screen instruction to complete the installation.

Note:

To uninstall the scanner driver in Windows 2000/XP, be sure to keep your scanner connecting to your computer.

Scanner Operation

- 1. Start your scanning application.
- 2. Pull down the File menu and choose Select Source.

If the **Select Source** command is not available on the **File** menu, see your application's user's guide to determine how the TWAIN link is used. A dialog box with a list of scanning sources appears.

3. Select the model name of your product.

You need to select the source only once, unless you want o choose another scanner.

- 3. Place the document **FACE DOWN** on the document glass or **FACE UP** in the ADF.
- 4. Pull down the File menu and choose Acquire.

A dialog box containing scanning features appears.

5. Select the scanning method you want to use on the **Scan Method** drop-down menu.

6. Select the mode you want to use for your scans on the **Image Type** drop-down menu.

- 7. Select a scanning resolution on the **Resolution** drop-down menu.
- 8. Select the setting for the scanning features (e.g. Sharpen, Descreen, etc.) that you want to use.
- 9. Click on the **Preview** or **Scan** button to preview or scan you documents.

A Glance of the User Interface

1. Scan Method	Choice: ADF/Multipage, Flatbed.
2.Image Type	Choice: Black & White, Halftone1-4, Diffusion, 8-Bit Gray, 24-Bit Color, 48-Bit Color.
3. Resolution	Choice : 50, 72, 100, 144, 150, 200, 300, 600, 1200 (dpi).
4. Brightness:	Adjust the brightness level from -100 to $+100$.
5. Contrast	Adjust the contrast level from -100 to $+100$.
6. Further Tools	Descreen, Sharpen, Color Adjustment, Auto Level, Advanced Settings (From left to right).
7. Invert	Reverse the color of your scanned image.
8. Mirror Function	Flap your image.
9. Preview Auto Area	Resize your scanned area.
10. Paper Size	Select your paper size from Card 4"x2.5", Photo 5"x3.5", Photo 3.5"x5", Photo 4"x6", Photo 6"x4", A5, B5, A4, Letter, Legal, scanner maximum.
11. Measuring Unit	Choice: cm, inch, and pixel.

Using the Basic Features

Choosing Your Scan Method

Choice:

Flatbed: Used to scan a single page on the flatbed, for example, pages from newspaper clipping, paper with wrinkles or curls.

ADF/ **Multipage:** Select this setting if you need to scan multi-page document from the <u>a</u>utomatic <u>d</u>ocument <u>f</u>eeder (ADF).

Selecting a Proper I mage Type

Black & White	Choose B&W if your original contains only B&W text, pencil or ink sketch.	
Halftone	Halftones are reproduction of image that gives the illusion of image that gives the illusion gray. An example of halftone imaged would be the pictures you see in newspapers.	
8-bit Gray	8-bit Gray images contain actual shades of gray.	
8-bit Color	8-bit Color image provides 256 levels of color hues.	
24-bit Color	Choose 24-bit Color if you wish to scan a color image.	

Determining a Proper Resolution

A proper resolution reproduces a clear image with good details. The resolution is measured by dots per inch (dpi).

Adjusting the Brightness and Contrast

1. Brightness

Adjusts the lightness or darkness of an image. The higher the value, the brighter the image.

2. Contrast

Adjusts the range between the darkest and the lightest shades in the image. The higher the contrast, the bigger the different grayscale.

Enlarging Previewed I mage

Enlarge your previewed image to the max. of the preview window. Note this function only enlarging your preview image. This does not enlarge your real image.

Inverting and Selecting Your Image

The invert command reverses the brightness and the color in the image. For color images, each pixel will be changed into its complementary color at the command of Invert.

Mirror Function

Reverse the right and left side of your image.

Auto Select I mage

Automatically set the whole image as your scan area. (Or you may resize the area by "drag and drop" diagonally.)

Enhancing Your Image

1. Descreen

Eliminates the *moire patterns*^{*} commonly found in printed matter.

2. Sharpen

Sharpen the scanned image.

Before Descreen

Before Sharpen

After Descreen

After Sharpen

* **Moire pattern:** An undesirable pattern in a color printing resulting from incorrect screen angle of overprinting halftone.

Color Adjustment

Adjusts the color quality of the image so that it comes close to the original. This function uses default parameters to adjust the image.

Normal

After Color Matching
Auto Level

Automatically adjusts the highlight and shadow areas of the scanned image to optimize your image.

Normal

After Auto Level

Using the Advanced Features

The Switch button

- Click the button to pop up the advanced settings bar at the right side. The advanced settings include Highlight/Shadow, Hue/Saturation/Lightness, Curve, Color Balance, Color Drop-out.
- 2. The Advanced Settings bar

Adjusting Highlight/ Shadow Levels

Highlight refers the lightest point in a scanned image while shadow refers the darkest point. Using Highlight and Shadow tool together allows you to extend the range of color and reveal more details in a gray or color image.

- 1. Shadow: The darkest point of an image.
- 2. Gamma: The midtones of the image.
- **3. Highlight:** The lightest point of an image.
- **4. Pointer:** Move the pointer to change the value.

When the value of gamma changes, the image changes accordingly.

When the value of highlight and shadow change, the image changes accordingly.

Highlight: 255/Shadow: 0(Normal)

Highlight: 200/Shadow:0

Highlight: 210/Shadow:10

Highlight: 255/Shadow: 50

Adjusting the Brightness Curve

Adjusts the midtones of the image without dramatically altering then lightest and the darkest areas.

When the curve is moved up or down, the image turns brighter or darker.

Changing Color Hue/ Saturation/ Lightness

Improve your image by changing the level of hue/saturation/lightness.

	Hue / Saturation / Lightness	×
(1)	Hue : 0	Reset
(2)	Saturation : 0	ОК
(3)		Cancel

(1).	Hue	Adjust the hue by moving the triangle to the right or left. (Note the level of intensity for the color will be changed simultaneously when the hue adjustment is made).
(2).	Saturation	Move the triangle to the right to increase the saturation level or to the left to decrease the level. The level of saturation decides if the color is pale or rich.
(3).	Lightness	Increase the lightness by moving the triangle to the right or to the left to decrease the lightness.

Move the Saturation pointer to the right, the color turns rich.

Using Color Balance

Move the pointer toward Red, the image turns into a reddish hue.

The Color Balance allows you to obtain an optimal image quality.

Move the pointer toward Green, the image turns into a greenish hue.

Color Drop-out

Click the button and a dialog box in below will be displayed. This dialog allows you to remove one of the R (Red), G (Green), or B (Blue) color channel. This function is particularly useful when you need to convert text using OCR software.

Note that this function supports only black & white and gray image. Therefore, be sure to choose any black & white or gray image type while applying this function.

The effect on image after removing the G channel

The effect on image after removing the R channel.

Custom Settings

Click the **Custom Settings** button to access a dialog box where you can save your scan settings and configuration settings. There are two tabs: Scan Settings and Configuration Settings.

Scan Settings

The **Scan Settings** tab allows you to save your scanning feature settings in a file, load an existing file, or delete an existing file.

Custom Settings	nfiguration Settin	igs			<u>?</u> ×
File Name 1.av2 default.av2	Image Type 24-Bit Color 24-Bit Color	Scan Method ADF/One-p ADF/One-p	Resolution 300 300	Image Size 7.80 × 13.54 8.50 × 14.00	
File Na	me :		Yuuuud	Save Load	
				Close	Apply

Saving a scan settings file

Type a name for your settings in the **File Name** text box and click the **Save** button. Your settings will be saved and the file name will appear in the list box.

Using a scan settings file

You can use an existing settings file. Right-click the file name for the settings you want to use and click the **Load** button. The settings in the file will automatically be specified in the scanning features dialog box.

Deleting a scan settings file

Right-clicks a file name and press the **Delete** button the computer keyboard to delete the file. Note you cannot delete the default scan settings file default.av2.

Configuration Settings

The **Configuration Settings** tab allows you to customize some special settings.

Custom Settings	? ×
Scan Settings Configuration Settings	
L	
Energy Saving Mode:	60 ★ Minutes
Show Hints	
Color Format	
□ sRGB	
	Close

Energy Saving Mode—checks the **Enable** box to enable energy savings. You can specify a time delay in the **Minutes** box. Click the **Apply** button to save the changes. The default setting is 15 minutes.

Hint Setting—check the **Show Hints** box if you want to have flags that show the name of an item appear when you place the mouse cursor on an item in the dialog box. Click the **Apply** button to save the changes.

Using Other Tools

1. Measuring Unit A reminder of the measuring system in use. By clicking the button, you can change the measuring unit.

Choice: Inch, cm, Pixel.

2. Paper Size Provide frequently used scan sizes.

Choice: Card 4"x2.5", Photo 5"x3", Photo 6"x4", B5, A5, A4, Letter, and Scanner Maximum.

- **3.** I mage Size Display image size for the scanned area.
- **4.** Lock I mage Fix your output width and height.

0229	 Your fax machine receives wrong fax message from the remote fax machine. Please try again or use another line. The line quality is poor. Please try again or use another line. If the error still occurs, please call service. 				
0230	 Your fax machine receives wrong fax message from the remote fax machine. Please try again or use another line. The line quality is poor. Please try again or use another line. If the error still occurs, please call service. 				
0234	 Memory Full 1. Check if the printer is connected. If the printer is not connected, the scanned image will be stored in MFP's memory. 2. Your printer may have error message. Check and solve the problems. 3. Check Send Later jobs. These jobs are waiting to be transmitted in memory. Carry out these transmissions to free some memory. 4. Current memory is not enough to process the scanning job. Press "Start" to send the pages successfully scanned or "Stop" to abort the job. You may choose a lower resolution or try to send fewer pages at once. 				
0237	 Your fax machine receives wrong fax message from the remote fax machine. Please try again or use another line. The line quality is poor. Please try again or use another line. If the error still occurs, please call service. 				
0238	 Your fax machine receives wrong fax message from the remote fax machine. Please try again or use another line. The line quality is poor. Please try again or use another line. If the error still occurs, please call service. 				

Clearing a Paper Jam

In the event of a paper jam, follow the procedures below to remove the paper:

- 1. Gently open the ADF front cover to the left.
- 2. Carefully pull the paper out of the ADF unit.
- 3. Close the ADF front cover. The product is now ready to use.

ADF Front Cover

Removing the Abnormal Line Image

When the scanned image is with abnormal lines on it, clean the white area on the glass as indicated below with a clean lintless cloth.

7 Maintaining Your Machine

Cleaning the Glass

The product is designed to be maintenance-free. However, it still needs to be cleaned occasionally to ensure optimum image quality and performance.

To clean the glass,

- 1. Open the document cover as shown below.
- 2. Dip a soft clean cloth with isopropyl alcohol (95%).
- 3. Gently wipe the document glass and the white sheet beneath the document cover to remove the dust or any toner particles.
- 4. Close the document cover. The product is now ready for use.

- 1. Document Cover
- 2. Document Glass

Cleaning the LCD-display

To clean the display surface, use a soft cloth, either dry or moistened with neutral detergent or ethanol. Do not use any organic solvents, acid or alkali solution.

Cleaning the ADF

From time to time the pad assembly and feeding rollers may become contaminated with ink, toner particles or paper dust. In this case the product may not feed documents smoothly. If this occurs please follow the cleaning procedures to return your machine to its original state.

- 1. Lift both end of the Input Paper Tray to remove it.
- 2. Moisten a clean lintless cloth with isopropyl alcohol (95%).
- 3. Gently open the ADF front cover. Wipe the feeding rollers from side to side. Rotate the rollers forward with your finger and repeat the above cleaning procedures until the rollers are clean. Be careful not to snag or damage the pick springs.
- 4. Wipe the pad in the direction from top to bottom. Be careful not to hook the pick springs.
- 5. Close the ADF unit. Your machine is now ready to use.

Replacing the ADF Snap-in Pad

After scanning approximately 50,000 pages through the ADF, the pad may be worn out and you may experience problems with document feeding. In this case, it is highly recommended to replace the pad module with a new one. For ordering the pad module, please consult your nearest dealer and follow the procedure below to replace it.

Disassembling Procedure

- 1. Gently open the ADF front cover to the left.
- 2. Press both sides of the ADF snap-in pad inwardly with your fingers to pull out the ADF snap-in pad from the slot.

Assembling Procedure

- 1. Take out the ADF pad module from the box.
- 2. Press both arms of the ADF snap-in pad module inwardly with your two fingers.
- 3. Place it into the holes until it snaps into place.

Appendix

Managing the Address Book

The product's Java-Manager is a convenient and effective browser-based tool to manage the address book of the product remotely. Since only the administrator can manage the address book, it is highly recommended that the administrator read this chapter before manage the product.

Adding an E-mail Address

To add an e-mail address,

- 1. Start your browser, Microsoft I.E. 5.0 or higher, or Netscape Communicator 6.0 or higher, or Mozilla Firefox.
- 2. Type IP address of the product in the URL field. For example, http://10.1.30.83. The product's embedded web page appears as shown below.

3. Click **Address Book Manager** and you will be prompted to enter a password.

Login	
Password:	Login Cancel

4. Click **Login** since the machine is shipped with no specific login name and password to prompt the **Address Book Manager** screen. (You can assign your password later.)

2. Click **Delete** to erase the group. A Confirmation dialog box appears to confirm your deletion. Click **OK** to delete or **Cancel** to exit.

3. Click **Update** to permanently save all the latest data on the product, or **Exit** to leave the screen without saving any latest data.

Note:

You can make multiple selections by choosing one group and then pressing the Shift or the Ctrl key to delete them at once. With the Fax Phone Book, you can send your scanned documents simultaneously to multiple fax machines to increase your efficiency. The Fax Phone Book allows you to create up to 200 phone numbers and 20 phone groups to save the time entering your number.

Adding a New Fax Number

To add a new fax number,

- 1. Start your browser, Microsoft I.E. 5.0 or higher, or Netscape Communicator 6.0 or higher, or Mozilla Firefox.
- 2. Type IP address of the product in the URL field. For example, http://10.1.30.83 The product's embedded web page appears as shown below.

Web Image Monitor IS800C				
Menu	Model: IS800C			
Information General	System F/W Version: 0.38

Member: Numbers:	Customer 1 customer 2 customer 3 006/007/008/	÷	001: market 002: finance 003: human resource 004: abc 005: my distributor 006: customer 1 007: customer 2 008: customer 3 009: 010: 011: 012: 013: 014: 015: 016: 017: 018: 017: 018: 019: 021: 022:	

4. Click **Add** to save your settings and return to the **Phone Group List** screen.

Modifying a Phone Group

To modify a phone group,

- 1. In the **Phone Group List** screen, click the group which you wish to modify.
- In the Modify a Group Set screen, enter your changes and then click Update to save your settings and return to the Phone Group List screen.

Deleting a Phone Group

To delete a phone group,

- 1. In the **Phone Group List** screen, click **Delete** beneath the group number which you wish to delete.
- 2. A **Confirmation** dialog box is prompted. Click **Yes** to delete or **No** to cancel.

This chapter is specifically targeted to the persons who are responsible for the administration of the product. If you are the administrator of this product, please read this chapter before using the product.

This chapter describes how to set up the Account Management. If you wish to assign local users and their privileges in using the individual product feature such as the Copy, E-mail, Folder, or the Fax function, you must set up accounts in the Account Management. The Account Management is available only through the product's embedded web page.

After the administrator has set up accounts in the Account Management and restarted the product, a user is required to create login name and password and quota to use the product. The access to the Account Management is blocked by the administrator password. It is recommended that an administrator create a password before performing these activities.

Setting up Account Management By the Product's Web Page

- 1. Start your browser, Microsoft I.E. 5.0 or higher, or Netscape Communicator 6.0 or higher, or Mozilla Firefox.
- Type IP address of the product in the URL field. For example, http://10.1.30.83. The product's embedded web page appears as shown below.

3. Click **Account Management** and you will be prompted to enter a password.

Login	
Password:	Login Cancel

4. Click **Login** since the machine is shipped with no specific login name and password to prompt the Account Management dialog box. (It is suggested to assign a password later for effective management.)

ccount Management				
Basic Settings Account]	List			
Basic Settings	Update			
Type:	No	-		
Server URL:				
Port:	0			

5. In the Basic Settings tab, select your security type and then enter the server's URL in the Server URL field, type in your server port in the Port field. Finally click Update to save your settings. You may refer to the following table for the details of each setting:

Basic Setting	Basic Settings				
ltem	Description				
Туре	Choose your preferable authentication type for account				
	management.				
	Choice: None, Local, HTTP, LDAP, SMTP				
	"No" means no account management will be applied.				
	"Local" means using the product as the authentication type, and				
	the name and password entered in the Account management				
	are saved in the product memory.				
	"HTTP, LDAP, or SMTP" means using a HTTP, LDAP, or SMTP				
	server as the authentication type.				
Server	Assign the URL of authenticating SMTP, HTTP or LDAP server.				
Information	Touch anywhere on the URL field to bring up the soft keyboard				
IP or URL	to enter the text.				
Port #	Enter the port number if you choose HTTP, LDAP, or SMTP as				
	your authenticating server. Default value: http:80,				
	CI FS:139, https:443				

Once you have chosen either one of the Local, SMTP server, LDAP server, or HTTP server as your security type. You need to set each local user's login name and password. To create a new account, click the Account List tab to open the following Account List dialog box, as shown below.

Account Management	
Rasic Settings Account List	
Tiecount Inst	
ccount List	
aaa bbb bess	New Account
2222	Copy Account
	Edit
	Delete

7. Click the **New Account** button to open the **New Account** dialog box, as shown below.

New Account			Jpdate Cancel
Name:		Password:	
Description:			
	Function	1	
🗖 Сору	🗖 E-mail	🔲 Folder	🗖 Facsimile

8. Set up your user name and password respectively in the **Name** and **Password** fields. The name and password are case-sensative and up to 64 characters can be entered in the **Name** field and up to 16 characters can be entered in the **Password** field. Fill the **Description** field if necessary.

9. Define the user's privilege in using the product.

- Function

Check the name of function to be allowed to perform.

For example, the administrator allows the user, Bess, to perform the Copy, E-mail, and Fold function, but does not allow him to use the Facsimile function. The **New Account** settings are demonstrated as below.

New Account		Update	e Cancel
Name: bess		Password:	
Description: marketing]	
	Function	1	
🔽 Сору	🔽 E-mail	🔽 Folder	🗖 Facsimile

10. Click **Update** to save the settings and return to the **Account List** screen.

Account Management	
Basic Settings Account List	
Account List	
888 LLL	
bess	New Account
2222	Copy Account
	Edit
	Delete

Copy Account:

If you wish to permit other users to use the same privileges as one user, simply select the account from the account list and then click the **Copy Account** button to prompt the **Copy Account** screen. You only need to give a new name and password for the new user without retyping the rest. Click **Update** to save the settings or **Cancel** to return to the **Account Management** screen without saving any latest changes.

Edit:

If you wish to edit a specified local user, choose the account from the account list and then click the **Edit** button to prompt the **Edit Account** screen. Modify the required changes and then click **Update** to save the settings or **Cancel** to return to the **Account Management** screen without saving any latest changes.

Delete:

If you wish to delete a current local user, select the account from the account list and click the **Delete** button. A warning message appears to confirm your deletion. Click **OK** to confirm or **Cancel** to exit. Click **Update** to save the settings or **Cancel** to return to the **Account Management** screen without saving any latest changes.

Note:

You can make multiple selections by choosing one group and then pressing the Shift or the Ctrl key to delete them at once.
