From October 2001 production, printer controller product codes have corresponded to the duplex model of the K-C1. For this reason, the product codes have been changed as follows:

OLD	NEW
B405-10	B405-50
B405-14	B405-54
B405-15	B405-55
B405-17	B405-57
B405-22	B405-62
B405-24	B405-64
B405-26	B405-66
B405-27	B405-67

The new printer controllers have all the functions of the older ones. In addition, the marketing group has not sold the old controllers since the launch of the duplex model K-C1. From now on we will issue MBs only for the new printer controllers.

The differences between old and new are as follows:

Description	Old P/N	New P/N
Controller Board	B4055170	B4055175
Operation Manual	B4058607	B4058857

We will also issue an MB concerning the above information.
