# Symbols, Abbreviations and Trademarks

---

## Symbols, Abbreviations

---

This manual uses several symbols and abbreviations. The meaning of those symbols and abbreviations are as follows:

Symbol	What it means
	Clip ring
	Screw
	Connector
	Clamp
	E-ring
	Flat Flexible Cable
	Timing Belt
SEF	Short Edge Feed
LEF	Long Edge Feed
K	Black
C	Cyan
M	Magenta
Y	Yellow
B/W, BW	Black and White
FC	Full color

[A] Short Edge Feed (SEF)

[B] Long Edge Feed (LEF)

---

## Trademarks

---

Adobe, Acrobat, PageMaker, PostScript, and PostScript 3 are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Ricoh Company, Ltd. is under license.

Firefox and Thunderbird are registered trademarks of the Mozilla Foundation.

Dropbox is a registered trademark or trademark of Dropbox, Inc.

Google, Android, and Chrome are trademarks of Google Inc.

Java is a registered trademark of Oracle and/or its affiliates.

Macintosh, OS X, Bonjour, Safari, and TrueType are trademarks of Apple Inc., registered in the U.S. and other countries.

Microsoft, Windows, Windows Server, Windows Vista, Internet Explorer, and Outlook are either registered trademarks or trademarks of Microsoft Corp. in the United States and/or other countries.

PictBridge is a trademark.

QR Code is a registered trademark of DENSO WAVE INCORPORATED in Japan and in other countries.

The SD and SD logo are trademarks of SD-3C, LLC.

UNIX is a registered trademark of The Open Group.

UPnP is a trademark of UPnP Implementers Corporation.

This product includes RSA BSAFE® Cryptographic software of EMC Corporation. RSA and BSAFE are registered trademarks or trademarks of EMC Corporation in the United States and other countries.

The proper names of Internet Explorer 11 is as follows:

- Windows® Internet Explorer® 11

The proper names of the Windows operating systems are as follows:

## Changes from the Previous Machine

- **Antistatic Control**

Metal cover [A] for antistatic control has been added to the transport sensor.

When replacing the sensor, this cover will also be used after replacement, so remove it from the old sensor. When you do so, be careful not to deform or damage anything.

d0bqm1010

## Specifications

## Mechanism

---

### Paper Feed Separation Mechanism

---

The feed system is a RF paper feed system. The paper feed unit has a pick-up roller, feed roller, and friction roller. The feed roller and friction roller are high durability rollers.

---

### Drive Mechanism

---

The pick-up roller and feed roller are driven by the paper feed motor (M2). The transport roller is driven by the paper transport motor (M1). The friction roller is not driven.

---

### Separation Roller/Pick-up Roller Release Mechanism

---

When the right tray is set, the friction roller comes in contact with the feed roller. The pick-up roller touches the top sheet of paper that is to be transported.

When the right tray is opened, contact between the feed roller and friction roller, and contact between the pick-up roller and paper are released.

---

### Paper Feed Transport Mechanism

---

In order to feed the paper at regular intervals, there is a paper feed sensor (S1) between the pick-up roller and the feed roller, and this sensor is used to adjust the paper feed timing.

- 1.** The paper feed motor (M2) turns ON, and feeds the first sheet of paper.
- 2.** To prevent the next sheet from being transported, the pick-up solenoid (SOL1) turns ON just before the trailing edge of the first sheet passes through the pick-up roller, and the pick-up roller leaves

the paper surface.

- 3.** Just before the trailing edge of the first sheet leaves the paper feed roller, the paper feed motor turns OFF.

However, at this time, if the paper feed sensor (S1) does not detect paper (the second sheet is not transported to the paper feed sensor position), the paper feed motor (M2) does not turn OFF. Pre-feed is performed as follows:

1. The pick-up solenoid (SOL1) turns OFF, and the second sheet of paper is transported to the paper feed sensor position.
2. When the trailing edge of the second sheet passes the feed roller, the paper feed motor (M2) is turned OFF. The pick-up solenoid (SOL1) remains OFF.

- 4.** Just before the trailing edge of the first sheet passes the feed roller, the pick-up solenoid (SOL1) turns OFF. The pick-up roller is brought into contact with the paper surface.

- 5.** When the first sheet has been transported a specified distance by the downstream transport roller, the paper feed motor (M2) turns ON to feed the second sheet.

---

### Tray Bottom Plate Lift

---

When the paper feed tray is set in the main frame, the tray set sensor switch turns ON. The coupling of the tray lift motor (M3) connects with the shaft at the rear of the tray, and the motor rotates to lift the tray bottom plate. The tray bottom plate rises until the paper surface lifts up the pick-up roller and the upper limit sensor (S4) turns OFF (the sensor is blocked). The tray is now ready to feed.

When the paper feed tray is removed, the coupling is disengaged, and the bottom plate descends. At this time, the tray lift motor (M3) rotates until the coupling returns to the home position.

1.Detailed Descriptions

No.	Description	No.	Description
1	Tray lift motor (M3)	3	Tray shaft (rear)
2	Coupling	4	Tray bottom plate

d0bqc9028a

No.	Description	No.	Description
1	Upper limit sensor (S4)	2	Pick-up roller

Paper Size Detection

The end fence is linked mechanically with the size detection actuator. When the end fence is moved, the size detection actuator also moves.

When the paper feed tray is set, 4 paper size detection switches turn ON/OFF depending on the

position of the size detection actuator. Paper size is detected by a combination of these switches.

d1359620

No.	Description	No.	Description
1	End fence	3	Size detection actuator
2	Paper Size Detection Switch (SW1)	4	Tray set switch (SW2)

### Paper size detection switch operation

Paper size	Size detection switch			
	SW4	SW3	SW2	SW1
SRA3 (12"×18")	1	0	1	0
A3 (DLT)	0	1	0	0
B4 (LG)	0	0	1	1
	0	1	1	1
A4_SEF	1	1	1	0
LT_SEF	1	1	0	0
B5_SEF	1	0	0	0
A4_LEF (LT_LEF)	0	0	0	1
B5_LEF (Exe_LEF)	0	0	1	0
A5_LEF	0	1	0	1

### Remaining Paper/Paper end Detection

#### Remaining paper detection

Remaining paper in the paper feed tray is detected by a combination of ON/OFF status (contact/non-contact) of contact-type remaining paper sensors (boards) CN-3 and CN-5.

When the amount of remaining paper decreases, and the tray lift motor rotates, the remaining paper sensors CN-3 and CN-5 in the motor are turned ON/OFF.

The following 4 levels of remaining paper can be detected.

## 1.Detailed Descriptions

Remaining paper	100%	70%	30%	10%
CN-3	OFF	ON	ON	OFF
CN-5	OFF	OFF	ON	ON
Control panel display	4 bars	3 bars	2 bars	1 bar

### Paper end detection

When there is no more paper in the paper feed tray, the paper end feeler turns ON the paper end sensor (S3) (the sensor is unblocked).

No.	Description	No.	Description
1	Paper end sensor (S3)	3	Slot
2	End feeler		

## 2. Replacement and Adjustment

---

### **The Aim of Anti-tip Components and Precautions**

The anti-tip components are necessary for meeting the requirements of IEC60950-1, the international standard for safety.

The aim of these components is to prevent the products, which are heavy in weight, from toppling as a result of people running into or leaning onto the products, which can lead to serious accidents such as persons becoming trapped under the product. (U.S.: UL60950-1, Europe: EN60950-1)

Therefore, removal of such components must always be with the consent of the customer.

Do not remove them at your own judgment.

## 2.Replacement and Adjustment

### Rear Cover

1. Remove the securing brackets.

2. Remove the rear cover [A] (⌚×4).

## Tray Lift Motor (M3)

1. Remove the rear cover ([Rear Cover](#)).
2. Remove the tray lift motor (M3) [A] (⚙️ ×2, 📦 ×1).

d1462727

## 2.Replacement and Adjustment

### Paper Transport Motor (M1)

1. Remove the rear cover ([Rear Cover](#)).
2. Remove the paper transport motor (M1) [A] (🔩×2, 📦×1).

d1462728

## Paper Feed Motor (M2)

1. Remove the rear cover ([Rear Cover](#)).
2. Remove the paper feed motor (M2) [A] (⚙️×2, 🛠️×1).

d1462729

## Controller Board (PCB1)

1. Remove the rear cover ([Rear Cover](#)).
2. Remove the controller board (PCB1) [A] (⌀×4, □×7).

d1462730

## Vertical Transport Sensor (S2), Upper Limit Sensor (S4), Paper End Sensor (S3), Paper Feed Sensor (S1)

### Vertical Transport Sensor

1. Remove the paper feed unit ([Paper Feed Unit](#)).
2. Remove the vertical transport sensor bracket [A] (🔩×1, 📦×1).

d1462196

3. Remove the vertical transport sensor (S2) [A].

d0bqm1009

Metal cover [A] for antistatic control has been added to the vertical transport sensor.

When replacing the sensor, this cover will also be used after replacement, so remove it from the old sensor. When you do so, be careful not to deform or damage anything.

## 2.Replacement and Adjustment

### Paper Feed Sensor, Upper Limit Sensor, Paper End Sensor

1. Remove the paper feed sensor bracket [A].

2. Remove the paper feed sensor (S1) [A].

3. Remove the paper end sensor (S3) [A] (🔧 ×1).

## 2.Replacement and Adjustment

- 4.** Remove the upper limit sensor (S4) [A] (🔧 ×1).

d1462198

## Paper Feed Unit

- 1.** Pull out the paper tray [A].

d146z0073

- 2.** Remove the rear cover [A]. (⌀×4)

d146z0074

- 3.** Remove the right lower cover [A] (hook ×1).

d146z0075

## 2.Replacement and Adjustment

- 4.** Remove the right rear cover [A] (⌀×1).

d146z0076

- 5.** Open the transport cover [A].

d146z0077

- 6.** Remove the small guide [A].

⌀×1

d0bqm0563

- 7.** Remove the transport guide [A] (tab ×1).

d146z0078

- 8.** Remove the harness guide [A] (🔧×2).

d146z0079

- 9.** Release the clamp, and then disconnect the harness at the right rear of the unit (🔧×1, 🧰×1).

d146z0080

- 10.** Release the four clamps (🧰×4).

d146z0081

## 2.Replacement and Adjustment

### 11. Remove the bracket [A].

### 12. Remove the paper feed unit [A] (⚙️ x2).

## Pick-up Roller, Feed Roller, Friction Roller

1. Remove the paper feed unit ([Paper Feed Unit](#)).

2. Remove the holder [A]. (🔧x1)

d1462188

3. Remove the pick-up roller [A].

d0bqm1021

4. Remove the feed roller [A].

d0bqm1022

## 2.Replacement and Adjustment

### 5. Remove the friction roller [A].
