[Modifications made:]
Supported:
- Pro C72xx series
```

- Pro C92xx series

[Modification history]

Version 01.010:02
Specification Change:
1. Line speed data is transferred to third party vendor peripherals.

Symptom corrected:
1. When connected to a third party vendor peripheral, "Printing" status
   falsely remains displayed on the control panel.
2. Falsely sends on-line status to the engine without receiving on-line
   status from third party vendor peripheral.
3. If printing stops during a booklet job (stapling, ring binding, perfect
   binding) and resumes, part of the job is duplicated.
4. Time-out jam (J225) occurs before reaching the set time-out.
5. The operation panel does not display the part number of custom RPIP
   Interface Box Type S3 firmware.

Version 01.000:02
1st Mass production
