

Setup Guide

For safety, please read this manual carefully before you use this product and keep it handy for future reference.

Introduction

This manual contains detailed instructions on the operation and maintenance of this machine. To get maximum versatility from this machine all operators should carefully read and follow the instructions in this manual. Please keep this manual in a handy place near the machine.

Please read "Safety Information" in this manual before using this machine. It contains important information related to USER SAFETY and PREVENTING EQUIPMENT PROBLEMS.

Power Source

120 V, 60 Hz, 8.4 A or more

Please be sure to connect the power cable to a power source as shown above.

Operator Safety:

This machine is considered a CDRH class I laser device, safe for office/EDP use. The machine contains 7 milliwatt, 645 - 660 nanometer wavelength, AlGaInp Laser Diode. Direct (or indirect reflected) eye contact with the laser beam might cause serious eye damage. Safety precautions and interlock mechanisms have been designed to prevent any possible laser beam exposure to the operator.

Laser Safety:

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical unit in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified Customer Engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement or the optical subsystem is required.

Important

Contents of this manual are subject to change without prior notice. In no event will the company be liable for direct, indirect, special, incidental, or consequential damages as a result of handling or operating the machine.

Caution:

Use of controls or adjustment or performance of procedures other than those specified in this manual might result in hazardous radiation exposure.

Do not attempt any maintenance or troubleshooting other than that mentioned in this manual. This printer contains a laser beam generator and direct exposure to laser beams can cause permanent eye damage.

Two kinds of size notation are employed in this manual. With this machine refer to the inch version.

For good print quality, the supplier recommends that you use genuine toner from the supplier.

The supplier shall not be responsible for any damage or expense that might result from the use of parts other than genuine parts from the supplier with your office products.

Notes:

Some illustrations in this manual might be slightly different from the machine. Certain options might not be available in some countries. For details, please contact your local dealer.

Safety Information

When using your printer, the following safety precautions should always be followed.

Safety During Operation

In this manual, the following important symbols are used:

⚠ WARNING:
Indicates a potentially hazardous situation which, if instructions are not followed, could result in death or serious injury.

⚠ CAUTION:
Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.

⚠ WARNING:

- **Connect the power cord directly into a wall outlet and never use an extension cord.**
- **Disconnect the power plug (by pulling the plug, not the cable) if the power cable or plug becomes frayed or otherwise damaged.**
- **To avoid hazardous electric shock or laser radiation exposure, do not remove any covers or screws other than those specified in this manual.**
- **Turn off the power and disconnect the power plug (by pulling the plug, not the cable) if any of the following occurs:**
 - **You spill something into the machine.**
 - **You suspect that your machine needs service or repair.**
 - **The external housing of your machine has been damaged.**
- **Do not incinerate spilled toner or used toner. Toner dust might ignite when exposed to an open flame.**
- **Disposal can take place at our authorized dealer.**
- **Dispose of the used toner cartridge in accordance with the local regulations.**

⚠ CAUTION:

- *Protect the machine from dampness or wet weather, such as rain and snow.*
- *Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine. Unplug the power cord from the wall outlet before you move the machine. While moving the machine, you should take care that the power cord will not be damaged under the machine.*
- *When you disconnect the power plug from the wall outlet, always pull the plug (not the cable).*
- *Do not allow paper clips, staples, or other small metallic objects to fall inside the machine.*
- *Keep toner (used or unused) and toner cartridge out of the reach of children.*
- *For environmental reasons, do not dispose of the machine or expended supply waste at household waste collection points. Disposal can take place at an authorized dealer.*
- *The inside of the machine could be very hot. Do not touch the parts with a label indicating "⚠" (means hot surface). Touching "⚠" (means hot surface) could result in a burn.*
- *Our products are engineered to meet high standards of quality and functionality, and we recommend that you use only the expendable supplies available at an authorized dealer.*

Positions of Labels and Hallmarks for ⚠WARNING and ⚠CAUTION

This machine has labels and hallmarks for ⚠WARNING, ⚠CAUTION at the positions shown below. For safety, please follow the instructions and handle the machine as indicated.

ZGDH250E

①

	WARNING		● Do not incinerate toner or toner containers. Toner dust may cause flashback when exposed to an open flame.	● Exposé à une flamme nue, cartouches de toner. Exposé à une flamme nue, flamme.
	ATTENTION		● Ne pas incinérer les cartouches ni les boîtes de la cendre de toner peut provoquer un retour de flamme.	
AVVISO	AVISO		● Non gettare il toner o i contenitori del toner sul fuoco. La polvere del toner si può incendiare dalla fiamma.	
ADVERTENCIA	警告		● No incinere el tóner ni los contenedores de tóner. El polvo de tóner puede inflamarse al ser expuesto al fuego.	
			● Não exponha o Toner ou a sua embalagem ao fogo. O pó de Toner poderá explodir quando exposto a chama viva.	
			● トナー又はトナーの入った容器を直接焼却炉等の火中に投入しないでください。火傷をするおそれがあります。	

②

	CAUTION	PRECAUCIÓN		●High temperature.	●Alta temperatura.
	ACHTUNG	ATTENZIONE		●Hohe Temperatur.	●Temperatura elevata.
ATTENTION	高温注意			●Temperature leve.	●高温になっています。

ENERGY STAR Program

<p>ENERGY STAR®</p> 	<p>As an ENERGY STAR Partner, we have determined that this machine model meets the ENERGY STAR Guidelines for energy efficiency.</p>
---	--

The ENERGY STAR Guidelines intend to establish an international energy-saving system for developing and introducing energy-efficient office equipment to deal with environmental issues, such as global warming.

When a product meets the ENERGY STAR Guidelines for energy efficiency, the Partner shall place the ENERGY STAR logo onto the machine model.

This product was designed to reduce the environmental impact associated with office equipment by means of energy-saving features, such as Low-power mode.

- **Energy Saver mode**

This printer automatically lowers its power consumption 30 minutes after the last operation has been completed. To exit Energy Saver mode, press any key on the control panel. To change the setting of the Energy Saver mode, see “System Menu” in the Printer Reference on the CD-ROM labeled “Printer Drivers and Utilities”.

- ❖ **Specifications**

Energy Saver mode	Power Consumption	<ul style="list-style-type: none"> • Basic model: With Options: 17 W or less Printer Only: 12 W • Network standard model: With Options: 18 W or less Printer Only: 13 W
	Default Time	30 minutes

.....

- 💡 **Recycled Paper**

In accordance with the ENERGY STAR Program, we recommend use of recycled paper which is environment friendly. Please contact your sales representative for recommended paper.

Manuals for This Printer

Manuals for This Printer

The following manuals describe the operational procedures and maintenance of this machine.

To enhance safe and efficient operation of this printer, all users should read and follow the instructions carefully.

❖ **Quick Installation Guide**

Describes how to install the printer.

❖ **Setup Guide (this manual)**

Provides information about setting up the printer and its options. This manual is provided as a printed manual, and also on the CD-ROM labeled "Operating Instructions".

❖ **Printer Reference**

Provides information about using the printer and its options. This manual is provided on the CD-ROM labeled "Operating Instructions".

❖ **Network Printing Guide**

Provides information about setting up and using the printer in a network environment. This manual is provided on the CD-ROM labeled "Operating Instructions".

❖ **PostScript 3 Operating Instructions Supplement**

Describes the menus and features for the PostScript 3 printer driver. This manual is provided on the CD-ROM labeled "Operating Instructions".

 **Note**

- ❑ There are three CD-ROMs that come with this printer. "Operating Instructions", "Printer Drivers and Utilities", and "Document Management Utility".
- ❑ Concerning UNIX information, please visit our Web site or consult your authorized reseller.

How to Read This Manual

Symbols

In this manual, the following symbols are used:

 **WARNING:**

This symbol indicates a potentially hazardous situation which, if instructions are not followed, could result in death or serious injury.

 **CAUTION:**

This symbol indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.

* The statements above are notes for your safety.

 **Important**

If this instruction is not followed, paper might be misfed, originals might be damaged, or data might be lost. Be sure to read this.

 **Preparation**

This symbol indicates the prior knowledge or preparations required before operating.

 **Note**

This symbol indicates precautions for operation, or actions to take after misoperation.

 **Limitation**

This symbol indicates numerical limits, functions that cannot be used together, or conditions in which a particular function cannot be used.

 **Reference**

This symbol indicates a reference.

1. Getting Started

Features of This Printer

This printer is designed especially for office workgroups, both for shared usage within a network environment, and for one-to-one usage by being connected directly to the computer.

❖ Time Saving

Superior features save time on print tasks.

- Continuous Printing Speed : 26 ppm.
A4 , 8 1/2" , maximum printing speed from a standard paper tray.
- All Front Operation: From the front, you can replace the toner cartridge, check indicators, and clear a paper misfeed if it occurs.

❖ Compact Body

Its compact body requires minimum space to place it on your desk or desk side.

❖ Network Connectivity

- Basic model
This is a printer with a standard USB port and parallel port.
- Network standard model
This is a printer with a standard Ethernet port, USB port, and parallel port.

❖ Major Specifications

Printing Speed	26 pages per minute (A4  , 8 1/2" )
Maximum Print Quality	True 1200 × 1200 dpi resolutions (PCL 6, RPCS, PS3)
Printer Language	PCL 6, PCL 5e, RPCS, PostScript 3
Maximum Input Paper Size	Paper Tray and Bypass Tray: A3  , 11" 
Standard Memory Size	32MB
Maximum Memory Size with Optional Memory	96MB

Note

-  The "  " symbol means short-edge feed direction.
-  The "  " symbol means long-edge feed direction.

Printer Drivers for This Printer

Printing requires installation of a printer driver for your operating system. The following drivers are included on the CD-ROM that comes with this printer.

Printer Language	PCL 6	PCL 5e	RPCS	PostScript 3
Operating system				
Windows 95 ^{*1}	√	√	√	√ ^{*9}
Windows 98 ^{*2}	√	√	√	√ ^{*9}
Windows Me ^{*3}	√	√	√	√ ^{*9}
Windows 2000 ^{*4}	√	√	√	√ ^{*9}
Windows XP ^{*5}	√	√	√	√ ^{*9}
Windows NT 4.0 ^{*6}	√	√	√	√ ^{*8 *9}
Mac OS ^{*7}				√ ^{*9}

- ^{*1} Microsoft Windows 95 operating system
- ^{*2} Microsoft Windows 98 operating system
- ^{*3} Microsoft Windows Millennium Edition
- ^{*4} Microsoft Windows 2000 Advanced Server
Microsoft Windows 2000 professional
Microsoft Windows 2000 Server
- ^{*5} Microsoft Windows XP Professional
Microsoft Windows XP Home Edition
- ^{*6} Microsoft Windows NT Server operating system version 4.0, Microsoft Windows NT Workstation operating system version 4.0 in a computer using x86 processors.
- ^{*7} Required version is 8.6 or later operating system.
- ^{*8} Requires Service Pack 4 or later.
- ^{*9} The Adobe PostScript printer drivers and PostScript Printer Description (PPD) files are included on the CD-ROM labeled "Operating Instructions".

❖ **PCL printer drivers**

Printer drivers allow the computer to communicate with the printer via a printer language. Two kinds of PCL printer drivers, PCL 6 and PCL 5e, are provided with this printer. We recommend PCL 6 as your first choice.

 **Note**

- Some of your applications might require the installation of the PCL 5e printer driver. In this case, you can install PCL 5e in addition to PCL 6. See p.54 "Installing the PCL 6/5e Printer Driver"

❖ **RPCS printer driver**

This printer driver allows the computer to communicate with the printer via a printer language. The preset type user interface is provided in addition to the conventional one.

See p.56 "Installing the RPCS Printer Driver"

❖ Adobe PostScript Printer Drivers and PPD files

The Adobe Postscript printer drivers and PPD files are included on the CD-ROM that comes with this printer. Adobe PostScript printer driver allows the computer to communicate with the printer via a printer language. The PPD files allow the printer driver to enable the printer specific functions.

See p.58 "Windows 95/98/Me - Installing the PostScript Printer Driver"

See p.59 "Windows 2000/Windows XP - Installing the PostScript Printer Driver"

See p.61 "Windows NT 4.0 - Installing the PostScript Printer Driver"

Software and Utilities Included on the CD-ROM

1

There are three CD-ROMs that come with this printer. These are labeled "Operating Instructions", "Printer Drivers and Utilities" and "Document Management Utility". The following are included on the three separate CD-ROMs.

❖ **Agfa Monotype Font Manager 2000**

Helps you to install new screen fonts, or organize and manage fonts already installed on the system. This is included on the CD-ROM labeled "Printer Drivers and Utilities".

❖ **SmartNetMonitor for Admin**

A utility for the system administrator to manage printers on the network. This is included on the CD-ROM labeled "Printer Drivers and Utilities".

Reference

See SmartNetMonitor for Admin online Help for more information about using SmartNetMonitor for Admin.

❖ **SmartNetMonitor for Client**

A utility for users to manage their own print status on the network. This is included on the CD-ROM labeled "Printer Drivers and Utilities".

Reference

See SmartNetMonitor for Client online Help for more information about using SmartNetMonitor for Client.

❖ **Acrobat Reader**

A utility that allows you to read PDF (Portable Document Format). This is included on the CD-ROM labeled "Operating Instructions".

Note

- Documentation about using the printer is included on the CD-ROM in PDF format. See Acrobat Reader online Help for more information about using Acrobat Reader.

Important

- If you upgrade to Windows 2000 from Windows 95/98/Me or Windows NT 4.0, the software and utilities must be uninstalled prior to installing Windows 2000. Then reinstall them in a Windows 2000 environment.

Viewing the Contents of the CD-ROM

Follow the steps to view the contents of the CD-ROM.

- 1** Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

- 2** Click [**Browse This CD-ROM**].

Explorer starts and displays the contents of the CD-ROM.

Guide to This Printer

1

Mainframe

◆ Exterior

ZGDH141N

1. Paper Size Dial

Adjust this dial to match the size and feed direction of the paper loaded in the paper tray.

2. Bypass Tray Extension

Pull out this extension to load paper into the Bypass Tray when its length is longer than A4 \square or $8\frac{1}{2}'' \times 11'' \square$.

3. Bypass Tray

Use to print onto thick paper, OHP transparencies, adhesive labels, custom size paper, envelopes as well as plain paper. When printing on custom paper size, printer driver settings are required.

Up to 100 sheets of plain paper (80 g/m², 20 lb. bond) can be loaded.

See "Paper and Other Media Supported by this Printer" and "Loading Paper in the Bypass Tray" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

4. Output Tray Extension

Pull out this extension when printing on long paper.

5. Control Panel

Contains keys for the printer operation and a panel display that shows the printer status.

6. Output Tray (Standard Tray)

Printed output is stacked here with the print side facing down.

7. Upper Cover

Remove to install the optional 1-bin Shift Sort Tray or the optional Mailbox.

8. Paper Exit Cover

Open this cover to remove misfed paper.

9. Ventilator

This hole helps to keep components inside the printer from overheating.

Important

- Do not block or obstruct the ventilator. A malfunction may occur due to overheating.

10. Front Cover Release Button

Use this button to open the front cover.

11. Power Switch

Use this switch to turn the printer power on and off.

12. Paper Tray (Tray 1)

Loads up to 250 sheets of plain paper (80 g/m², 20 lb. bond) into this tray for printing.

See *"Paper and Other Media Supported by this Printer"* in the Printer Reference on the CD-ROM labeled "Operating Instructions".

Note

- Paper Tray is displayed "Tray 1" on the panel display.

13. Rear Cover

Remove to install the optional Duplex Unit or to replace the Fusing Unit.

14. Power Cord

Plug this cord into a wall outlet.

15. Ventilators

These holes help to keep components inside the printer from overheating.

Important

- Do not block or obstruct the ventilators. A malfunction may occur due to overheating.

16. Controller Board

Slide it out to install some options. Attach the interface cable, the network interface cable or the 1394 interface cable to the board.

◆ Interior

1

[Front side]

[Back side]

ZGDH230J

1. Toner Cartridge

Includes toner and a photoconductor unit.

When "Replace Toner Cartridge" appears on the panel display, replace this unit.

2. Front Cover

Open this cover when accessing the inside of the printer.

3. Guide Board

Open this board to remove misfed paper.

4. Registration Roller

Feeds the paper. If it becomes dirty, clean it.

See "Cleaning the Registration Roller" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

5. Transfer Roller Cover

Open this cover when replacing a transfer roller.

6. Transfer Roller

When "Replace Maintenance Kit" appears on the panel display, replace this roller.

7. Fusing Unit Lock Levers

Lift these levers when replacing the fusing unit.

8. Fusing Unit

Fuses the image onto paper.

When "Replace Maintenance Kit" appears on the panel display, replace this unit.

Control Panel

ZDD5100N

1. Panel display

Shows the current status of the printer and error messages.

See "Error & Status Messages on the Control Panel" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

2. Power indicator

Is on while the printer power is on.

Is off when the power is turned off or while the printer is in Energy Saver mode.

3. Error indicator

Blinks or lights up whenever any printer error occurs. A message describing the cause of the error also appears on the panel display.

See "Error & Status Messages on the Control Panel" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

4. Data In indicator

Blinks while the printer is receiving data from a computer.

Is on if there is data to be printed.

5. [On Line] key

Press this key to switch the printer between online and offline.

6. [Job Reset] key

When the printer is online, press this key to cancel any ongoing print job.

See "Canceling a Print job" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

7. [Form Feed] key

If the printer is offline, press this key to print all the data left in the printer's input buffer.

Note

This does not work if the printer is online.

8. [Menu] key

Press this key to make and check the current printer settings.

See "Making Printer Settings with the Control Panel" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

9. [Escape] key

Press this key to return to the previous condition on the panel display.

10. [Enter #] key

Press this key to execute menu items selected on the panel display.

Press this key to clear some errors.

See "*Troubleshooting*" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

11. [▲][▼] keys

Use these keys to increase or decrease values on the panel display when making settings.

2. Installing Options

CAUTION:

- *Be sure to turn off the printer and wait for about an hour before installing options. Not waiting for the printer to cool down can result in a burn.*
- *When lifting the printer, use the inset grips on both sides of the printer, otherwise the printer might fall and cause personal injury.*
- *When you move the printer, unplug the power cord from the wall outlet to avoid a fire or an electric shock.*

Important

- The voltage rating of the connector for options is 24V DC or less.
- Turn the power off before removing the Paper Feed Unit Type 2600, 1-bin Shift Sort Tray Type 2600, or Mailbox CS380. Removing any of these units with the power on may cause the printer to fail.

Option List

Note

- See the inside front cover of this manual to confirm which printer (Basic model or Network standard model) you have.

	Basic model Printer	Network standard model Printer
Paper Feed Unit Type 2600	<input type="radio"/>	<input type="radio"/>
Envelope Feeder Type 2600	<input type="radio"/>	<input type="radio"/>
1-bin Shift Sort Tray Type 2600	<input type="radio"/>	<input type="radio"/>
CS380 (Mailbox)	<input type="radio"/>	<input type="radio"/>
AD410 (Duplex Unit)	<input type="radio"/>	<input type="radio"/>
Memory Unit TypeB 64MB	<input type="radio"/>	<input type="radio"/>
Hard Disk Drive Type 2600	<input type="radio"/>	<input type="radio"/>
Network Interface Board Type 2610 ^{*1}	<input type="radio"/>	
1394 Interface Unit Type 4510 ^{*1 *2}	<input type="radio"/>	<input type="radio"/>
802.11b Interface Unit Type A ^{*1 *2}	<input type="radio"/>	<input type="radio"/>

: Available option

^{*1} With Basic model, these cannot be installed at the same time.

^{*2} With Network standard model, these cannot be attached at the same time.

Note

- Up to two Paper Feed Units can be attached to the printer at the same time.
- The installation of the Paper Feed Unit is necessary to attach the Envelope Feeder Unit.

- Either one of the 1-bin Shift Sort Tray or the Mailbox can be attached to the printer.
- The installation of the Memory Unit is necessary to use the 1394 Interface Unit.

Available Options

2

The following options can be attached to the printer.

◆ Exterior

ZCEH150J

1. Paper Feed Unit Type 2600 (Tray 2 or Tray 3)

You can load up to 500 sheets (60-105g/m², 16-28 lb.bond) of plain paper into the tray.

📌 Note

- Do not attach more than two Paper Feed Units to the printer at the same time.
- Top-most optional Paper Feed Unit is displayed "Tray 2" and bottom-most is displayed "Tray 3" on the panel display.

2. Envelope Feeder Type 2600

You can load up to 60 envelopes (72-90g/m², 19-24 lb.bond) into the tray.

📌 Note

- The Envelope Feeder is a tray that slides into the optional Paper Feed Unit. Without the optional Paper Feed Unit, the Envelope Feeder cannot be used.
- The Printer can have two optional Paper Feed Units installed at the same time. However the Envelope Feeder should be used in the top-most optional Paper Feed Unit (Tray 2). It cannot be used in the bottom-most Paper Feed Unit (Tray 3).

3. AD410 (Duplex Unit)

You can print on both sides of paper.

4. 1-bin Shift Sort Tray Type 2600

You can shift and sort the printings.

Note

- The 1-bin Shift Sort Tray and the Mailbox cannot be installed to the printer at the same time.

❖ Basic model Printer : Interior

Note

- See the inside front cover of this manual to confirm which printer (Basic model or Network standard model) you have.

ZGDx120J

1. Network Interface Board Type 2610

You can perform the print job on the network environment.

Note

- The Network Interface Board, the 1394 Interface Unit, and the 802.11b Interface Unit cannot be installed in the printer at the same time.

2. 802.11b Interface Unit Type A

You can perform the print job on the IEEE 802.11b (Wireless LAN) environment.

5. CS380 (Mailbox)

You can sort the printings and also deliver them to each tray separately.

Note

- The 1-bin Shift Sort Tray and the Mailbox cannot be installed to the printer at the same time.

Note

- The Network Interface Board , the 1394 Interface Unit, and the 802.11b Interface Unit cannot be installed in the printer at the same time.

3. 1394 Interface Unit Type 4510

You can perform the print job on the IEEE 1394 environment.

Note

- The Network Interface Board , the 1394 Interface Unit, and the 802.11b Interface Unit cannot be installed in the printer at the same time.

4. Memory Unit TypeB 64MB

You can increase the amount of memory up to 96MB.

5. Hard Disk Drive Type 2600

You can use the “Collate”, the “Sample Print” and the “Locked Print” functions.

❖ Network standard model Printer : Interior

Note

- See the inside front cover of this manual to confirm which printer (Basic model or Network standard model) you have.

ZGDx121J

1. 802.11b Interface Unit Type A

You can perform the print job on the IEEE 802.11b (Wireless LAN) environment.

Note

- The 1394 Interface Unit and the 802.11b Interface Unit cannot be installed in the printer at the same time.

2. 1394 Interface Unit Type 4510

You can perform the print job on the IEEE 1394 environment.

Note

- The 1394 Interface Unit and the 802.11b Interface Unit cannot be installed in the printer at the same time.

3. Memory Unit TypeB 64MB

You can increase the amount of memory up to 96MB.

4. Hard Disk Drive Type 2600

You can use the “Collate”, the “Sample Print” and the “Locked Print” functions.

Paper Feed Unit Type 2600

⚠ Important

- ❑ Do not slide more than one paper tray out at the same time. Having more than one paper tray filled with paper in a fully extended position could cause the machine to fall down.
- ❑ Do not attach more than two Paper Feed Units in your printer at the same time.
- ❑ Check the printer nameplate to confirm the model code.

1 Check the contents of the box for the following items:

- Paper Feed Unit (including a paper tray)
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.
- The power cord is unplugged from the wall outlet.

3 Remove the adhesive tape from the Paper Feed Unit.

ZCEX390J

📌 Note

- ❑ If you attach two Paper Feed Units at the same time, stack them up in advance.

- ## 4
- There are three pins on the top of the Paper Feed Unit that point straight up. On the bottom of the printer there are three holes. Align the holes over the pins, and then lower the printer gently onto the Paper Feed Unit.

ZGDx400J

⚠ CAUTION:

- When lifting the machine, use the inset grips on both sides. Otherwise the printer could break or cause injury if dropped.

ZGDH052N

- ## 5
- Attach the interface cable to the printer.

- 6** Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

 **Note**

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "*Printing the Configuration Page*" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

 **Reference**

For information about loading paper, see "*Loading Paper in the Optional Paper Tray*" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

If the printing position is not correct, adjust the registration of the trays. For more information about adjusting the registration of the trays, see "Adjusting the Registration of the Trays" in the Printer Reference.

Envelope Feeder Type 2600

Note

- This unit is a tray that slides into the optional Paper Feed Unit. Without the optional Paper Feed Unit, this Envelope Feeder cannot be used.
- Your printer can have two optional Paper Feed Units. However, the Envelope Feeder must be used in the top-most optional Paper Feed Unit (Tray 2). It cannot be used in the bottom-most optional Paper Feed Unit (Tray 3).

Important

- Do not slide more than one paper tray out at the same time. Having more than one paper tray filled with paper in a fully extended position could cause the machine to fall down.

1 Check the contents of the box for the following items:

- Envelope Feeder
- Installation Guide

2 Pull out the second paper tray (Tray 2) of the optional Paper Feed Unit until it stops. After that, lift it slightly, and then pull it out.

ZDDP330E

Important

- The Envelope Feeder must be used in the top-most optional Paper Feed Unit (Tray 2).
- The tray of the top-most optional Paper Feed Unit is beneath the paper tray.

Note

- Keep the paper tray with paper in a cool dark place.

3 While lifting the front side of the Envelope Feeder, place the feeder into the printer. Then slide it into the printer until it stops.

ZDDP340E

Reference

For information about loading paper, see "Loading Envelopes" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

Memory Unit TypeB 64MB

⚠ Important

- ❑ Before touching the Memory Unit, touch something metal to discharge any static electricity. Static electricity can damage the Memory Unit.

1 Check the contents of the box for the following items:

- Memory Unit
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

📝 Note

- ❑ If the Duplex Unit is not attached, go to step **4**.

3 If the Duplex Unit is attached, push down the lever on right side (①) and pull out the Duplex Unit until it stops (②).

4 Use a coin to remove the two screws.

📝 Note

- ❑ The removed screws are required in step **11**.

5 Pull out the handle of the controller board.

6 Pull the handle and slide the controller board out.

7 Place the controller board on a flat surface.

8 Insert the Memory unit to the slot by placing the notch of the unit to the projection of the slot, and then push it down until it clicks.

ZGDY130J

9 Match the controller board to the top and bottom rail using the "▼" mark, and then slide it into the printer slowly until it stops.

ZGDY250J

10 Push the handle of the controller board until it clicks.

ZGDY380J

11 Fasten the controller board to the printer with the two screws.

ZGDY270J

Note

□ If the Duplex Unit is not attached, go to step 14.

12 While aligning the power cord to the left side groove of the Duplex Unit, slide the Duplex Unit in until it is connected to the printer.

ZGDY240J

13 Attach the interface cable to the printer.

- 14** Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

 **Important**

- If you use a Windows operating system, you should set up the Memory Unit with the printer driver to make the printer recognize the installation. See the description of Windows 95/98/Me, Windows 2000 and Windows NT 4.0 on p.51 "Installing the Printer Driver and Software".

 **Note**

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "*Printing the Configuration Page*" in the Printer Reference on the CD-ROM labeled "Operating Instructions".
- To remove the Memory Unit, press the button on the end of the slot.

Network Interface Board Type 2610

Note

- Depending on the model you use, the Network Interface Board, the 1394 Interface Unit, and the 802.11b Interface Unit cannot be installed to the printer at the same time. For more information, see p.11 “Installing Options”.

Important

- Before touching the Network Interface Board, touch something metal to discharge any static electricity. Static electricity can damage the Network Interface Board.
- Use the shielded twisted-pair (STP) network interface cable.

Installing the Network Interface Board

- 1** Check the contents of the box for the following items:

- Network Interface Board
- Ferrite Core
- Installation Guide

- 2** Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

Note

- The interface cable is not included in the box. Make sure that the interface cable you use is appropriate for your computer.
- If the Duplex Unit is not attached, go to step **4**.

- 3** If the Duplex Unit is attached, push down the lever on right side (①) and pull out the Duplex Unit until it stops (②).

ZGDX320J

- 4** Use a coin to remove the two screws.

Note

- These screws are used again in step **8**.

ZGDX281J

5 Pull out the handle of the controller board.

ZGDx370J

6 Pull the handle and slide the controller board out.

ZGDx261J

7 Place the controller board on a flat surface.

8 Use a coin to remove the two screws, and then remove the cover.

 **Note**

- These screws are used again in step 10.
- The removed cover is not used when installing the Network Interface Board.

ZGDx410J

9 Insert the end of the Network Interface Board into the opening (1), and then push down until it clicks (2).

ZGDx422J

ZGDx432J

10 Fasten the Network Interface Board to the controller board.

ZGDx441J

- 11** Match the controller board to the top and bottom rail using the "▼" mark, and then slide it into the printer slowly until it stops.

ZGDx253J

- 12** Push back the handle of the controller board until it clicks.

ZGDx380J

- 13** Fasten the controller board to the printer with the two screws.

ZGDx271J

- 14** While aligning the power cord to the left side groove of the Duplex Unit, slide the Duplex Unit in until it is connected to the printer.

ZGDx241J

- 15** Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

Note

- If the Duplex Unit is not attached, go to step **15**.

Connecting the Network Interface Cable to the Network

- 1 Turn off the power switch.
- 2 Loop the network interface cable and attach the ferrite core.

Note

- The network interface cable loop should be about 15 cm (6") (①) from the end of the cable (on the end closest to the printer). The ferrite core at the end of the cable should be a ring type ferrite core.

ZDDP320E

- 3 Attach the network interface cable to the jack on the Network Interface Unit.

ZGDx291J

- 4 Connect the other end of the network interface cable to the network.

- 5 Turn on the power switch.

Note

- After installing the last option that you want, print the configuration page to confirm the installation. If the information about network settings (e.g. IP address) is listed in the configuration page, then it has been properly installed. For more information about printing the configuration page, see "Printing the Configuration Page" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

1394 Interface Unit Type 4510

Note

- Depending on the model you use, the 1394 Interface Unit, the Network Interface Board, and the 802.11b Interface Unit cannot be installed in the printer at the same time. For more information, see p.11 "Installing Options".

Important

- Printing using "SCSI print "(Windows 2000) device and "IEEE 1394 and SCSI printers" (Windows XP) with the optional 1394 Interface Unit is possible under Windows 2000 and Windows XP. Printing with IP over 1394 is possible under Windows XP.
- With Windows 2000, the 1394 Interface Unit can only be used with Service Pack 1 or later. If the Service Pack is not installed, the connectable SCSI print device in a 1394 bus is only one, and the client cannot install the printer driver without using an account with Administrators permission.
- Before touching the 1394 Interface Unit, touch something metal to discharge any static electricity. Static electricity can damage the 1394 Interface Unit.
- Unplug all the interface cables from the printer before installation. If you take out the controller board with cables plugged in, the 1394 Interface Unit might be damaged.
- Use the 1394 interface cable that comes with this printer.
- Do not plug or unplug the 1394 interface cable while installing the printer driver.

Installing the 1394 Interface Unit

- 1** Check the contents of the box for the following items:

- 1394 Interface Unit
- 1394 Interface Cable (6 pins x 4 pins)
- 1394 Interface Cable (6 pins x 6 pins)
- Installation Guide

- 2** Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

Note

- If the Duplex Unit is not attached, go to step **4**.

- 3** If the Duplex Unit is attached, push down the lever on right side (①) and pull out the Duplex Unit until it stops (②).

ZGDX320J

4 Use a coin to remove the two screws.

Note

☐ These screws are used again in step 10.

ZGDx280J

5 Pull out the handle of the controller board.

ZGDx370J

6 Pull the handle and slide the controller board out.

ZGDx260J

7 Place the controller board on a flat surface.

8 Use a coin to remove the two screws, and then remove the cover.

Note

☐ These screws are used again in step 10.

ZGDx410J

9 Attach the 1394 Interface Unit to the controller board.

Insert the end of the 1394 Interface Unit into the opening (1), and then push down until it clicks (2).

ZGDx421J

ZGDx430J

- 10** Fasten the 1394 Interface Unit to the controller board.

ZGDx443J

- 13** Fasten the controller board to the printer with the two screws.

ZGDx272J

- 11** Match the controller board to the top and bottom rail using the "▼" mark, and then slide it into the printer slowly until it stops.

ZGDx252J

- 12** Push back the handle of the controller board until it clicks.

ZGDx380J

Note

- If the Duplex Unit is not attached, go to step 15.

- 14** While aligning the power cord to the left side groove of the Duplex Unit, slide the Duplex Unit in until it is connected to the printer.

ZGDx242J

- 15** Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

You need to make settings with the control panel before using the 1394 Interface Unit.

Connecting the 1394 Interface Cable to the Printer

- 1 Attach the 1394 interface cable to the jack on the 1394 Interface Unit.

Both types of jack are available.

ZGDY550J

- 2 Connect the other end of the 1394 interface cable to the computer or the other IEEE 1394 node.

Note

- ❑ After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "Printing the Configuration Page" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

1394 Interface Unit specifications

- ❖ **Interface Connector:**
IEEE 1394 (6 pins × 2)
- ❖ **Required cable:**
1394 interface cable (6 pins × 4 pins, 6 pins × 6 pins)
- ❖ **Important**
 - ❑ You cannot plug devices together to create loops.
 - ❑ Do not use a cable more than 4.5 meters (14.8 feet) long.
- ❖ **Connectable number of devices in a bus:**
Maximum 63
- ❖ **Allowed cable hops in a bus:**
Maximum 16
- ❖ **Power supply:**
Nonpower supply
Cable Power repeated (IEEE 1394a-2000 compliant)

802.11b Interface Unit Type A

Note

- Depending on the model you use, the 802.11b Interface Unit, the 1394 Interface Unit, and the Network Interface Board cannot be installed to the printer at the same time. For more information, see p.11 “Installing Options”.

Important

- Before touching the 802.11b Interface Unit, touch something metal to discharge any static electricity. Static electricity can damage the 802.11b Interface Unit.

1 Check the contents of the box for the following items:

- 802.11b Interface Unit
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

Note

- If the Duplex Unit is not attached, go to step 4.

3 If the Duplex Unit is attached, push down the lever on right side (①) and pull out the Duplex Unit until it stops (②).

4 Use a coin to remove the two screws.

Note

- These screws are used again in step 4.

5 Pull out the handle of the controller board.

6 Pull the handle and slide the controller board out.

7 Place the controller board on a flat surface.

8 Use a coin to remove the two screws, and then remove the cover.

Note

☐ These screws are used again in step 10.

ZGDx410J

9 Attach the 802.11b Interface Unit.

Insert the end of the 802.11b Interface Unit into the opening (1), and then push down until it clicks (2).

ZGDx420J

ZGDx431J

10 Fasten the 802.11b Interface Unit to the controller board with the two screws.

ZGDx442J

11 Insert the card slowly into the 802.11b board with the label facing down and the uneven black antenna surface facing up until it stops.

ZGDx500J

12 Match the controller board to the top and bottom rail using the "▼" mark, and then slide it into the printer slowly until it stops.

ZGDx251J

- 13** Push back the handle of the controller board until it clicks.

ZGDX380J

- 14** Fasten the controller board to the printer with the two screws.

ZGDX273J

Note

- If the Duplex Unit is not attached, go to step 16.

- 15** While aligning the power cord to the left side groove of the Duplex Unit, slide the Duplex Unit in until it is connected to the printer.

ZGDX243J

- 16** Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

You need to make settings with the control panel before using the 802.11b Interface Unit.

Note

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "Printing the Configuration Page" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

Hard Disk Drive Type 2600

⚠ Important

- ❑ Before touching the Hard Disk Drive, touch something metal to discharge any static electricity. Static electricity can damage the Hard Disk Drive.

1 Check the contents of the box for the following items:

- Hard Disk Drive
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

3 Use a coin to remove the two screws, and then remove the cover.

🔧 Note

- ❑ The screws and cover are not used when installing the Hard Disk Drive.

4 Slowly insert the Hard Disk Drive while aligning it with the top and bottom rails in the printer until it stops.

5 Fasten the Hard Disk Drive.

6 Attach the interface cable to the printer.

7 Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

The following message appears on the panel display.

- 8** Press **[Enter #]** to format the Hard Disk Drive.

Important

- Do not turn off the printer while formatting the Hard Disk Drive. Turning off the printer while formatting the Hard Disk Drive can damage the Hard Disk Drive.

If you successfully format the Hard Disk Drive, the following message appears on the panel display.

```
HDD Initialize
Finish: OK
```

- 9** Press **[On Line]**.

“Ready” appears on the panel display.

```
Ready
```

Important

- If you use a Windows operating system, you should set up the Hard Disk Drive with the printer driver to make the printer recognize the installation. See a description of Windows 95/98/Me, Windows 2000 and Windows NT 4.0 on p.51 “Installing the Printer Driver and Software”.

Note

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see “Printing the Configuration Page” in the Printer Reference on the CD-ROM labeled “Operating Instructions”.

AD410 (Duplex Unit)

Important

- ❑ If you attach the Duplex Unit and the Paper Feed Unit, the Paper Feed Unit must be attached prior to attaching the Duplex Unit.
- ❑ Check the printer nameplate to confirm the model code.

1 Check the contents of the box for the following items:

- Duplex Unit
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.

3 Remove the adhesive tapes.

ZCEX310J

4 Open the rear cover by pushing the two knobs as shown in the illustration.

ZGDx210J

5 Remove the rear cover in the horizontal direction.

ZGDx220J

Note

- ❑ The rear cover of the printer is not used when attaching the Duplex Unit.

6 While aligning the power cord to the left side groove of the Duplex Unit, slide the Duplex Unit in until it is connected to the printer.

ZGDx231E

ZGDx240J

7 Attach the interface cable to the printer.

8 Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

 **Note**

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "*Printing the Configuration Page*" in the Printer Reference on the CD-ROM labeled "Operating Instructions".
- If the printing position is not correct, adjust the registration of the trays. For more information about adjusting the registration of the trays, see "Adjusting the Registration of the Trays" in the Printer Reference.

1-bin Shift Sort Tray Type 2600

Important

- ❑ If you attach the 1-bin Shift Sort Tray and the Paper Feed Unit, the Paper Feed Unit must be attached prior to attaching the 1-bin Shift Sort Tray.
- ❑ The 1-bin Shift Sort Tray and the Mailbox cannot be attached to the printer at the same time.
- ❑ Check the printer nameplate to confirm the model code.

1 Check the contents of the box for the following items:

- 1-bin Shift Sort Tray
- Upper Tray
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.
- The interface cable is unplugged from the printer.

3 Remove the adhesive tapes and the packing material.

ZOEX300J

4 Remove the upper cover of the printer.

Note

- ❑ The upper cover that is removed, is not used when installing the 1-bin Shift Sort Tray.

ZGDH170J

5 Holding the 1-bin Shift Sort Tray on both sides, align the catches with the holes on the printer and insert.

CAUTION:

- When lifting the 1-bin Shift Sort Tray, hold it on both sides. Holding underneath the 1-bin Shift Sort Tray may cause injury to the hands if caught between the 1-bin Shift Sort Tray and the printer.

ZGDH170J

- Slide the upper tray into the 1-bin Shift Sort Tray.

- Attach the interface cable to the printer.
- Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

 **Note**

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "Printing the Configuration Page" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

CS380 (Mailbox)

Important

- ❑ If you attach the Mailbox and the Paper Feed Unit, the Paper Feed Unit must be attached prior to attaching the Mailbox.
- ❑ The Mailbox and the 1-bin Shift Sort Tray cannot be attached to the printer at the same time.
- ❑ Check the printer nameplate to confirm the model code.

1 Check the contents of the box for the following items:

- Mailbox
- Output Trays (4pcs)
- Output Tray Number Seal
- Installation Guide

2 Confirm that the followings are true:

- The power switch is turned off.

3 Remove the adhesive tapes and the packing materials.

ZCEX451J

4 Remove the upper cover of the printer.

Note

- ❑ The upper cover that is removed, is not used when attaching the Mailbox.

ZGDH170J

5 Holding the Mailbox on both sides, align the catches with the holes on the printer and insert.

CAUTION:

- When lifting Mailbox, hold it on both sides. Holding underneath the Mailbox may cause injury to the hands if the Mailbox and the printer.

ZGDX190J

- Slide the output tray into the lower side of the Mailbox first.

- Slide the other output trays into the Mailbox from the bottom.
- Attach the interface cable to the printer.
- Plug the printer's power cord back into the wall outlet, and then turn on the power switch.

 **Note**

- After installing the last option that you want, print the configuration page to confirm the installation. If the new device is listed in the column of configuration options, then it has been properly installed. For more information about printing the configuration page, see "Printing the Configuration Page" in the Printer Reference on the CD-ROM labeled "Operating Instructions".

3. Configuring the Printer for the Network

Make the network settings below depending on the network interface you use.

- Parallel/USB: Making network settings is not necessary. Go to p.51 “Installing the Printer Driver and Software”.
- Ethernet: Make the settings in p.41 “Ethernet Configuration”, and then see p.51 “Installing the Printer Driver and Software”.
- IEEE 1394: Make the settings in p.45 “IEEE 1394 Configuration”, and then see p.51 “Installing the Printer Driver and Software”.
- Wireless LAN: Make the settings in p.48 “IEEE 802.11b (Wireless LAN) Configuration”, and then see p.51 “Installing the Printer Driver and Software”.

Note

- The optional Network Interface Board is necessary to use Ethernet with Basic model printer.
- The optional 1394 Interface Unit is necessary to use IEEE 1394.
- The optional 802.11b Interface Unit is necessary to use the wireless LAN.

Ethernet Configuration

Configure the printer for the network using the printer's control panel.

The following table shows the control panel settings and their default values. These items are included in the “Host Interface” menu.

Reference

For information about configuring the computer for the network, see the Network Printing Guide on the CD-ROM labeled “Operating Instructions”.

For information about “Host Interface” menu, see “Host Interface Menu” in the Printer Reference on the CD-ROM labeled “Operating Instructions”.

Setting Name	Value	
IP Address	011.022.033.044	
Subnet Mask	000.000.000.000	
Gateway Address	000.000.000.000	
Network Boot	None	
Frame Type (NW) (Frame type NetWare)	Auto	
Active Protocol	TCP/IP	<input type="radio"/> *1
	NetWare	<input type="radio"/> *1
	NetBEUI	<input type="radio"/> *1
	AppleTalk	<input type="radio"/> *1
Ethernet *2	Auto	
LAN Type *3	Ethernet	

*1 means that this protocol is active.

*2 Make this setting only when it is necessary.

*3 Appears only when both the Network Interface Board and the 802.11b Interface Unit are installed.

1 Press **[Menu]**.

“Menu” appears on the panel display.

2 Press **[▲]** or **[▼]** to display “Host Interface” menu.

3 Press **[Enter #]**.

The following message appears on the panel display.

4 Press **[▲]** or **[▼]** to display “Network Setup”.

5 Press **[Enter #]**.

The following message appears on the panel display.

6 Select the protocol you want to use.

Note

Do not select protocols that are not used on your network.

1 Press **[▲]** or **[▼]** to display “Active Protocol”.

2 Press **[Enter #]**.

The current setting appears on the panel display.

3 Press **[Enter #]**.

4 Press **[▲]** or **[▼]** to select "Active" or "Not Active", and then press **[Enter #]**.

5 Set other protocols you need to set in the same way.

Note

Leave unused protocols "Not Active".

- 7** If you use TCP/IP, assign the IP address to the printer.

 **Note**

- To get the IP address for the printer, contact your network administrator.

- 1** Press **[▲]** or **[▼]** until the following message appears.

```
Network Setup:
IP Address
```

- 2** Press **[Enter #]**.

The current IP address appears on the panel display.

```
IP Address:
011.022.033.044
```

- 3** Press **[▲]** or **[▼]** to enter the left most entry field of the IP address.

```
IP Address:
192.022.033.044
```

- 4** Press **[Enter #]**.

The pointer (█) moves to the next entry field automatically.

```
IP Address:
192.02█.033.044
```

 **Note**

- The value moves by 10 if **[▲]** or **[▼]** is kept pressed.
- You can return the pointer (█) to the previous (left) entry field by pressing **[Escape]**.
- If you press **[Escape]** when the pointer (█) is on the left-most position, the selected IP address is reset.

- 5** Repeat steps **3** and **4** to enter the IP address.

```
IP Address:
192.168.000.011
```

Check if the pointer (█) is at the rightmost position, and press **[Enter #]** to register the IP address you selected.

```
Network Setup:
IP Address
```

- 8** If you use TCP/IP, assign "Subnet Mask" and "Gateway Address" following the same procedure for entering the IP address.

- 9** If you use TCP/IP, you can make settings for "Network Boot".

You can select how to assign the printer's address using the computer. Select one of the items below if necessary.

- None (Default)
- DHCP

- 1** Press **[▲]** or **[▼]** to display "Network Boot".

```
Network Setup:
Network Boot
```

- 2** Press **[Enter #]**.

The current setting appears on the panel display.

```
Network Boot:
*None
```

- 3** Press **[▲]** or **[▼]** to display the method you want to use.

- 4** Press **[Enter #]**.

10 If you use NetWare, select the frame type for NetWare.

Select one of the items below if necessary.

- Auto (Default)
- Ethernet 802.3
- Ethernet 802.2
- Ethernet II
- Ethernet SNAP

Note

Usually, use the default setting ("Auto"). When you first select "Auto", the frame type detected by the printer is adopted. If your network can use more than two frame types, the printer may fail to select the correct frame type if "Auto" is selected. In this case, select the appropriate frame type.

1 Press **[▲]** or **[▼]** to display "Frame Type (NW)".

2 Press **[Enter #]**.
The current setting appears on the panel display.

3 Press **[▲]** or **[▼]** to display the frame type you want to use.

4 Press **[Enter #]**.

11 Select the interface.

Ethernet and IEEE 802.11b appear only when both the Network Interface Board and the 802.11b Interface Unit are installed.

Select one of the items below.

- Ethernet
- IEEE 802.11b

1 Press **[▲]** or **[▼]** to display "LAN Type".

2 Press **[Enter #]**.
The current setting appears on the panel display.

3 Press **[▲]** or **[▼]** to display "Ethernet".

4 Press **[Enter #]**.

12 Press **[On Line]**.

"Ready" appears on the panel display.

13 Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

The settings are now complete. Go to p.51 "Installing the Printer Driver and Software".

IEEE 1394 Configuration

Use this procedure to configure the printer for use in the IEEE 1394 environment. The following table shows the control panel settings and their default values. These items are included in the "Host Interface" menu.

Setting Name	Value
IP Address1394	000.000.000.000
Subnet Mask1394	000.000.000.000
IP over 1394	Active
SCSI print	Active
Bidi-SCSI print	Active

Depending on the protocol you use, procedures vary. See the following table.

IP over 1394	Steps 1-3 and then go to steps 6 to 7
SCSI print	Steps 1-3 and then go to steps 9 to 10

1 Press [Menu].

"Menu" appears on the panel display.

2 Press [▲] or [▼] to display "Host Interface" menu.

```
Menu:
Host Interface
```

3 Press [Enter #].

The following message appears on the panel display.

```
Host Interface:
I/O Buffer
```

4 Press [▲] or [▼] to display "IEEE 1394 Setup".

```
Host Interface:
IEEE 1394 Setup
```

5 Press [Enter #].

The following message appears on the panel display.

```
IEEE 1394 Setup:
IP Address1394
```

6 Press [▲] or [▼] to display "IP over 1394".

```
IEEE 1394 Setup:
IP over 1394
```

1 Press [Enter #].

2 Press [▲] or [▼] to select either "Active" or "Not Active".

3 Press [Enter #].

The display returns to the previous menu in a few seconds.

7 Assign the IP address to the printer.

Do not overlap the IP address in the same subnet or the same IP address in the network setting.

 **Note**

- To get the IP address for the printer, contact your network administrator.

1 Press **[▲]** or **[▼]** until the following message appears.

```
IEEE 1394 Setup:
IP Address1394
```

2 Press **[Enter #]**.

The current IP address appears on the panel display.

```
IP Address1394:
000.000.000.000
```

3 Press **[▲]** or **[▼]** to enter the leftmost entry field of the IP address.

```
IP Address1394:
192.022.033.044
```

4 Press **[Enter #]**.

The pointer (█) moves to the next entry field automatically.

```
IP Address1394:
192.02█.033.044
```

 **Note**

- The value moves by 10 if **[▲]** or **[▼]** is kept pressed.
- You can return the pointer (█) to the previous (left) entry field by pressing **[Escape]**.
- If you press **[Escape]** when the pointer (█) is on the leftmost position, the selected IP address is reset.

5 Repeat steps **3** and **4** to enter the IP address.

```
IP Address1394:
192.168.000.011
```

Check if the pointer (█) is at the rightmost position, and press **[Enter #]** to register the IP address you selected.

```
IEEE 1394 Setup:
IP Address1394
```

8 Set "Subnet Mask1394" in the same way.

9 Set "SCSI print" and "Bidi-SCSI print" if necessary.

 **Note**

- The default setting is "Active".

10 Press **[▲]** or **[▼]** to display "SCSI print".

```
IEEE 1394 Setup:
SCSI Print
```

11 Press **[Enter #]**.

The following message appears on the panel display.

```
SCSI Print:
*Active
```

12 Press **[▲]** or **[▼]** to select either "Active" or "Not Active", and then press **[Enter #]**.

Set " Bidi-SCSI print " in the same way.

13 Press **[On Line]**.

“Ready” appears on the panel display.

**14** Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

The settings are now complete. Go to p.51 "Installing the Printer Driver and Software".

IEEE 802.11b (Wireless LAN) Configuration

Configure the printer for using the wireless LAN. The following table shows the control panel settings and their default values. These items are included in the "Host Interface" menu.

Setting Name	Value
Comm. Mode	Ad hoc
Channel	• Inch version (1-11) 11
	• Metric version (1-13) 11
Trans. Speed	Auto
WEP Settings	Not Active

In order to use the wireless LAN, select "IEEE 802.11b" for "LAN Type" in "Network Setup" of the Host Interface menu, and then set "IP Address", "Subnet Mask", "Gateway Address", "Network Boot", "Frame Type (NW)" and "Active Protocol" in the "Network Setup". For more information about setting the items in the "Network Setup", see p.41 "Ethernet Configuration".

1 Press [Menu].

"Menu" appears on the panel display.

2 Press [▲] or [▼] to display "Host Interface" menu.

3 Press [Enter #].

The following message appears on the panel display.

4 Press [▲] or [▼] to display "IEEE 802.11b".

5 Press [Enter #].

Be sure that "Comm. Mode" appears on the panel display.

6 Press **[Enter #]**.

The following message appears on the panel display.

```
Comm. Mode :
*Ad hoc
```

7 Press **[▲]** or **[▼]** to select the transmission mode.**8** Press **[Enter #]**.

The display returns to the previous menu in a few seconds.

9 Set "Trans. Speed" and "WEP Settings" in the same way.

For more information about WEP Settings, see "Using the IEEE 802.11b (Wireless LAN)" in the Network Printing Guide.

10 If "Ad hoc" is selected for "Comm. Mode", set the channel to use for transmission. **Note**

- Confirm the network administrator for the channel to use.

1 Press **[▲]** or **[▼]** to display "Channel".

```
IEEE 802.11b :
Channel
```

2 Press **[Enter #]**.

The channel currently used appears on the panel display.

```
Channel :
(1-11)   11
```

3 Press **[▲]** or **[▼]** to enter the channel.**4** Press **[Enter #]**.**11** Press **[On Line]**.

"Ready" appears on the panel display.

```
Ready
```

12 Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

The settings are now complete. Go to p.51 "Installing the Printer Driver and Software".

 **Address**❖ **Subnet Mask**

A number used to mathematically "mask" or hide an IP address on the network by eliminating those parts of the address that are alike for all the machines on the network.

❖ **Gateway Address**

A gateway is a connection or interchange point that connects two networks. A gateway address is for the router or host computer used as a gateway.

 **Note**

- To get the addresses, contact your network administrator.

3

4. Installing the Printer Driver and Software

This manual assumes that you are familiar with general Windows procedures and practices. If you are not, see the documentation that comes with Windows for details.

Installation Method

The following table shows how to install the printer drivers and software.

	Auto Run ^{*1}		
	Quick Install		Custom installation ^{*2}
	Network connection with TCP/IP	Parallel connection	
PCL 6 printer driver	○	○	○
PCL 5e printer driver			○
RPCS printer driver	○	○	○
PostScript printer driver			○
Agfa Monotype Font Manager 2000			○
SmartNetMonitor for Admin			○
SmartNetMonitor for Client	○		○

^{*1} Available operating systems are as follows: Windows 95/98/Me, Windows 2000, Windows XP, Windows NT 4.0

^{*2} Using custom installation, you can install various software separately.

Reference

When the printer is connected to the computer using USB, see p.66 "Installing the Printer Driver Using USB".

When the printer is connected to the computer using IEEE 1394, see p.68 "Installing the Printer Driver Using IEEE 1394".

Important

- Before starting this installation, close all documents and applications. In a network environment, confirm that users who are logged on are disconnected. Be sure to do this when it will create the least interference with other users.
- After installing a printer driver, you must restart the computer.

Note

- If the "plug and play" function starts, click **[Cancel]** in the **[New Hardware Found]**, **[Device Driver Wizard]** or **[Found New Hardware Wizard]** dialog box, and then insert the CD-ROM. The **[New Hardware Found]**, **[Device Driver Wizard]** or **[Found New Hardware Wizard]** dialog box appears depending on the system version of Windows 95/98/Me, or Windows 2000/Windows XP.

Quick Install

Auto Run will start the installer automatically when you load the CD-ROM in the CD-ROM drive. By selecting Quick Install, you can install the necessary software easily.

TCP/IP requires the following:

- This machine must be connected to the network through the network interface cable.
- This machine must be turned on.
- The TCP/IP protocol must be configured.
- An IP address must be allocated to this machine and to the computer.

4

Limitation

- If your system is Windows 2000/Windows XP or Windows NT 4.0, installing a printer driver by Auto Run requires Administrators permission. When you install a printer driver by Auto Run, log on using an account that has Administrators permission.
- When the printer is connected to the computer using USB or IEEE 1394, Quick Install cannot be used. See p.66 "Installing the Printer Driver Using USB" or p.68 "Installing the Printer Driver Using IEEE 1394".

Note

- Auto Run might not automatically work with certain OS settings. In this case, launch "Setup.exe" located on the CD-ROM root directory.

If you want to cancel Auto Run, hold down the **[SHIFT]** key (when your system is Windows 2000/Windows XP, hold down the left **[SHIFT]** key) while inserting the CD-ROM. Keep the **[SHIFT]** key held down until the computer has finished accessing the CD-ROM.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click **[OK]**.

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

4 Select **[Quick Install]**.

- 5** The software license agreement appears in the **[License Agreement]** dialog box.

After reading through all of the contents, click **[I accept the agreement]** to agree with the license agreement, and then click **[Next]**.

- 6** Click to select a model name you want to use when the "Select Printer" dialog box appears.

 **Note**

- For a network connection with TCP/IP, select the printer whose IP address is displayed in **[Connect To]**.
- For parallel connection, select the printer whose printer port is displayed in **[Connect To]**.

- 7** Click **[Install]**.

- 8** Follow the instructions on the screen.

 **Note**

- During installation in Windows 2000, the **[Digital Signature Not Found]** dialog box may appear. In this case, click **[Yes]** to continue the installation.
- During installation in Windows XP, the **[Hardware Installation]** dialog box may appear. In this case, click **[Continue Anyway]** to continue the installation.

A message prompting you to restart your computer may appear. To complete the installation, restart your computer.

Installing the PCL 6/5e Printer Driver

Installing the PCL 6/5e Printer Driver

Two kinds of PCL printer drivers, PCL 6 and PCL 5e, are provided with this printer. We recommend PCL 6 as your first choice.

Limitation

- If your system is Windows 2000/Windows XP or Windows NT 4.0, installing a printer driver by Auto Run requires Administrators permission. When you install a printer driver by Auto Run, log on using an account that has Administrators permission.

Important

- When updating the printer driver by installing the latest version, you should uninstall that of former version if any. See *"Uninstalling the Printer Driver and Software"* in the Printer Reference.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click [OK].

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

4 Select [PCL/RPCS Printer Drivers].

5 The software license agreement appears in the [License Agreement] dialog box.

After reading through all of the contents, click [I accept the agreement] to agree with the license agreement, and then click [Next].

6 Select the printer driver you want to install when the "Select Program" dialog box appears.

7 Follow the instructions on the screen.

Note

- During installation in Windows 2000, the [Digital Signature Not Found] dialog box may appear. In this case, click [Yes] to continue the installation.
- During installation in Windows XP, the [Hardware Installation] dialog box may appear. In this case, click [Continue Anyway] to continue the installation.

Setting Up Options

Important

- If the printer is equipped with certain options, you should set up the options with the printer driver.

Limitation

- In Windows 2000/Windows XP, changing the printer settings requires Manage Printers permission. Members of the Administrators and Power Users groups have Manage Printers permission by default. When you set up options, log on using an account that has Manage Printers permission.
- In Windows NT 4.0, changing the setting of the printer requires Full Control permission. Members of the Administrators, Server Operators, Print Operators, and Power Users groups have Full Control permission by default. When you set up options, log on using an account that has Full Control permission.

Note

- When setting up options, you should access the Printer Properties dialog box from Windows. You cannot set up options by accessing the Printer Properties dialog box from an application.

1 Click **[Start]** on the taskbar, point to **[Settings]**, and then click **[Printers]**.

The **[Printers]** window appears.

Note

- With Windows XP, access the **[Printers and Faxes]** window from **[Start]** on the taskbar.

2 Click to select the icon of the printer you want to use.

3 On the **[File]** menu, click **[Properties]**.

The Printer Properties appear.

4 Click the **[Accessories]** tab.

5 Select options you have installed from the **[Options]** group.

6 Click **[OK]**.

Installing the RPCS Printer Driver

Installing the RPCS Printer Driver

Limitation

- If your system is Windows 2000/Windows XP or Windows NT 4.0, installing a printer driver by Auto Run requires Administrators permission. When you install a printer driver by Auto Run, log on using an account that has Administrators permission.

Important

- When updating the printer driver by installing the latest version, you should uninstall that of former version if any. See *“Uninstalling the Printer Driver and Software”* in the Printer Reference.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click **[OK]**.

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

4 Select **[PCL/RPCS Printer Drivers]**.

5 The software license agreement appears in the **[License Agreement]** dialog box.

After reading through all of the contents, click **[I accept the agreement]** to agree with the license agreement, and then click **[Next]**.

6 Select the RPCS printer driver when the "Select Program" dialog box appears.

7 Follow the instructions on the screen.

Note

- During installation in Windows 2000, the **[Digital Signature Not Found]** dialog box may appear. In this case, click **[Yes]** to continue the installation.
- During installation in Windows XP, the **[Hardware Installation]** dialog box may appear. In this case, click **[Continue Anyway]** to continue the installation.

Setting Up Options

Important

- If the printer is equipped with certain options, you should set up the options with the printer driver.

Limitation

- In Windows 2000/Windows XP, changing the printer settings requires Manage Printers permission. Members of the Administrators and Power Users groups have Manage Printers permission by default. When you set up options, log on using an account that has Manage Printers permission.
- In Windows NT 4.0, changing the setting of the printer requires Full Control permission. Members of the Administrators, Server Operators, Print Operators, and Power Users groups have Full Control permission by default. When you set up options, log on using an account that has Full Control permission.

Note

- When setting up options, you should access the Printer Properties dialog box from Windows. You cannot set up options by accessing the Printer Properties dialog box from an application.

1 Click **[Start]** on the taskbar, point to **[Settings]**, and then click **[Printers]**.

The **[Printers]** window appears.

Note

- With Windows XP, access the **[Printers and Faxes]** window from **[Start]** on the taskbar.

2 Click to select the icon of the printer you want to use.

3 On the **[File]** menu, click **[Properties]**.

The Printer Properties appear.

4 Click the **[Accessories]** tab.

5 Select options you have installed from the **[Options]** group.

6 Click **[OK]**.

Installing the PostScript Printer Driver

This section describes basic instructions for installing the PostScript printer driver. The actual procedure may differ depending on the operating system. Follow the appropriate procedures below.

Important

- When updating the printer driver by installing the latest version, you should uninstall that of former version if any. See “*Uninstalling the Printer Driver and Software*” in the Printer Reference.

Windows 95/98/Me - Installing the PostScript Printer Driver

4

Installing the printer driver

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click [OK].

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

Note

- The printer driver with the selected language will be installed.
- The printer driver will be installed in English if you select the following languages: Cestina, Magyar, Polski, Portugues and Suomi.

4 Select [PostScript 3 Printer Driver].

[Add Printer Wizard] starts.

5 Click [Next].

6 Check [Local Printer] and then click [Next].

A dialog box for selecting the printer appears.

7 Select the printer you want to use, and then click [Next].

8 Follow the instructions on the screen.

Setting up options

Important

- If the printer is equipped with certain options, you should set up the options with the printer driver.

1 Click **[Start]** on the taskbar, point to **[Settings]**, and then click **[Printers]**.

The **[Printers]** window appears.

2 Click to select the icon of the printer you want to use.

3 On the **[File]** menu, click **[Properties]**.

The Printer Properties appear.

4 Click the **[Accessories]** tab.

5 Select options you have installed from the **[Options]** group.

6 Click **[OK]**.

4

Windows 2000/Windows XP - Installing the PostScript Printer Driver

Installing the printer driver

Limitation

- Installing a printer driver requires Administrators permission. When you install a printer driver, log on using an account that has Administrators permission.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click **[OK]**.

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

Note

- The printer driver with the selected language will be installed.
- The printer driver will be installed in English if you select the following languages: Cestina, Magyar, Polski, Portugues and Suomi.

4 Select **[PostScript 3 Printer Driver]**.

[Add Printer Wizard] starts.

5 Click **[Next]**.

6 Check **[Local Printer]** and then click **[Next]**.

A dialog box for selecting the printer port appears.

7 Select the check box of the port you want to use, and then click **[Next]**.

A dialog box for selecting the printer appears.

8 Select the printer you want to use, and then click **[Next]**.

9 Follow the instructions on the screen.

 **Note**

During installation, the **[Digital Signature Not Found]** dialog box may appear. In this case, click **[Yes]** to continue the installation.

During installation in Windows XP, the **[Hardware Installation]** dialog box may appear. In this case, click **[Continue Anyway]** to continue the installation.

4

Setting up options

 **Important**

If the printer is equipped with certain options, you should set up the options with the printer driver.

 **Limitation**

Changing the printer settings requires Manage Printers permission. Members of the Administrators and Power Users groups have Manage Printers permission by default. When you set up options, log on using an account that has Manage Printers permission.

1 Click **[Start]** on the taskbar, point to **[Settings]**, and then click **[Printers]**.

The **[Printers]** window appears.

 **Note**

With Windows XP, access the **[Printers and Faxes]** window from **[Start]** on the taskbar.

2 Click to select the icon of the printer you want to use.

3 On the **[File]** menu, click **[Properties]**.

The Printer Properties appear.

4 Click the **[Device Settings]** tab.

5 Select options you have installed from the **[Installable Options]**.

6 Click **[OK]**.

Windows NT 4.0 - Installing the PostScript Printer Driver

Installing the printer driver

Limitation

- Installing a printer driver requires Administrators permission. When you install a printer driver, log on using an account that has Administrators permission.

Important

- The CD-ROM containing the Windows NT Server operating system version 4.0, or the Windows NT Workstation operating system is required for installing the printer driver.
- We recommend that you upgrade the Windows NT 4.0 operating system to Service Pack 4 or later before installing the printer driver. Contact your Windows retailer for more information about the latest version available.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click [OK].

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

Note

- The printer driver with the selected language will be installed.
- The printer driver will be installed in English if you select the following languages: Cestina, Magyar, Polski, Portugues and Suomi.

4 Select [PostScript 3 Printer Driver].

[Add Printer Wizard] starts.

5 Click [Next].

6 After confirming that the [My Computer] option is selected, click [Next].

A dialog box for selecting the printer port appears.

7 Select the check box of the port you want to use, and then click [Next].

A dialog box for selecting the printer appears.

8 Select the printer you want to use, and then click [Next].

9 Follow the instructions on the screen.

Setting up options

Limitation

- Changing the printer settings requires Manage Printers permission. Members of the Administrators and Power Users groups have Manage Printers permission by default. When you set up options, log on using an account that has Manage Printers permission.

Important

- If the printer is equipped with certain options, you should set up the options with the printer driver.

1 Click **[Start]** on the taskbar, point to **[Settings]**, and then click **[Printers]**.

The **[Printers]** window appears.

2 Click to select the icon of the printer you want to use.

3 On the **[File]** menu, click **[Properties]**.

The Printer Properties appear.

4 Click the **[Device Settings]** tab.

5 Select options you have installed from the **[Installable Options]** group.

6 Click **[OK]**.

Bidirectional transmission

When bidirectional transmission is enabled, information about the paper size and feed direction settings is automatically sent to the machine by a computer. You can also check the machine's status from your computer.

- Bidirectional transmissions are supported by Windows 95/98/Me, Windows 2000/Windows XP and Windows NT 4.0.
- When bidirectional transmission is running, the machine status and information are obtained by opening the printer driver screen.

To support bidirectional transmission, the following conditions are required:

◆ When connecting with a parallel cable

- The computer must support bidirectional transmission.
- The printer must be set to bidirectional transmission.
- The Interface cable must support bidirectional transmission.
- The machine must be connected to the computer using the standard parallel cable and parallel connector.
- Under Windows 95/98/Me, **[Enable bidirectional support for this printer]** must be selected in **[Spool Settings...]** on the **[Details]** tab with RPCS printer driver.

- Under Windows 2000/Windows XP and Windows NT 4.0, **[Enable bidirectional support]** must be selected and **[Enable printer pooling]** must not be selected on the **[port]** tab with RPCS printer driver.

❖ When connecting with the network

- The printer must be set to bidirectional transmission.
- SmartNetMonitor for Client included on the CD-ROM must be installed, and the TCP/IP protocol must be used.
- Under Windows 95/98/Me, **[Enable bidirectional support for this printer]** must be selected in **[Spool Settings...]** on the **[Details]** tab with RPCS printer driver.
- Under Windows 2000/Windows XP and Windows NT 4.0, **[Enable bidirectional support]** must be selected and **[Enable printer pooling]** must not be selected on the **[port]** tab with RPCS printer driver.
- Under Windows NT 4.0, specified IP address in the Microsoft TCP/IP print is used.

❖ When connecting with IEEE 1394

- The printer must be connected to the IEEE 1394 connector of a computer using the IEEE 1394 interface cable.
- **[Activate]** is selected in the SCSI print of IEEE 1394 and **[Activate]** is selected in the Bidi-SCSI print.
- Under Windows 2000/Windows XP and Windows NT 4.0, **[Enable bidirectional support]** must be selected and **[Enable printer pooling]** must not be selected on the **[port]** tab with RPCS printer driver.

❖ When connecting with USB

The printer must be connected to the USB connector of a computer using the USB interface cable.

Cautions when connecting the USB interface cable and the IEEE 1394 interface cable

Limitation

- Do not unplug the cable while printing. Do not turn off the printer power while printing or during bidirectional transmission.

Macintosh - Installing the PostScript 3 Printer Driver

It is necessary to install a printer driver and a PPD file to print from a Macintosh. Follow these steps to install a printer driver and a PPD file on Macintosh running the 8.6 operating system or later up to 9.1.

- 1** Insert the CD-ROM into the CD-ROM drive.
- 2** Double-click the CD-ROM icon.
- 3** Double-click the [PS DRIVER] folder.
- 4** Double-click the folder of the language you use.
- 5** Open [DISK1] and double-click the installer icon.

The PostScript 3 printer driver installer window appears.

- 6** Follow the instructions on the screen.
- 7** Double-click [Extensions] in [System Folder].
- 8** Double-click [Printer Descriptions].
- 9** Double-click the CD-ROM icon on the desktop.
- 10** Double-click [DISK1] in the folder of the language you use.
- 11** Drag the PPD file into [Printer Descriptions] in [Extensions] in [System Folder].
- 12** Drag the plugin file into [Printer Descriptions] in [Extensions] in [System Folder].
- 13** Restart the Macintosh.

Setting up the PPD file

Preparation

Make sure that the machine is connected to an AppleTalk network before performing the following procedure.

- 1** On the [Apple] menu, select [Chooser].
- 2** Click the [Adobe PS] icon.
- 3** In the [Select a PostScript Printer:] list, click the name of the machine you want to use.
- 4** Click [Setup].

5 Click the printer description file you want to use, and then click **[Select]**.

The PPD file is set up, and the **[Adobe PS]** icon appears at the left of the machine name in the list. Next, follow the procedure on p.65 “Setting up options” to make the option settings, or close the **[Chooser]** dialog box.

Setting up options

1 On the **[Apple]** menu, select **[Chooser]**.**2** Click the **[Adobe PS]** icon.**3** In the **[Select the PostScript Printer:]** list, click the name of the machine you want to use, and then click **[Setup]**.**4** Click **[Configure]**.

A list of options appears.

5 Select the option you want to set up and select the appropriate setting for it. **Note**

- If the option you want to set up is not displayed, the PPD file might not be set up correctly. Check the name of the PPD file shown in the dialog box.

6 Click **[OK]**.

The list of options closes.

7 Click **[OK]**.

The **[Chooser]** dialog box appears.

8 Close the **[Chooser]** dialog box. **Reference**

For information about installing the Printer Utility for Mac, see the PostScript 3 Operating Instructions Supplement.

Installing the Printer Driver Using USB

This section describes basic instructions for installing the printer drivers using USB. The printer drivers can be installed from the provided CD-ROM.

Important

- Be sure that all other applications are closed and that the computer is not currently making prints before installation.

Windows 98/Me - Installing the Printer Driver Using USB

The procedure below takes Windows 98 as an example. The procedure for Windows Me may be slightly different.

When the USB cable is used for the first time, the "plug and play" function starts and **[New Hardware Found]**, **[Device Driver Wizard]** or **[Found New Hardware Wizard]** dialog box appears depending on the system used.

If the printer driver is already installed, the "plug and play" is displayed, and the printer with its port directed to the USB cable is added to the "Printers" folder.

- 1** Click **[Next>]**.
- 2** Select **[Search for the best driver for your device. {Recommended}.]**, and then click **[Next>]**.
- 3** Check **[Specify a location:]**, and then click **[Browse...]**.
The **[Browse for Folder]** dialog box appears.
- 4** Insert the CD-ROM provided into the CD-ROM drive.
When Auto Run starts, click **[Exit]**.

Note

- If you want to inactivate Auto Run, press **[Shift]** when inserting the CD-ROM into the drive and keep it pressed until the computer completes transmission to the drive.

- 5** Select the drive where the printer driver is located according to the operating system used, and then click **[Next>]**.
If the CD-ROM drive is D, the folder will be "D:\Drivers\USB-PRINT\WIN98ME".
- 6** Confirm the printer driver location, and then click **[Next>]**.
"USB Printing Support" will be installed.

- 7** Click **[Finish]**.

- 8** Follow the "plug and play" on the screen to install the printer drivers.

When the installation is complete, the printer with its port directed to "USB00n" appears on the **[Printers]** folder. ("n" is the number of printers connected.)

Windows 2000/Windows XP-Installing the Printer Driver Using USB

! Limitation

- Installing a printer driver requires the Administrators permission. When you install a printer driver, log on using an account that has the Administrators permission.

When the USB cable is used for the first time, the **[Found New Hardware Wizard]** dialog box appears, and Windows 2000/Windows XP's **[USB Printing Support]** will be installed automatically.

If the printer driver is already installed, the "plug and play" is displayed, and the printer with its port directed to the USB cable is added to the "Printers"^{*1} folder. With Windows XP, even if the printer driver has already been installed, **[Found New Hardware Wizard]** may start when connecting the printer and the computer with the USB cable for the first time. In this case, install the printer driver by following the procedure below.

1 Install the printer driver by referring to the instructions for installing the printer driver with Parallel/Ethernet connection.

When installation is complete, the printer with its port directed to "USB00n" appears on the **[Printers]**^{*1} folder. ("n" is the number of printers connected.)

^{*1} With Windows XP, the folder is **[Printers and Faxes]**.

Macintosh-Creating a Desktop Printer icon

To use a printer connected by USB, create a Desktop Printer icon.

- 1 Install the printer driver. For more information about how to install the printer driver, see p.58 "Installing the PostScript Printer Driver".
- 2 Double-click **[Desktop Printer Utility]** in the **[AdobePS Components]** folder.
- 3 Select **[AdobePS]** in **[With:]** and **[Printer (USB)]** in **[Create Desktop]**, and then click **[OK]**.
- 4 Click **[Change]** in **[USB Printer Selection]**.
- 5 Select the model you are using in **[Select a USB Printer:]**, and then click **[OK]**.
- 6 Click **[Auto Setup]** in **[PostScript™ Printer Description (PPD) File]**.
- 7 Click **[Create]**.
- 8 Enter the printer name, and then click **[Save]**.

The printer icon appears on the desktop.

- 9 Exit the Desktop Printer Utility.

Installing the Printer Driver Using IEEE 1394

This section gives basic instructions for installing the printer drivers using IEEE 1394. The printer drivers can be installed from the CD-ROM provided.

Important

- Be sure that all other applications are closed and that the computer is not printing before installation.

Printing with SCSI Print

Printing using a SCSI print device with the optional 1394 Interface Unit is possible under Windows 2000 and Windows XP.

Important

- Do not connect new IEEE 1394 or USB devices to the printer or turn on the printer while installing the printer driver.
- Before uninstalling the printer driver, be sure to disconnect the 1394 interface cable from the computer.
- "SCSI print" must be set active from the control panel. For more information, see p.45 "IEEE 1394 Configuration".

Note

- This machine cannot receive print data from more than one computer at the same time. If you send data from your computer when data is being received from another computer, a message may appear on the computer display.

Installing the Printer Driver

Note

- If [**Found New Hardware Wizard**] appears every time the computer is started or the cable is connected with Windows 2000/Windows XP, inactivate the device. See p.71 "Inactivating the Device". If you want to install another printer driver after setting the "1394_00n" port, select the "1394_00n" port by following the procedures of installing a printer driver.
- When the printer connected via the 1394 Interface Unit is installed properly, the appearance of the icon in the printer folder changes according to whether the cable is plugged in or not.

Windows 2000

- 1** Connect the printer and the computer using the IEEE 1394 interface cable.
- 2** In the [Found New Hardware Wizard] dialog box, and then click [Next>].
- 3** When the [This wizard will complete the installation for this Device: Unknown] message appears, select [Optional search locations:], and then click [Next>].
- 4** When the [Locate Driver Files] message appears, select the [Optional search locations.] check box, and then select [Specify a location], and then click [Next>].
- 5** Hold down the left **[SHIFT]** key and insert the CD-ROM into the CD-ROM drive.

Keep the left **[SHIFT]** key held down until the computer has finished accessing the CD-ROM.

If the Auto Run program starts, click **[Cancel]**, and then **[Exit]**.

- 6** Click **[Browse]**.
- 7** Select the printer driver that you want to use. The following are locations where printer drivers are stored:
 - RPCS
 \DRIVERS\RPCS\WIN2000\DISK1
 - PCL6
 \DRIVERS\PCL6\WIN2000\DISK1
 - PCL5e
 \DRIVERS\PCL5e\WIN2000\DISK1
 - PostScript 3
 \DRIVERS\PS3\WIN2000\DISK1

8 Click **[Open]**.

9 Click **[OK]**.

A printer model selection dialog box appears.

10 Follow the instructions on the screen.

 **Note**

- During installation, the **[Digital Signature Not Found]** dialog box may appear. In this case, click **[Yes]** to continue the installation.
- If the printer driver is already installed, the printer icon is automatically added to the **[Printer]** folder. In such a case, installation of the printer driver is not necessary.
- When the installation is complete, the printer with its port directed to "1394_00n" appears on the **[Printers]** folder. ("n" is the number of printers connected.)

Windows XP

- 1** Connect the printer and the computer using the IEEE 1394 interface cable.
- 2** In the **[Found New Hardware Wizard]** dialog box, confirm that **[This wizard helps you install software for: (printer name)]** is displayed, and select **[Install from a list on specific location (Advanced)]**, and then click **[Next>]**.
- 3** When the **[Please choose your search and installation option.]** messages appears, select the **[Search for the best driver in these locations.]** check box, and then select the **[Include this location in the search:]** check box, and then select the **[Include this location in the search:]** check box.
- 4** Install the printer driver following the same procedures as steps **5-10** in Windows 2000.

 **Note**

- During installation in Windows XP, the **[Hardware Installation]** dialog box may appear. In this case, click **[Continue Anyway]** to continue the installation.
- When the installation is complete, the printer with its port directed to "1394_00n" appears on the **[Printers and Faxes]** folder. ("n" is the number of printers connected.)
- If the printer driver is already installed, the printer icon is automatically added to the **[Printer]** folder. In this case, installation of the printer driver is not necessary.
- Even if the printer driver has already been installed, **[Found New Hardware Wizard]** may start when connecting the printer and the computer with the IEEE 1394 interface cable for the first time. In this case, install the printer driver by following the procedure.

Printing with IP over 1394

You can print by setting the IP address for this machine and the computer on which Windows XP is installed.

Preparation

"IP over 1394" must be set on the control panel and an IP address for the IEEE 1394 must be specified.

For more information about how to make printer settings, see p.45 "IEEE 1394 Configuration".

Limitation

- When using the IEEE 1394 (IP over 1394) interface in a network, the Ethernet interface cannot be used in the same network.

Note

- The maximum number of simultaneous print requests when connecting with IP over 1394 includes the print requests from the Ethernet interface. For more information, see the Network Printing Guide.

Installing the Printer Driver

To Print using Standard TCP/IP port. For more information about Standard TCP/IP port settings, see Network Printing Guide.

Inactivating the Device

- ❖ When [Add New Hardware Wizard] starts every time you restart the computer with an operating system, which does not support SCSI print or plug in or out the cable, inactivate the device by following procedures.

- Windows Me
 - ① In the [Add New Hardware Wizard] dialog box, confirm that [Windows has found the following new Hardware: IEEE SBP-2 Device] is displayed, and select [Recommended search for a better driver [Recommended]], and then click [Next>].
 - ② When the [Windows was unable to locate the software for this device.] message appears, click [Finish].

❖ If you do not want to install the printer when [Found New Hardware Wizard] starts with an operating system, which supports SCSI print, inactivate the device by following the procedures.

- Windows XP
 - ① In the [Found New Hardware Wizard] dialog box, confirm that [This wizard helps you install software for: Unknown] is displayed, and select [Install from a list on specific location (Advanced)], and then click [Next>].
 - ② When the [Please choose your search and installation option.] message appears, remove all the selections from [Search for the best driver in these locations.], and then click [Next>].
 - ③ When the [The wizard could not find the software on your computer for..] message appears, click [OK].
 - ④ When the [Cannot Install this Hardware] message appears, select the [Don't prompt again to install the software] check box, and then click [Finish].

- Windows 2000
 - ① In [Found New Hardware Wizard] dialog box, and then click [Next>].
 - ② When the [This wizard will complete the installation for this Device: Unknown] message appears, and select [Search for a suitable driver for my device [recommended]], and then click [Next>].
 - ③ When the [Locate Driver Files] message appears, remove all the selections from [Optional search locations.], and then click [Next>].
 - ④ When the [Driver Files Search Results] message appears, select the [Disable the device. The Add/Remove Hardware Wizard in the control Panel can be able to complete the driver installations.] check box, and then click [Finish].

❖ When [Found New Hardware Wizard] appears every time you restart the computer with an operating system which does not support IP over 1394, plug in or take out the cable, inactivate the device with the following procedure.

- Windows 2000
 - ① In [Found New Hardware Wizard] dialog box, and then click [Next>].
 - ② When the [This wizard will complete the installation for this Device:] message appears and "IP over 1394" appears select [Search for a suitable driver for my device [recommended]], and then click [Next>].
 - ③ When the [Locate Driver Files] message appears, remove all the selections from [Optional search locations.], and then click [Next>].
 - ④ When the [Driver Files Search Results] message appears, select the [Disable the device. The Add/Remove Hardware Wizard in the control Panel can be able to complete the driver installations.] check box, and then click [Finish].

Installing the SmartNetMonitor for Client/Admin

! Limitation

- ❑ If your system is Windows 2000/Windows XP or Windows NT 4.0, installing software by Auto Run requires Administrators permission. When you install a printer driver by Auto Run, log on using an account that has Administrators permission.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

Auto Run will start the installer.

3 Select a language to change the interface language, and then click **[OK]**.

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

4 Select **[SmartNetMonitor for Client/Admin]**.

5 The software license agreement appears in the **[License Agreement]** dialog box.

After reading through all of the contents, click **[I accept the agreement]** to agree with the license agreement, and then click **[Next]**.

6 Select the program you want to install when the "Select Program" dialog box appears.

7 Follow the instructions on the screen.

Installing the Agfa Monotype Font Manager 2000

! Limitation

- ❑ If your system is Windows 2000/Windows XP or Windows NT 4.0, installing software by Auto Run requires Administrators permission. When you install a printer driver by Auto Run, log on using an account that has Administrators permission.

1 Close all applications that are running.

2 Insert the CD-ROM into the CD-ROM drive.

4 Auto Run will start the installer.

3 Select a language to change the interface language, and then click [OK].

The following languages are available: Cestina (Czech), Dansk (Danish), Deutsch (German), English (English), Espanol (Spanish), Francais (French), Italiano (Italian), Magyar (Hungarian), Nederlands (Dutch), Norsk (Norwegian), Polski (Polish), Portugues (Portuguese), Suomi (Finnish), Svenska (Swedish)

Default interface language is English.

4 Select [Agfa Monotype Font Manager 2000].

5 Follow the instructions on the screen.

Using Adobe PageMaker Version 6.0 or 6.5

If you use the printer under Windows 95/98/Me, Windows 2000/Windows XP, Windows NT 4.0 with Adobe PageMaker, you need to copy the PPD file to the PageMaker folder.

The PPD file is the file with extension ".ppd". It is in the folder "DRIVERS\PS\WIN9X_ME\ (Language)\DISK1\" on the CD-ROM.

The **[WIN9X_ME]** folder, inside the **[PS]** folder is for the Windows 95/98/Me operating system. Use the folder at this level that is appropriate for the operating system you are using.

The third folder, "(Language)" may be substituted by an appropriate language name.

Copy this file to the PageMaker folder.

For PageMaker 6.0 default installation, the folder is "C:\PM6\RSRC\PPD4", and for PageMaker 6.5 default installation, the directory is "C:\PM65\RSRC\USENGLISH\PPD4". "USENGLISH" may differ depending on your language selection.

Reference

For more information about the language name, see p.52 "Quick Install".

Notes to users in the United States of America

Notice:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Warning

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Caution (in case of 100BaseTX environment):

Properly shielded cables must be used for connections to host computer (and/or peripheral) in order to meet FCC emission limits.

Network interface cable with ferrite core must be used for RF interference suppression.

Declaration of Conformity

Product Name: Laser Printer

Model Number: RICOH LASER AP2610/RICOH LASER AP2610N

Responsible party: Ricoh Corporation

Address: 5 Dedrick Place, West Caldwell, NJ 07006

Telephone number: 973-882-2000

This device complies with part 15 of FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Properly shielded cables must be used for connections to host computer (and/or peripheral) in order to meet FCC emission limits.

Network interface cable with ferrite core must be used for RF interference suppression.

Note to users in Canada

Note:

This Class B digital apparatus complies with Canadian ICES-003.

802.11b Interface Unit TypeA(R-WL11):

This device complies with RSS 210 of Industry Canada.

To prevent radio interference to the licensed service, this device must be operated indoors only and should be kept away from windows to provide maximum shielding.

Remarque concernant les utilisateurs au Canada

Avertissement:

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

802.11b Interface Unit TypeA(R-WL11):

Pour empêcher que cet appareil cause du brouillage au service faisant l'objet d'une licence, il doit être utilisé à l'intérieur et devrait être placé loin des fenêtres afin de fournir un écran de blindage maximal. Si le matériel (ou son antenne d'émission) est installé à l'extérieur, il doit faire l'objet d'une licence.

In accordance with IEC 60417, this machine uses the following symbols for the main power switch:

I means POWER ON.

O means POWER OFF.

Notes to Users

This manual describes the procedures and provides necessary information about printing using IEEE 1394.

IEEE 1394 Configuration

Use this procedure to configure the printer for use in the IEEE 1394 environment. The following table shows the control panel settings and their default values. These items are included in the "Host Interface" menu.

Setting Name	Value
IP Address1394	000.000.000.000
Subnet Mask1394	000.000.000.000
IP over 1394	Active
SCSI print	Active
Bidi-SCSI print	Active

Depending on the protocol you use, procedures vary. See the following table.

IP over 1394	Steps 1-3 and then go to steps 6 to 7
SCSI print	Steps 1-3 and then go to steps 9 to 10

1 Press [Menu].

"Menu" appears on the panel display.

2 Press [▲] or [▼] to display "Host Interface" menu.

```
Menu:
Host Interface
```

3 Press [Enter #].

The following message appears on the panel display.

```
Host Interface:
I/O Buffer
```

4 Press [▲] or [▼] to display "IEEE 1394 Setup".

```
Host Interface:
IEEE 1394 Setup
```

5 Press [Enter #].

The following message appears on the panel display.

```
IEEE 1394 Setup:
IP Address1394
```

6 Press [▲] or [▼] to display "IP over 1394".

```
IEEE 1394 Setup:
IP over 1394
```

1 Press [Enter #].

2 Press [▲] or [▼] to select either "Active" or "Not Active".

3 Press [Enter #].

The display returns to the previous menu in a few seconds.

7 Assign the IP address to the printer.

Do not overlap the IP address in the same subnet or the same IP address in the network setting.

 **Note**

- To get the IP address for the printer, contact your network administrator.

1 Press **[▲]** or **[▼]** until the following message appears.

```
IEEE 1394 Setup:
IP Address1394
```

2 Press **[Enter #]**.

The current IP address appears on the panel display.

```
IP Address1394:
000.000.000.000
```

3 Press **[▲]** or **[▼]** to enter the leftmost entry field of the IP address.

```
IP Address1394:
192.000.000.000
```

4 Press **[Enter #]**.

The pointer (█) moves to the next entry field automatically.

```
IP Address1394:
192.02█.000.000
```

 **Note**

- The value moves by 10 if **[▲]** or **[▼]** is kept pressed.
- You can return the pointer (█) to the previous (left) entry field by pressing **[Escape]**.
- If you press **[Escape]** when the pointer (█) is on the leftmost position, the selected IP address is reset.

5 Repeat steps **3** and **4** to enter the IP address.

```
IP Address1394:
192.168.000.011
```

Check if the pointer (█) is at the rightmost position, and press **[Enter #]** to register the IP address you selected.

```
IEEE 1394 Setup:
IP Address1394
```

8 Set "Subnet Mask1394" in the same way.

9 Set "SCSI print" and "Bidi-SCSI print" if necessary.

 **Note**

- The default setting is "Active".

10 Press **[▲]** or **[▼]** to display "SCSI print".

```
IEEE 1394 Setup:
SCSI Print
```

11 Press **[Enter #]**.

The following message appears on the panel display.

```
SCSI Print:
*Active
```

12 Press **[▲]** or **[▼]** to select either "Active" or "Not Active", and then press **[Enter #]**.

Set "Bidi-SCSI print" in the same way.

 **Note**

- Depending on the model type, you may not be able to make "Bidi-SCSI print" setting. For more information, see p.11 "Bi-directional Transmission".

"Ready" appears on the panel display.

 Press **[On Line]**.

14 Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

The settings are now complete. Go to p.3 "Installing the Printer Driver Using IEEE 1394".

Installing the Printer Driver Using IEEE 1394

This section gives basic instructions for installing the printer drivers using IEEE 1394. The printer drivers can be installed from the CD-ROM provided.

 **Important**

- Be sure that all other applications are closed and that the computer is not printing before installation.

Printing with SCSI Print

Printing using a SCSI print device with the optional 1394 Interface Unit is possible under Windows 2000 and Windows XP.

 **Important**

- Do not connect new IEEE 1394 or USB devices to the printer or turn on the printer while installing the printer driver.
- Before uninstalling the printer driver, be sure to disconnect the 1394 interface cable from the computer.
- "SCSI print" must be set active from the control panel. For more information, see p.1 "IEEE 1394 Configuration".

 **Note**

- This machine cannot receive print data from more than one computer at the same time. If you send data from your computer when data is being received from another computer, an error or a warning message may appear on the computer display.

Installing the Printer Driver

Note

- If **[Found New Hardware Wizard]** appears every time the computer is started or the cable is connected with Windows 2000/Windows XP, inactivate the device. See p.7 "Inactivating the Device". If you want to install another printer driver after setting the "1394_00n" port, select the "1394_00n" port by following the procedures of installing a printer driver. ("n" is the number of printers connected.")
- When the printer connected via the 1394 Interface Unit is installed properly, the appearance of the icon in the printer folder changes according to whether the cable is plugged in or not.

Windows 2000

- 1** Connect the printer and the computer using the IEEE 1394 interface cable.
- 2** The **[Found New Hardware Wizard]** dialog box appears. Click **[Next>]**.
- 3** When the **[This wizard will complete the installation for this Device: Unknown]** message appears, select **[Optional search locations:]**, and then click **[Next>]**.
- 4** When the **[Locate Driver Files]** message appears, select the **[Optional search locations.]** check box, and then select **[Specify a location]**, and then click **[Next>]**.
- 5** Hold down the left **[SHIFT]** key and insert the CD-ROM into the CD-ROM drive.

Note

- Keep the left **[SHIFT]** key held down until the computer has finished accessing the CD-ROM.
 - If the Auto Run program starts, click **[Cancel]**, and then **[Exit]**.
- 6** Click **[Browse]**.
 - 7** Select the printer driver that you want to use. The following are locations where printer drivers are stored:
 - RPCS
/DRIVERS/RPCS/(Language)/WIN2000/DISK1
 - PCL 6
/DRIVERS/PCL6/(Language)/WIN2000/DISK1
 - PCL 5e
/DRIVERS/PCL5e/(Language)/WIN2000/DISK1
 - PostScript 3
/DRIVERS/PS3/(Language)/WIN2000/DISK1

8 Click **[Open]**.

9 Click **[OK]**.

A printer model selection dialog box appears.

10 Follow the instructions on the screen.

 **Note**

- During installation, the **[Digital Signature Not Found]** dialog box may appear. In this case, click **[Yes]** to continue the installation.
- If the printer driver is already installed, the printer icon is automatically added to the **[Printer]** folder. In such a case, installation of the printer driver is not necessary.
- When the installation is complete, the printer with its port directed to "1394_00n" appears on the **[Printers]** folder. ("n" is the number of printers connected.")

Windows XP

1 Connect the printer and the computer using the IEEE 1394 interface cable.

2 In the **[Found New Hardware Wizard]** dialog box, confirm that **[This wizard helps you install software for: Unknown]** is displayed, and select **[Install from a list on specific location (Advanced)]**, and then click **[Next>]**.

3 When the **[Please choose your search and installation option.]** messages appears, select the **[Search for the best driver in these locations.]** check box, and then select the **[Include this location in the search:]** check box, and then select the **[Include this location in the search:]** check box.

4 Install the printer driver following the same procedures as steps **5-10** in Windows 2000.

 **Note**

- During installation in Windows XP, the **[Hardware Installation]** dialog box may appear. In this case, click **[Continue Anyway]** to continue the installation.
- When the installation is complete, the printer with its port directed to "1394_00n" appears on the **[Printers and Faxes]** folder. ("n" is the number of printers connected.)
- If the printer driver is already installed, the printer icon is automatically added to the **[Printer]** folder. In this case, installation of the printer driver is not necessary.

- ❑ Even if the printer driver has already been installed, **[Found New Hardware Wizard]** may start when connecting the printer and the computer with the IEEE 1394 interface cable for the first time. In this case, install the printer driver by following the procedure.

Printing with IP over 1394

You can print by setting the IP address for this machine and the computer on which Windows XP is installed.

Preparation

Depending on the version of SmartNetMonitor for Client, you can print with Windows Me. For more information, see p.6 “Use of the IP over 1394 Environment”.

“IP over 1394” must be set on the control panel and an IP address for the IEEE 1394 must be specified.

For more information about how to make printer settings, see p.1 “IEEE 1394 Configuration”.

Limitation

- ❑ When using the IEEE 1394 (IP over 1394) interface in a network, the Ethernet interface cannot be used in the same subnet.

Note

- ❑ The maximum number of simultaneous print requests when connecting with IP over 1394 includes the print requests from the Ethernet interface. For more information, see the Network Printing Guide.

Installing the Printer Driver

To Print using Standard TCP/IP port. For more information about Standard TCP/IP port settings, see Network Printing Guide.

.....

Use of the IP over 1394 Environment

◆ Available Operating System

Available Operating System	Available Ports
Windows XP	<ul style="list-style-type: none">• Standard TCP/IP port• SmartNetMonitor port ^{*1}
Windows Me	<ul style="list-style-type: none">• SmartNetMonitor port ^{*1}

^{*1} You can use SmartNetMonitor port when SmartNetMonitor for Client version is 5.0.0.0 or later.

❖ **Confirming the SmartNetMonitor Version**

- ① Run SmartNetMonitor for Client.
The SmartNetMonitor for Client icon appears at the right end of the taskbar.
- ② Right-click the SmartNetMonitor for Client icon, and check if the desired printer is configured on the pop-up menu that appears.
- ③ Click **[Version]** on the pop-up menu.

Inactivating the Device

❖ **When [Add New Hardware Wizard] starts every time you restart the computer with an operating system, which does not support SCSI print or plug in or out the cable, inactivate the device by following procedures.**

- Windows Me
 - ① In the **[Add New Hardware Wizard]** dialog box, confirm that **[Windows has found the following new Hardware: IEEE SBP-2 Device]** is displayed, and select **[Recommended search for a better driver [Recommended]]**, and then click **[Next>]**.
 - ② When the **[Windows was unable to locate the software for this device.]** message appears, click **[Finish]**.

❖ **If you do not want to install the printer when [Found New Hardware Wizard] starts with an operating system, which supports SCSI print, inactivate the device by following the procedures.**

- Windows XP
 - ① In the **[Found New Hardware Wizard]** dialog box, confirm that **[This wizard helps you install software for: Unknown]** is displayed, and select **[Install from a list on specific location (Advanced)]**, and then click **[Next>]**.
 - ② When the **[Please choose your search and installation option.]** message appears, remove all the selections from **[Search for the best driver in these locations.]**, and then click **[Next>]**.
 - ③ When the **[The wizard could not find the software on your computer for..]** message appears, click **[OK]**.
 - ④ When the **[Cannot Install this Hardware]** message appears, select the **[Don't prompt again to install the software]** check box, and then click **[Finish]**.
- Windows 2000
 - ① In **[Found New Hardware Wizard]** dialog box, and then click **[Next>]**.
 - ② When the **[This wizard will complete the installation for this Device: Unknown]** message appears, and select **[Search for a suitable driver for my device [recommended]]**, and then click **[Next>]**.

- ③ When the **[Locate Driver Files]** message appears, remove all the selections from **[Optional search locations.]**, and then click **[Next>]**.
- ④ When the **[Driver Files Search Results]** message appears, select the **[Disable the device. The Add/Remove Hardware Wizard in the control Panel can be able to complete the driver installations.]** check box, and then click **[Finish]**.

❖ When **[Found New Hardware Wizard]** appears every time you restart the computer with an operating system which does not support IP over 1394, plug in or take out the cable, inactivate the device with the following procedure.

- Windows 2000

- ① In **[Found New Hardware Wizard]** dialog box, and then click **[Next>]**.
- ② When the **[This wizard will complete the installation for this Device:]** message appears and "IP over 1394" appears select **[Search for a suitable driver for my device [recommended]]**, and then click **[Next>]**.
- ③ When the **[Locate Driver Files]** message appears, remove all the selections from **[Optional search locations.]**, and then click **[Next>]**.
- ④ When the **[Driver Files Search Results]** message appears, select the **[Disable the device. The Add/Remove Hardware Wizard in the control Panel can be able to complete the driver installations.]** check box, and then click **[Finish]**.

Printer Does not Print

Possible Cause	Solution
If you use IEEE 1394, check for the following.	<ol style="list-style-type: none">① Make sure the 1394 Interface Unit is installed properly.② Make sure the IEEE 1394 cable is connected properly.③ Restart the computer. If the problem still exists when SCSI print is used with Windows 2000 and Windows XP, go to step ④.④ Disconnect all the IEEE 1394 cables from the computer.⑤ If you uninstall the printer driver when the printer is connected to a computer with "SCSI print", the printer driver may not be uninstalled properly. To uninstall the driver properly, use the IEEE 1394 Printer Removal Utility on the CD-ROM that comes with the printer. Stored in: CD-ROM labeled "Printer Driver and Utilities"/UTILITY/1394/ <p> Note</p> <ul style="list-style-type: none"><input type="checkbox"/> For more information about the IEEE 1394 Printer Removal Utility, see the README file in the same folder as the program. <ol style="list-style-type: none">⑥ Restart the computer.

Remote Maintenance by telnet

sprint

To make setting for IEEE 1394 (SCSI print), use the `sprint` command.

◆ **View settings**

The IEEE 1394 (SCSI print) settings are displayed.

```
msh> sprint
```

◆ **Bidirectional configuration for the IEEE 1394 (SCSI print)**

Use this setting to configure whether the IEEE 1394 (SCSI print) is bidirectional. The factory default is "on".

```
msh> sprint bidi [on/off]
```

 **Note**

- Depending on the model type, you may not be able to use this command. For more information, see p.11 "Bidirectional Transmission".

Configuring the Network Interface Board

Item name	Meaning
IP over 1394 Device name Address Netmask Broadcast	IP address. Subnet mask. Broadcast address.
SCSI print Bidi. ^{*1}	Bidirectional setting (on/off).

^{*1} Depending on the model type, the item may not appear on the display panel. For more information, see p.11 "Bidirectional Transmission".

Using DHCP

 **Limitation**

- DHCP cannot be used with IEEE 1394 (IP over 1394). Set a fixed IP address with the control panel, telnet or a Web browser.
 - See p.1 "IEEE 1394 Configuration".
 - See "TCP/IP address" in the Network Printing Guide.
 - See "Configuring the Network Interface Board Settings" in the Network Printing Guide.

Specifications

1394 Interface Unit Type 4510

◆ **Transmission Mode:**

IEEE 1394

◆ **Device Class:**

SCSI print, IP over 1394

◆ **Interface Connector:**

IEEE 1394 (6 pins x 2)

◆ **Required cable:**

1394 Interface cable (6 pins x 4 pins, 6 pins x 6 pins)

Important

- You cannot plug devices together to create loops.
- Do not use a cable more than 4.5 meters (14.8 feet) long.

❖ **Connectable number of device in a bus:**

Maximum 63

❖ **Allowed cable hops in a bus:**

Maximum 16

❖ **Power supply:**

Nonpower supply

Cable Power repeated (IEEE 1394a-2000 compliant)

Bidirectional Transmission

The following models do not support bidirectional transmission. Check the model.

- RICOH Aficio AP4510
- Savin MLP45
- Gestetner P7145
- nashuatec P7145
- Rex-Rotary P7145
- LANIER 2145

Addendum

This manual describes necessary information about using this machine.

IEEE 802.11b (Wireless LAN) Configuration

This section provides information that is not in the Setup Guide.

Configure the printer for using the IEEE 802.11b (Wireless LAN). The following table shows the control panel settings and their default values. These items are included in the "Host Interface" menu.

Setting Name	Default Value
Comm. Mode	802.11 Ad hoc
Channel	<ul style="list-style-type: none"> Inch version (1-11) 11 Metric version (1-13) 11
Trans. Speed	Auto
WEP Settings	Not Active

In order to use the IEEE 802.11b (Wireless LAN), select "IEEE 802.11b" for "LAN Type" in "Network Setup" of the Host Interface menu, and then set "IP Address", "Subnet Mask", "Gateway Address", "Network Boot", "Frame Type (NW)" and "Active Protocol" in the "Network Setup". For more information about setting the items in the "Network Setup", see the Setup Guide.

- 1 Press **[Menu]**.

"Menu" appears on the panel display.

- 2 Press **[▲]** or **[▼]** to display "Host Interface" menu.

- 3 Press **[Enter #]**.

The following message appears on the panel display.

- 4 Press **[▲]** or **[▼]** to display "IEEE 802.11b".

```
Host Interface:
IEEE 802.11b
```

- 5 Press **[Enter #]**.
Be sure that "Comm. Mode" appears on the panel display.

```
IEEE 802.11b:
Comm. Mode
```

- 6 Press **[Enter #]**.
The following message appears on the panel display.

```
Comm. Mode:
*802.11 Ad hoc
```

- 7 Press **[▲]** or **[▼]** to select the transmission mode.

 **Note**

- The factory default is "802.11Ad hoc".
- To use an IEEE 802.11b card for which the IBSS (Network Name) setting is not necessary, select "Ad hoc".

- 8 Press **[Enter #]**.
The display returns to the previous menu in a few seconds.

- 9 If "802.11Ad hoc" or "Ad hoc" is selected for "Comm. Mode", set the channel to use for transmission.

 **Note**

- Confirm the network administrator for the channel to use.

- 1 Press **[▲]** or **[▼]** to display "Channel".

```
IEEE 802.11b:
Channel
```

- 2 Press **[Enter #]**.
The channel currently used appears on the panel display.

```
Channel:
(1-11) 11
```

- 3 Press **[▲]** or **[▼]** to enter the channel.

- 4 Press **[Enter #]**.

- 10 Set "Trans. Speed" in the same way.

 **Note**

- The factory default is "Auto". If you need to change the transmitting speed depending on environment you are using, select the appropriate transmitting speed.

- 11 Press the **[▲]** or **[▼]** key to display "SSID", and then press the **[Enter #]** key.

```
IEEE 802.11b:
SSID
```

The following message appears on the panel display.

```
SSID:
Enter ID
```

 **Note**

- The factory default is "ASSID".

- If an SSID has been set, you can check the set SSID. Press the **[▲]** or **[▼]** key to display "View", and then press the **[Enter #]** key.

1 Press the [Enter #] key.

The following message appears on the panel display.

Note

- The value in brackets at the upper right is the number of characters entered.
- 2 Press the [▲] or [▼] key to select characters, and then press the [Enter #] key.**

The pointer (█) moves to the next character position.

3 Continue entering the key.

Note

- The characters that can be used are ASCII 0x20-0x7e (32 bytes).
 - If you press the **[Escape]** key, the pointer (█) moves to the previous character position.
- 4 After entering the key, press the [Enter #] key twice.**

The screen returns to step 1.

12 Press the [▲] or [▼] key to display "WEP Setting".

1 Press the [Enter #] key.

2 Press the [▲] or [▼] key to display "Active", and then press the [Enter #] key.

The following message appears on the panel display.

Note

- When setting the WEP Setting to "Active", you will need to enter the WEP key. If you have not entered the key, be sure to enter it.
- If you have entered the WEP key and change the setting, press the **[▲]** or **[▼]** key to display "No", and then press the **[Enter #]** key.

3 Press the [Enter #] key.

Note

- The value in brackets at the upper right is the number of characters entered.

- 4 Press the **[▲]** or **[▼]** key to select characters, and then press the **[Enter #]** key.

The pointer (█) moves to the next character position.

- 5 Continue entering the key.

 **Note**

- You can enter either 10 or 26 characters. If the key you enter is not 10 or 26 characters long, the following message appears.

- If you press the **[Escape]** key, the pointer (█) moves to the previous character position.

- 6 After entering the key, press the **[Enter #]** key.

The screen returns to step 10.

- 13 Press **[On Line]**.

"Ready" appears on the panel display.

- 14 Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

Using the IEEE 802.12b (Wireless LAN)

This section provides information that is not in the Network Printing Guide.

Using in Ad hoc Mode

Depending on the client software of the IEEE 802.11b card installed in the computer, setting IBSS (Independent Base Service Set or Network Name) may be required. In this case, make the IBSS settings.

 **Note**

- If there is computer with an IEEE 802.11b card installed that requires IBSS settings and a computer with an IEEE 802.11b card installed that does not require IBSS settings, the printer may not be able to transmit to either of them.

- 1 **Make setting for the computer.**

Set the transmission mode of the IEEE 802.11b card installed in the computer.

- 2 **Make the computer network settings. The following items must be set:**

- IP Address
- Subnet Mask

Reference

For more information about how to make setting for the IEEE 802.11b card installed in the computer and the computer in use, see the appropriate operating instructions or consult your network administrator.

telnet

◆ Setting IEEE 802.11b

- Configuration

Parameter	Value to be configured
mode [ap adhoc 802.11adhoc]	You can set infrastructure mode (ap), ad hoc mode (adhoc) or 802.11 ad hoc mode (802.11adhoc). The default is 802.11 ad hoc mode.
key [<i>key value</i>]	You can use a 10-digit hexadecimal key with 64-bit WEP. You can use a 26-digit hexadecimal key with 128-bit WEP. Entering a setting other than these is invalid.

1 Press **[Menu]**.

"Menu" appears on the panel display.

2 Press **[▲]** or **[▼]** to display "Host Interface" menu.

3 Press **[Enter #]**.

The following message appears on the panel display.

4 Press **[▲]** or **[▼]** to display "IEEE 802.11b".

5 Press **[Enter #]**.

Be sure that "Comm. Mode" appears on the panel display.

6 Press **[Enter #]**.

The following message appears on the panel display.

7 Press **[▲]** or **[▼]** to select the transmission mode.

 **Note**

- The factory default is "802.11Ad hoc".
- To use an IEEE 802.11b card for which the IBSS (Network Name) setting is not necessary, select "Ad hoc".

8 Press **[Enter #]**.

The display returns to the previous menu in a few seconds.

9 If "802.11Ad hoc" or "Ad hoc" is selected for "Comm. Mode", set the channel to use for transmission.

 **Note**

- Confirm the network administrator for the channel to use.

1 Press **[▲]** or **[▼]** to display "Channel".

```
IEEE 802.11b:
Channel
```

2 Press **[Enter #]**.

The channel currently used appears on the panel display.

```
Channel :
(1-13)   11
```

3 Press **[▲]** or **[▼]** to enter the channel.

4 Press **[Enter #]**.

10 Set "Trans. Speed" in the same way.

 **Note**

- The factory default is "Auto". If you need to change the transmitting speed depending on environment you are using, select the appropriate transmitting speed.

11 Press the **[▲]** or **[▼]** key to display "SSID", and then press the **[Enter #]** key.

```
IEEE 802.11b:
SSID
```

The following message appears on the panel display.

```
SSID:
Enter ID
```

 **Note**

- The factory default is "ASSID".
- If an SSID has been set, you can check the set SSID. Press the **[▲]** or **[▼]** key to display "View", and then press the **[Enter #]** key.

1 Press the **[Enter #]** key.

The following message appears on the panel display.

```
SSID:      [ 0 ]
█
```

 **Note**

- The value in brackets at the upper right is the number of characters entered.

2 Press the **[▲]** or **[▼]** key to select characters, and then press the **[Enter #]** key.

```
SSID:      [ 1 ]
A
```

The pointer (█) moves to the next character position.

```
SSID:      [ 1 ]

```

① Press the **[Enter #]** key.

```
WEP Setting:
*Not Active
```

② Press the **[▲]** or **[▼]** key to display "Active", and then press the **[Enter #]** key.

```
WEP Setting:
Active
```

The following message appears on the panel display.

```
Change WEP Key:
Yes
```

 **Note**

- When setting the WEP Setting to "Active", you will need to enter the WEP key. If you have not entered the key, be sure to enter it.
- If you have entered the WEP key and change the setting, press the **[▲]** or **[▼]** key to display "No", and then press the **[Enter #]** key.

③ Press the **[Enter #]** key.

```
WEP Key:      [ 0]
█
```

 **Note**

- The value in brackets at the upper right is the number of characters entered.

④ Press the **[▲]** or **[▼]** key to select characters, and then press the **[Enter #]** key.

```
WEP Key:      [ 1]
0
```

The pointer (█) moves to the next character position.

```
WEP Key:      [ 1]
0█
```

⑤ Continue entering the key.

 **Note**

- You can enter either 10 or 26 characters. If the key you enter is not 10 or 26 characters long, the following message appears.

```
Error: Enter 10
or 26 characters
```

- If you press the **[Escape]** key, the pointer (█) moves to the previous character position.

⑥ After entering the key, press the **[Enter #]** key.

```
WEP Key:      [26]
0000000000000000
```

The screen returns to step ⑫.

⑬ Press **[On Line]**.

“Ready” appears on the panel display.

14 Print a configuration page to confirm the settings made. See "Printing a Configuration Page" in the Printer Reference.

Using the IEEE 802.12b (Wireless LAN)

This section provides information that is not in the Network Printing Guide.

Using in Ad hoc Mode

Depending on the client software of the IEEE 802.11b card installed in the computer, setting IBSS (Independent Base Service Set or Network Name) may be required. In this case, make the IBSS settings.

Note

- If there is computer with an IEEE 802.11b card installed that requires IBSS settings and a computer with an IEEE 802.11b card installed that does not require IBSS settings, the printer may not be able to transmit to either of them.

1 Make setting for the computer.

Set the transmission mode of the IEEE 802.11b card installed in the computer.

2 Make the computer network settings. The following items must be set:

- IP Address
- Subnet Mask

Reference

For more information about how to make setting for the IEEE 802.11b card installed in the computer and the computer in use, see the appropriate operating instructions or consult your network administrator.

telnet

❖ Setting IEEE 802.11b

- Configuration

Parameter	Value to be configured
mode [ap adhoc 802.11adhoc]	You can set infrastructure mode (ap), ad hoc mode (adhoc) or 802.11 ad hoc mode (802.11adhoc). The default is 802.11 ad hoc mode.
key [key value]	You can use a 10-digit hexadecimal key with 64-bit WEP. You can use a 26-digit hexadecimal key with 128-bit WEP. Entering a setting other than these is invalid.
