# Firmware Update Operating Instructions

These instructions explain how to update the firmware of the printer.

Before you start the update, make sure of the following:

- The printer is in standby mode and the [Power] key is lit in green.
- No applications are running on the computer.
- The printer is connected to the computer with a USB cable.

The firmware cannot be updated over a network. In this case, make a temporary USB connection.

**1.** Double-click [*Product Name\_*FirmwareUpdater \_\_VX\_XX.exe] to start the update.

## Note

- *Product Name* represents the machine name; VX\_XX, the version.
- **2.** Select [English], and then click [OK].

**3.** The following screen appears. Check the displayed details, and then click [Next >].

Select f	he printer name, and then click [Next
•	Confirms the printer system version and communication to the printer. Select a printer to update, then click [Next].
	Select a grinter: Fraduct Name
	< Back Next > Cancel

 Check that the system version for [Update data] is later than the system version for [Printer], and then click [Next >].

## <u>Note</u>

• The following screen is an example. The versions that actually appear may be different.

<ul> <li>Contirm the printer (Syster version) below.</li> <li>You cannot cancel update</li> </ul>	Contirm the printer (System version) and the update data (System version) below. You cannot cancel updating once it has started. Click (Next) to start.			
updating.				
Printer				
System version:	5.54			
Update data				
System version:	5.58			

**6.** Click [OK].

#### Note

Updating starts.

**7.** If the following screen appears, switch the printer off and then back on.

## <u>Note</u>

• When the printer is switched back on, the progress bar advances to the end, and updating is completed.

Þ	The printer firmware has been updated. Turn the power off, then on.
Prog	

## <u>Note</u>

- If you do not switch the printer off and back on, the printer switches off automatically after a while so it will not be damaged.
- If the following screen appears, switch the printer off and then back on, and then click [OK].

2	
⚠	No response from the printer. Check the cables, then turn the power off, then on.
	OK]

**8.** After updating, check the version, and then click [Finish].

<u>Note</u>

• The following screen is an example. The versions that actually appear may be different.

	~
