## **<u>1.</u>** About Firmware Updates

Updates allow GelSprinter GX e2600/GX e3300N/GX e3350N/GX e5550N/GX e7700N models to receive the latest firmware.

## 2. Operating Environment and Other Requirements

### 2.1. Operating Environment

If the printer is connected to computers by network peer-to-peer or directly via a single USB cable, successful updates are guaranteed.

## 2.2. Supported Operating Systems

- 1. Windows 2000
- 2. Windows XP
- 3. Windows XP (x64)
- 4. Windows Vista
- 5. Windows Vista (x64)
- 6. Windows 7
- 7. Windows 7 (x64)
- 8. Windows Server 2003
- 9. Windows Server 2003 (x64)
- 10. Windows Server 2008
- 11. Windows Server 2008 (x64)

You must login as an administrator or as a user with administrator privileges.

## **2.3.** About Printer Drivers

Printing is possible provided the printer's driver is installed.

## **<u>3.</u>** Update Cautions

This section describes several things you must check for to ensure successful updates. You must read this section before performing updates.

\* For more details about cautions, refer to "ReadMe.txt".

## **3.1.** Caution 1.

Before performing updates, check your computer's power options: make sure [System Standby:] / [System hibernates:] is set to "Never".

To check your computer's Power Options under Windows XP (procedures for other operating systems will differ):

- 1. Click the [Start] menu.
- 2. Click [Control Panel].
- 3. Click [Power Options].
- 4. Select the [Power Schemes] tab (displayed by default).
- 5. Make sure [System standby:] / [System hibernates:] is set to "Never".

## **3.2.** Caution 2.

During updates, make sure the printer's power is not turned off and the network or USB cable remains connected. Also, during updates, do not print any jobs or run applications that use the printer driver, Status Monitor, or SmartDeviceMonitor.

## **3.3.** Caution 3.

If the printer's power is turned off or the USB or network cable is disconnected during updates, the update will fail and must be performed again.

## **3.4.** Caution 4.

During updates, do not put the computer into [System standby:] / [System hibernates:] manually.

#### **3.5.** Caution 5.

If you want to use the SmartDeviceMonitor port to update the firmware over a network, be sure to uncheck the [Use Extended Features] check box of SmartDeviceMonitor for Client.

#### **3.6.** Caution 6.

Bidirectional communication is not available it you are running SmartDeviceMonitor port under a 64-bit operating system. It you are using a 64-bit operating system, see "5.2. Bidirectional-Disabled", and perform the update procedure.

# 4. Disclaimer

The manufacturer is not liable for any damages resulting from use or misuse of this software. Nor is the manufacturer liable for any damages resulting from use or misuse of this software with third parties.

## 5. Firmware Update Operating Instructions

These instructions explain how to update the firmware of the printer.

- Before you start the update, make sure of the following:
- The printer is in standby mode and the [Online] key is lit in blue.
- No applications are running on the computer.
- The printer is connected to the computer with a USB cable or via network peer-to-peer.

The following procedure uses Windows XP screenshots and is based on the GelSprinter GX e7700N model.

Note

Depending on the printer driver and its settings, update procedures might vary.

Print to the fo checked port	llowing port(s).	Documents	s will print to	o the first fre	e	
Port	Description		Printer			•
LPT1:	Printer Port					
LPT2:  LPT3:	Printer Port Printer Port					
	Serial Port					
СОМ2:	Serial Port					
	Serial Port					
□ COM4:	Serial Port				~	
		Celete F	Port	Confic	ure Port	ר
	lirectional supp					

Open the properties dialog box for the printer in use and check the port status.

- If "bidirectional support" has been enabled in the printer properties dialog box:
  ⇒Update the firmware by following the update procedure shown in section 5.1.
- If "bidirectional support" in the printer properties dialog box has been disabled: ⇒Update the firmware by following the update procedure shown in section 5.2.
- \* We recommend you enable bidirectional support.

#### 5.1. Bidirectional-Enabled

This section explains how to update the bidirectional-enabled printer driver.

1. Double-click [Product Name\_FirmwareUpdater

\_VX\_XX.exe] to start the update.

Note

Product Name represents the machine name; VX\_XX, the version.

#### 2. Select [English], and then click [OK].

Ð	×
	Select a language to display.
	Select a language:
	OK Cancel

**3.** The following screen appears. Check the displayed details, and then click [Next >].

	Do you want to update the printer firmware?	
	Read the following contents, then click [Next].	
1) This u	pdater is exclusive to certain devices. Confirm that this updater supports your printer.	
Monitor fo	ete all print jobs and close all other applications including the printer driver and Status r safety. that the printer and your computer are directly connected by a USB cable or a P2P	
Peer to F	and we printer any sour comparer are an easily connected by a contract of a larger error network. Performance of connection with hub(s) is not guaranteed. that the printer power is on.	
	the printer is connected via network, do not print or monitor using other computer(s),	

4. Select the printer name, and then click [Next >].

Þ	N 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997
Þ	Confirms the printer system version and communication to the printer. Select a printer to update, then click [Next].
	Select a grinter. BICOH IPS 0 GK-67700
	< Ba Next > Dancel

5. Check that the system version for [Update data] is later than the system version for [Printer], and then click [Next >].

Note

• The following screen is an example. The versions that actually appear may be different.

Þ	
	Ready to communicate with the printer. Confirm the printer (System version) and the update data (System version) below. You cannot cancel updating once it has started. Click [Next] to start updating.
	Printer System version: 0.01
	Update data System version: 1.04
	< B. Next> Cancel

#### 6. Click [OK].

Note

Do not switch the printer off while updating.

•	
	Printer firmware update will start.
-	You cannot cancel updating once it has started. Are you sure you want to start updating?
	OK Cancel

#### 7. Updating starts.

Sending data has started.

98
Overwriting the printer firmware Please wait.
Progress:

**8.** The printer is switched back on automatically, after the screen shown below appears.

	The printer firmware has been updated. Turn the power off, then on.
Progr	ess: 0

**9.** After updating, check the version, and then click [Finish]. Note

The following screen is an example. The versions that actually appear may be different.

	The printer firmware update was successfully completed.
-	Confirm the printer [System version] and the update data [System version] below.
	Printer System version: 1.04
	Update data
	System version: 1.04
	< Ba. Finish Dancel

**10.** Updating is complete.

#### 5.2. Bidirectional-Disabled

This section explains how to update the bidirectional-disabled printer driver.

To update the firmware when bidirectional communication is disabled, see 3. "Update Cautions", and then check the following:

• You must be able to view the printer's control panel.

⇒The procedure requires you to check the printer's status on the control panel. Make sure you are able to view the printer's control panel when updating the firmware.

Check the current firmware version and the firmware version you want to install.
 ⇒ Take care to install only firmware versions that are later than the version that is already installed.

[How to check the current firmware version]

- 1. Press the [Menu] key on the printer's control panel.
- 2. Select [List/Test Print], and then click the [Enter] key.
- 3. Select [Config. Page], and then click the [Enter] key.
- 4. The System Summary is printed.
- 5. Check the version number under "System Version".

1. Double-click [Product Name\_FirmwareUpdater

\_VX\_XX.exe] to start the update.

#### Note

Product Name represents the machine name; VX\_XX, the version.

2. Select [English], and then click [OK].

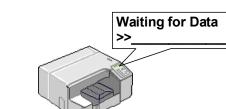

•		$\mathbf{\mathbf{x}}$
	Select a language to display.	
	Select a language:	
	Cancel	

5. After checking the following, click [OK].

- A functional printer has been selected.
- The printer is available and not currently inactive.
- The printer is not offline.
- There are no remaining print jobs displayed on the task bar.
- \* Check the control panel for the next step.

<b>B</b>		×
1	Printer firmware update will start. You cannot cancel updating once it has started. Are you sure you want to start updating?	

**6.** Check that the message "Waiting for Data" is displayed on the printer's control panel.

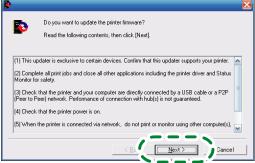

#### 7. Click [OK].

\* Check the control panel for the next step.

3. The following screen appears. Check the displayed details, and
then click [Next >].

4. Select the printer name, and then click [Next >].

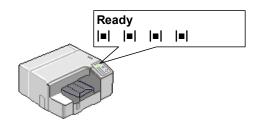

P	×
	Confirms the printer system version and communication to the printer. Select a printer to update, then click [Next].
	Select a grinter: RICOH IPSIO GX e7700
	< <u>Ba</u> Cancel

8. Updating starts.

Check the update progress displayed on the LCD of the printer's control panel.

The update progress should be as shown in the diagram on the right.

When the "Ready" message appears, the printer is ready to print.

**9.** After the update, check that the new firmware version is displayed.

Use the following procedure to check the version of your printer.

- 1. Press the [Menu] key on the printer's control panel.
- 2. Select [List/Test Print], and then click the [Enter] key.
- 3. Execute [Config. Page], and then click the [Enter] key.
- 4. The System Summary is printed.
- 5. Check the version number under "System Version".

**10.** The update is complete.

* The progress of the update is displayed on the LCD of the printer's control panel in the following order.
