Notes on Color Scanning

To perform color scanning, set the scan mode to full color for each scan job.

Configuring the Settings

the [Scanner] key ▶ [Options] ▶ [Original Type] ▶ [Full Color: Text/Photo]

⬇ **Note**

- You can register presets for frequently used settings.
  You can call and apply presets by pressing the [Program] key.
- You can register presets via Device Setting Utility or Web Image Monitor.
  If you use Device Setting Utility, register presets to [Program Function].
  If you use Web Image Monitor, log in as an administrator, and then register presets to [Program Function Register].
  [Program Function Register] ▶ Select a program. ▶ [Change] ▶ Select a function.

📄 **Reference**

- For details about scan settings, see "Specifying the Scan Settings" in "Using the Scanner Function" in the User Guide.
