## 1. About Firmware Updates

This manual explains how to update the software for SG series network boards.

## 2. Operating Environment

A Web browser is required for use.

To use the Web browser, specify the TCP/IP protocols of your computer and the machine.

### 3. Disclaimer

The manufacturer is not liable for any damages resulting from use or misuse of this software.

Nor is the manufacturer liable for any damages resulting from use or misuse of this software with third parties.

## 4. Caution

To update the firmware to version 2.0.0 or later, the current firmware must be version 1.9.0.

If the current firmware is earlier than version 1.9.0, update it first to version 1.9.0, and then to version 2.0.0 or later.

To check the firmware version, print the configuration page.

[▼/Menu] ▶ [List/Test Print] ▶ [Config. Page]

## 5. Firmware Update Operating Instructions

These instructions explain how to update the firmware of the machine.

Before you start the update, make sure of the following:

- The machine is in standby mode.
- · No applications are running on the computer.

The following procedure uses Windows 7 screenshots.

- 1. Open a Web browser.
- 2. Enter "http://(the machine's IP address or host name)/" in the address bar.

Updating starts.

When the update file transfer completes, the following message appears:

The update takes a while. Do not operate the Web browser, computer, or the machine while updating. The update progress appears on the machine's control panel.

#### 9. Click [OK].

The rebooting takes a while. Click [OK] after it reboots. The display returns to the ROM Update page.

If DHCP has been enabled, the IP address might be updated, resulting in the Web browser not returning to the top page. If the top page does not appear, check the IP address using the machine's control panel and try connecting again.

10. Check the current firmware version.

If it has been updated, the update has completed successfully.

Otherwise, turn the power off and back on, and then try this procedure again from Step 1.

## 6. Wireless LAN Update Operating Instructions

These instructions explain how to update the wireless LAN of SG 3110DW.

Before you start the update, make sure of the following:

- The machine is in standby mode.
- A wireless LAN connection is active.
- No applications are running on the computer.

The following procedure uses Windows 7 screenshots.

- 1. Open a Web browser.
- 2. Enter "http://(the machine's IP address or host name)/" in the address bar.
