Subject: Request for mylar replacement when installing the Document Feeder DF2020		Prepared by: H.Morishima	
From: 2nd Tech Service Sect., MFP/P Tech Service Dept.

Request

When installing the Document Feeder (DF2020), replace the mylar originally attached to its exposure glass with the new mylar included as an accessory to the Document Feeder. Scan quality, especially at the trailing edge of the original, is better with the new mylar.

Replace the mylar for the following combination of the mainframe and DF2020:

- DF2020 manufactured **from** October 2015 and main unit manufactured **before** October 2015 production.

1. Remove the originally attached mylar from the document feeder exposure glass.
2. Wipe the document feeder exposure glass with cloth.
3. Attach the new mylar.
 - The cutout in the mylar faces to the left.
 - Set the top left corner (circled in red) flush against the top edge of the exposure glass.
