This course explains the differences between this new model and its predecessor, PT-D3.

The only real difference is the scanner and ADF, which are taken from the K-C4.

There is also a new accessory, the table stand, which will be explained later.

Product Overview

No additional notes

How Many Models

- DD3324: A4 drum, 220-240V
- DD3334: LG drum, 120V
- DD3344: B4 drum, 220-240V
- DD3344c: B4 drum, 220-240V, Special design for the China market

The models are released in the following markets

DD 3324: Europe, Asia

DD 3334: North America, Latin America
DD 3344: Europe, Asia, Latin America, Korea

DD 3344c: China
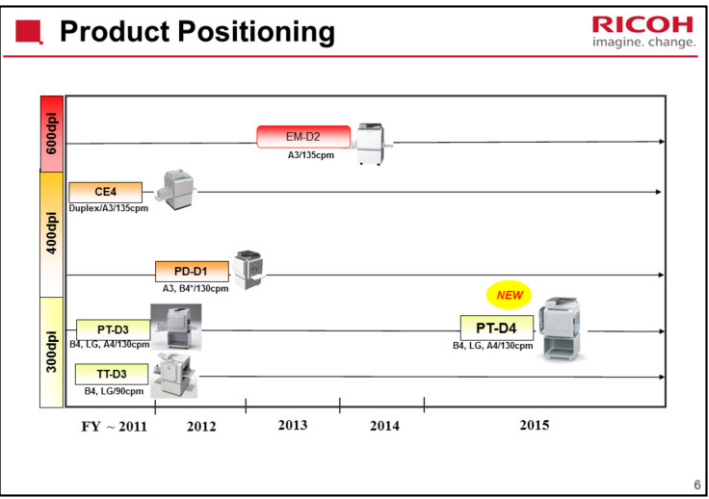

Optional ADF (D684)
Same as the K-C4

The color of the covers has changed to match the new PDI (Product Design Identity).

Instead of the ADF, the platen cover PN2000 (D700) can be attached.
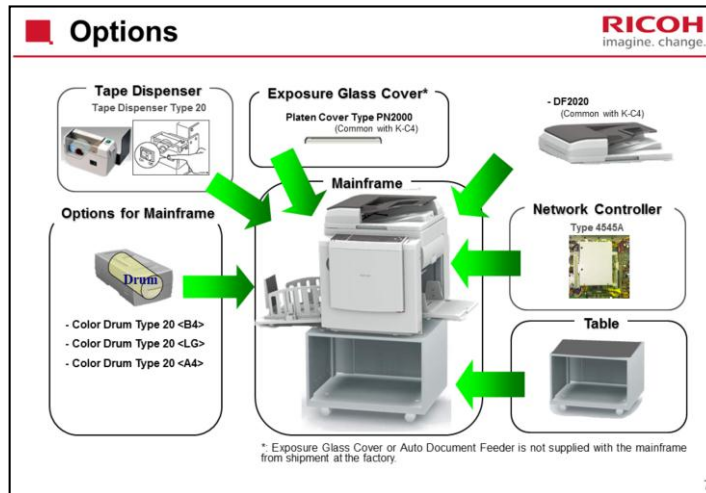

Operation Panel

This shows the North American version.

The European version uses symbols as usual, but the design is the same.

No additional notes

The controller allows the user the same network printing capabilities as a networked printer or MFP.
Changes Since the PT-D3

Better Scanning

- The ADF and scanner from the K-C4 are used.
  - Wider range of paper weights can be fed.
  - Original stack capacity increased from 30 to 100
- Higher scanning resolution
  - PT-D3 - 600 x 300 dpi
  - PT-D4 - 600 x 600 dpi
- New CCD
  - PT-D3's CCD – Monochrome: Some colors cannot be captured well.
  - PT-D4's CCD – RGB: Can capture various colours as a monochrome image.

PT-D4 Scanner — LED — RGB CCD
PT-D3 Scanner — Xenon — Mono CCD

Please refer to training materials for the K-C4 to learn about the scanner.

Stand for Tabletop Use

- Use the stand when installing the machine on a table (except when at the edge of the table), so that the paper delivery table is at the correct angle

No stand: Edge of Table — Proper angle for good paper alignment

No stand: Center of Table — Incorrect angle for good paper alignment

Proper angle for good paper alignment after adding the stand

New Stand

The stand is bundled with the machine.

See the installation procedure for the projector for details on how to install the stand.
Reduced Energy Consumption

TEC	PT-D4	PT-D3
US	1.22kw/h	1.25kw/h
EU/Asia	1.34kw/h	1.3kw/h

Placing Originals on the Exposure Glass

- If the platen cover is used, customers can position the original at the center or at the rear left corner.
- If the ADF is used, the original is fed to the rear left corner.

No additional notes

Faster Master Making and First Print

RICOH
imagine. change.

A4, exposure glass	Master Making Time	First Print Time
PT-D3	32 sec	34 sec
PT-D4	31 sec	33 sec

No additional notes

Firmware Update

- Uses SD cards in a similar process to other recent models.
  - PT-D3 uses flash memory cards.
