RICOH

Notes for Users

Please note the following information when using Simple 1:1 Connection.

Notes for using Simple 1:1 Connection

• **Antivirus programs and firewalls may prevent client computers from establishing Simple 1:1 Connection with projector.**

<Solution>

To prevent an antivirus application from blocking the connection, register Network Utility in the antivirus program's exclusion list. For details about the procedure for excluding a program, see your antivirus application's Help.

To prevent the firewall from blocking the connection, register the projector's IP address in the firewall's IP address exclusion settings. For details about the procedure for excluding an IP address, see your firewall's Help.

• **A client computer which is connected to the network using an Ethernet cable may not be able establish Simple 1:1 Connection with projector.**

<Solution>

Disconnect the Ethernet cable from the client computer before configuring Simple 1:1 Connection.
