

Notes for Users

This supplement provides the corrections and additions to the *Operating Instructions* manual supplied with the following machines:
PJ X3351N/WX3351N/X4241N/WX4241N

Topic

Page 12 *Precautions for Using the Projector > Power Source*

Page 163 *Specifications for the Projector > Power requirements*

Error	Corrections
 Region A (mainly Europe and Asia) 220–240 V, 1.27 A or more, 50/60Hz	 Region A (mainly Europe and Asia) 220–240 V, <u>1.7 A or more</u> , 50/60Hz
 Region B (mainly North America) 120 V, 2.94 A or more, 60Hz	 Region B (mainly North America) 120 V, <u>3.1 A or more</u> , 60Hz

Topic Page 70 *Connecting the Projector to a Network*

The following additional information is provided:

★ Important

When the projector is connected to a wired and a wireless LAN simultaneously, assign the projector with IP addresses of different network segments. If IP addresses of the same network segment are assigned, the projector may not operate correctly.
