Basic Specifications

imagine. change.

- Castor-PJ1: PJ K360
 - Brightness: 3000lm
 - No network function
 - Single DLP type: 0.55"
 - Projection distance: 0.51m~2.54m
 - Lens: F#2.8 f=7.26mm
 - Lamp: High-pressure mercury lamp (240W)
 - ECO 1: 190W, ECO 2: 160W
 - Speaker: 8W (Mono)
 - Image size: 40 - 200 inch
 - Resolution: 1024 x 768 pixels (XGA)
 - Other resolutions possible but may result in some loss of image clarity.
 - Lamp Life: 3500 hours typical (Full Mode), 5000 hours typical (ECO1/ECO2 Mode), 10000 hours typical (Auto Mode)
 - Firmware update only via serial port
 - Power consumption: 295W (240W in ECO mode)

3

The brightness spec of 3000 lm is a marketing spec. Typical brightness is more like 2700 lm.

After Replacing Parts

- After replacing certain parts, adjustments must be made as shown in the following table.
 - Example: After replacing the main board, update the firmware, do OSD Reset, Waveform Download and Fan Calibration, and Color Wheel Index Adjustment
 - For details of each adjustment: Service Manual > Replacement and Adjustment > Repair Action

	Main Board	Firmware	Lamp Module	Ballast	Blower	Optical Engine Module
Version Update	Yes	Yes				
Reset Lamp Hours			Yes			
OSD Reset	Yes	Yes				
Waveform Download and Fan Calibration	Yes	Yes		Yes	Yes	
Color Wheel Index Adjustment	Yes	Yes				Yes

14

Lamp replacement is normally done by the user. The procedure is in the user guide.

The lamp hours reset procedure is as follows.

Main menu > Options > Lamp Settings > Clear Lamp Hours

Service Mode

RICOH
 imagine. change.

■ Press Power > Left > Left > Menu sequentially on the remote controller or on the top panel to get into service mode.

- For a list of the service functions and their purposes: Service Manual > Troubleshooting > Service Menu Explanation

Updating the Firmware - 1

RICOH
imagine. change.

- The full procedure is in this section of the service manual.
 - 4. System Maintenance > SYS Firmware Upgrade Procedure
- Here is a summary.
 - Install DLP Composer Lite 11.1.1 in a portable PC.
 - Unplug the projector from the power source.
 - Hold the "Power" button and plug in the power cord.
 - When the Power LED lights orange, and the Temp and Lamp LEDs light red, release the "Power" button.
 - Connect the projector to the portable PC with an RS-232C Cable (9P(F) TO 9P(M)).
 - Use a USB-RS232C conversion adaptor if your computer does not have RS232C.
 - Start DLP Composer Lite 11.1.1 and configure "11.1.1 FlashDeviceParameters". See the procedure in the manual for details.
 - Browse for the firmware file (*.img).
 - Erase the flash memory.
 - Update the firmware.
